Dainik Bhaskar Group: Aspiring Growth

Preface

Dainik Bhaskar Group with its ambitious growth plans exemplifies gutsy business strategy and marketing. It changed the contours of the marketplace by entering into markets with strong and entrenched incumbents. This task was even more arduous considering the nature of the category as it is difficult to change the habit of newspaper readers. Newspaper touches the life of every consumer and hence the case would drive strong emotional connect and animated discussion in the classroom. The focus of the company on tier II and tier III towns makes it an apt material for case study as such towns would be the drivers of future growth of Indian economy.

SEEMA GUPTA

Assistant Professor, Marketing

Indian Institute of Management Bangalore (IIMB)

Aspiring Growth

On May 8, 2012; Pawan Agarwal, Director, Dainik Bhaskar Group (DBG) and winner of the Asia-Pacific entrepreneur of the year (2010) award,¹ called for a meeting of the executive team to choose a market for further expansion of the group, after its stupendous success in Maharashtra. DBG was India's largest newspaper group having 19.2 million readers (**Exhibit 1**). In 2011, it had revenues of ₹ 12 billion (1\$ = ₹ 55, June 2012) and net profit of ₹ 2.5 billion (**Exhibit 2**). The group's ability to simultaneously consolidate in existing markets and expand in new markets resulted in its consistent growth in revenues and profitability.²

Besides newspaper, DB group also owned radio channel – MY FM, which operated 17 stations across 7 states. The group also had a strong digital presence with four portals – dainikbhaskar.com (Hindi), divyabhaskar.com (Gujarati), divyamarathi.com (Marathi) and dailybhaskar.com (English). The Hindi news portal dainikbhaskar.com itself attracted more than 10 million unique users and 245 million page views per month.³ The group also had four magazines – *Aha Zindagi* (positivity in life), *Bal Bhaskar* (in Hindi for kids), *Young Bhaskar* (in English for kids) and *Lakshya* (for career grooming).

The group published newspapers in four languages – Hindi (*Dainik Bhaskar* and *Business Bhaskar*), English (*DNA*), Gujarati (*Divya Bhaskar*) and Marathi (*Divya Marathi*) in 65 editions across 13 states (**Exhibit 3**). Its newspaper had different supplements – *City Bhaskar* (city-based activities and a youth-centric coverage), *Madhurima* (for women), *Rasrang* (for literary) and *Navrang* (for entertainment). With its unrelenting focus on tier II markets (cities with population between 1 and 4 million); the group had acquired dominant No. 1 position in markets such as Madhya Pradesh (MP), Chandigarh, Haryana and Chhattisgarh (**Exhibit 4**). Its non-metro urban focus ensured that the group was the market leader in major cities such as Jaipur, Ahmedabad and Amritsar while being a formidable challenger in the respective states – Rajasthan, Gujarat and Punjab (**Exhibits 5, 6 and 7**).

¹ The award was given by Enterprise Asia, a leading private organisation for entrepreneurship development in Asia.

² DB Group was listed in Bombay Stock Exchange and National Stock Exchange in 2010. Despite the recessionary trends, the IPO (initial public offering) was oversubscribed 39 times.

Dainik Bhaskar Group: Aspiring Growth

Girish Agarwaal, Director, DBG and winner of the Ernst & Young Entrepreneur award⁴ said:

We are the only group which is No. 1 in multiple markets and which has publications in multiple languages. Most other newspapers depend heavily on a single market and a single language whereas land and language does not make a difference to us!

The unparalleled success in Maharashtra in 2011 where it not only overtook the entrenched player *Lokmat* on the very first day of its launch in Aurangabad, but also gained a lead of 25% over its arch rival within a short span of six months,⁵ further emboldened the group to pursue its vision of being the largest and the most admired media brand in the country enabling socio-economic change. The group firmly believed that tier II and tier III cities (population less than 4 million) were the catalysts for growth in India. Per capita income was growing faster in tier II and tier III cities resulting in higher consumption growth in these markets (**Exhibits 8 and 9**). This in turn would lead to growth in advertising in these markets. Since Indian language media dominated these markets (Hindi papers comprised 40% of the market, English 15% and regional 45%), the players with dominant readership would stand to gain the most from the resultant advertising growth.

To tap into the growth potential, DBG shortlisted various markets for possible entry. Peter Suresh, Head Strategy, DB Group presented to the executive team comparative data on the potential, population size, literacy, readership and SEC⁶ for different states (**Exhibits 10, 11, 12 and 13**). Apart from readership and competition analysis, the choice of the market would be influenced by the socio-political-cultural milieu of the states. Pawan Agarwal wondered which market to enter.

HISTORY

The first edition of DBG was launched in Bhopal in 1958. It then entered the cities of Gwalior, Ujjain and Jhansi. In 1983, it entered Indore, the business center of Madhya Pradesh (MP) with a strong incumbent *Nai Dunia*. On the back of fair reporting and quality printing, it soon became the No. 1 newspaper in Indore and subsequently in the whole of MP in 1995. This success in a market dominated by an incumbent enhanced the group's confidence to expand outside MP. It explored options in the Hindi belt comprising Uttar Pradesh (UP), Bihar, Rajasthan, Delhi, Punjab and Haryana. UP and Bihar suffered from low levels of literacy and per capita income, Punjab was reeling under the threat of terrorism and Delhi was dominated by English newspapers. In 1996, the DB group zeroed in on Rajasthan as it was culturally similar to MP and being a vast geographical territory offered scope for expansion. Moreover, Jaipur had high readership of Hindi dailies among SEC AB and high per capita income indicating potential to attract advertisers. It was dominated by a single player – *Rajasthan Patrika* (RP), which had 80% market share.⁷ Readership had not grown much in the past, indicating untapped potential and a need gap which DBG could potentially fill. Jaipur was even more challenging than Indore as unlike *Nai Dunia* which was strong only in Indore, RP was the market leader in the entire state. Traditional approach for launch of a newspaper was to produce a good paper and wait for readers to subscribe. However, DBG took a leaf out of the automobile industry's book where pre-booking was a practice and

⁴ Girish Agarwaal won the award in 2006 in IT, Communication & Entertainment category.

⁵ As per IMRB Survey Report (Aurangabad) initiated by DBG.

⁶ Socioeconomic classification was a tool for segmenting households in India. Originally developed by Indian Market Research Bureau (IMRB), it was standardised and adopted by the Market Research Society of India to categorise consumer behaviour. The urban SEC classified households into 5 groups A, B, C, D, and E on the basis of Education and Occupation. SEC A had the highest purchasing power. The rural SEC classified households into 4 groups R1, R2, R3 and R4 on the basis of education and type of house (mud, brick and mix). SEC R1 had the highest purchasing power.

⁷ Out of 5.16 lakh people that read any Hindi newspaper in Rajasthan, 4.41 lakh people read RP (IRS 95).

Dainik Bhaskar Group: Aspiring Growth

pre-marketed the paper and got confirmed paid-up circulation. DBG conceptualised a twin-contact programme. In the first phase, it conducted research to identify readers' expectations of a newspaper – supplements, price, number of advertisements and content preference – and their attitudes towards existing newspapers. In the second phase, it shared the results of the survey with the potential readers and booked subscriptions (see **Exhibit 14** for the launch process). Jaipur and the surrounding areas had 3.5 lakh (1 lakh = 0.1 million) households and DBG targeted 50% of them (1.7 lakh) for the survey. Teaser hoardings were put across the city to arouse curiosity.

A team of 275 surveyors were recruited from colleges and trained for the survey. Sanjeev Kotnala, VP & National Head – Brand Communications said:

The team started the day with the morning anthem '*humko man ki shakti dena*' (a popular song in Hindi meaning 'O God give us the strength') led by Pawan Agrawal himself. The team at times did not survey all the households in a locality in one go. It created a mystique around the contact programme. People wondered why DB representative had talked to his neighbour but not him. This opened the doors for DBG. For getting a pulse of the market place, promoters wore surveyor DB T-shirts and went in the field. They ate in neighbourhood places and engaged in conversation with consumers. To keep the spirits of the team high, we would bring a celebrity and declare a party on Friday evening. We also created possibilities of absorbing some of the surveyors in the company.

In the first phase of the survey, DBG asked potential readers if they could come back to share findings of the survey. In the second phase, DBG shared the findings – consumers wanted quality content at reasonable price. It assured them of meeting the expectations and offered an introductory price of ₹ 1.5 against ₹ 2.25 of RP. The response was overwhelming. On the first day, DBG had a circulation of 1.72 lakh copies against 1.48 lakh copies of RP in Jaipur. Over the years, DBG expanded its operations in the whole state with Dainik Bhaskar.

After Rajasthan, DBG targeted Haryana and Chandigarh as they lacked the presence of a strong Hindi paper. Although Chandigarh was considered an English newspaper market (*Tribune*, an English paper was the market leader), DBG's research showed that people would be more comfortable with Hindi language newspaper and they patronised English newspaper only because of absence of a good Hindi newspaper. So when DB was launched, instead of using literary Hindi, DBG used colloquial Hindi. For instance, it used *university* instead of *vishwa vidyalaya* (a Hindi translation) and *judge* instead of *ucch nyayadheesh* (a Hindi translation). Once again, the group's newspaper – Dainik Bhaskar became No. 1 from the day of the launch.

DBG then explored the remaining markets. Wanting to break the language barrier, it selected Gujarat which was also prosperous and had high literacy. However, the state had low readership and readers perceived the quality of existing dailies – *Gujarat Samachar* and *Sandesh* as only moderate. DBG replicated its highly successful twin-contact model for launching *Divya Bhaskar* in Ahmedabad in 2003. A survey of 12 lakh households⁸ revealed preference for non-sensationalist, better quality paper with fewer ads and lower price. On the first day, DBG sold 4.8 lakh copies becoming the leader from Day 1. The entrenched incumbents reacted strongly – they dropped prices to match those of *Divya Bhaskar*; ran promotions (attractive gifts, lucky draws and contests); increased supplements and upgraded print quality. With its focus on quality content, DBG was however able to hold on to its readers. It then expanded into other cities and bought *Saurashtra Samachar* for making inroads into Saurashtra region in Gujarat.

After the success in Gujarat, DBG entered Punjab in 2006 and Jharkhand in 2010. DBG designed the launch campaigns depending upon the need and relevance in the market. The launch communication in Punjab focussed on getting Punjab its rightful due – Punjab did not have good airports, its film industry was dying and sportsmen were not getting recognition. DBG spoke on behalf of Punjab with a Punjabi attitude, instilling pride among

⁸ Out of 12 lakhs, 8 lakhs were in Ahmedabad and 4 lakhs in surrounding areas.

Dainik Bhaskar Group: Aspiring Growth

residents. In Jharkhand, DBG took up the cause of the common man – it raised the issues of underdeveloped infrastructure.

Although DBG's launch strategy was highly successful across markets, it knew that while marketing could fetch initial subscriptions at the time of launch, renewal of subscriptions could come only from good editorial content.

EDITORIAL

DBG believed in unbiased, credible and courageous journalism. It was non-aligned – be it a religious group or community or political party or client. It did not patronise any particular religion, rather covered activities of different religions and communities. Other papers had a section on spirituality based on the belief that it would transcend all religions. However, DBG believed that such reporting comes from the lowest common denominator! It muted the religion factor! Similarly, it gave expression to many communities and castes and therefore created a plural identity. Owing to its non-alignment with politicians, it was not surprising that one day it would criticise a politician for an inappropriate action and the next day applaud him for a good decision. Yatish Rajawat, Group Managing Editor said:

As any other media, we too at times face pressure from various segments regarding the news coverage. Under such situations, we are guided by our philosophy that our first commitment is to our readers. But, we always offer to carry alongside their point of view. Such is our commitment to the readers that if we believe that our own event may not be of relevance to our readers, we would not give it coverage.

DB group's journalism was credible because it told both sides of the story. For instance, when the nation was all gaga over the anticorruption movement led by Anna Hazare,⁹ DBG too covered it on the front page. However, DBG also considered the point of view of Anna's critics and covered the critique in its editorial page. It followed courageous journalism despite the common occurrence of threats to underplay arrest or scam or crime news. For instance, news about Chinkara deer (black buck) poaching by Bollywood celebrity Saif Ali Khan and Salman Khan was broken by it as it was relevant to the Bishnoi community living in the area.¹⁰ Similarly, in the murder case of Bhanwari Devi in Rajasthan in which prominent politicians were accused, DBG pursued the case and kept it alive until the government was forced to take action. Rajawat said:

With time, such elements have realised that our paper will not succumb to any threats or pressure and hence the pressure on the editorial has also decreased.

DBG followed local and hyper-local journalism which focussed on local news from the city. It further divided cities into sectors and reported events specifically on that sector. For instance, in Jaipur, M.G. Road and Mansarovar were distinct sectors. Rajawat said:

Our front page is on national affairs, but our pages after that up to eight are on the city. We are classified as a 'city newspaper.' If you look at *Los Angeles Times* or *Ohio Times*, they have deep sections on the city. Most newspapers were founded as city newspapers. *New York Times* was a New York newspaper and *Washington Post* was a Washington paper. But over time, this genesis was lost, so the connect with the readers was lost. Some papers thought that celebrities will touch everyone's lives and so embraced

⁹ Anna Hazare was one of India's well-acclaimed social activists.

¹⁰ Black Buck was listed as an endangered species. Bishnoi was a community of Rajasthan that protected the wild life and environment with a missionary zeal. Their history was peppered with stories about martyrs who died fighting to save the environment.

Dainik Bhaskar Group: Aspiring Growth

‘celebrity journalism’ which is based on personalities rather than issues. Other papers follow French journalism in which they take one issue and expand it across the paper. For instance, if they take corruption, then it will be there on the front page as well as on inside pages. They will go heavy on one subject and editorial resources will be focussed on delivering the best on the subject of the day. It makes sure that you read at least one story. But slowly newspapers are realising that people connect with what is happening in their neighbourhood and so have started following the local model that we have been following since last 54 years. While TV and internet became national and international, newspaper reinvented itself by becoming local. Because of our hyper-local model, we have one of the largest journalist forces in the world!

To enable localisation, DBG had large number of editions and sub-editions. It launched a different edition for cities beyond 300 kilometres. However, it did not mean that DBG would not have a separate edition for less distant cities. For example, it had separate editions for Ujjain and Indore which were only 50 kilometres apart. The composition of the newspaper across 65 editions and 191 sub-editions or district editions was completely different. Unlike English newspapers, DBG did not standardise its product at all. An editor had the option of selecting the news from the central desk where all news of national, regional and international importance were available across genre at a click and the local desk which had local and hyper-local news. The editor chose the news keeping in mind the local impact, interest, cultural, social, political sensitivity and distance from the epicentre of the news. For instance, shifting of Nano plant to Gujarat was national news and so was carried across all editions. However, it was big news in Gujarat and Delhi editions. Whereas, the Gujarat edition carried additional stories about economic growth of the state, Delhi edition carried the story from the perspective of political victory of Narendra Modi.¹¹ The story also had impact value in Jharkhand due to its socio-economic proximity with West Bengal. The story also got prominence in the state capitals and business hubs such as Bhopal and Indore in MP.

DBG also tapped into the socio-cultural-political differences of states. For instance, a reader in Gujarat was more interested in news that directly affected his business, whereas a reader in Haryana was interested in news that affected his community. Maoist activity was very important for readers in Chhattisgarh, but for the other states it was just another happening. However, if a policeman from Rajasthan cadre was abducted, then the interest in Rajasthan would become high. Sports coverage also varied across states depending upon the popularity of particular sport in the region – apart from cricket, states differed in their preferences for sports – Jharkhand was interested in archery and hockey, Rajasthan in polo and shooting, Punjab in hockey and Haryana in boxing. Editors had the pulse of the market and used their judgement for deciding the size and tonality of the news.

DBG leveraged the editorial to act as a catalyst for socio-economic change.¹² For instance, its editorial campaign for developing Indian cities under ‘Jawaharlal Nehru National Urban Renewal Mission’(JNNURM) led to recommendations which were adopted by the Planning Commission. Its relentless ‘save water’ campaign across markets for 8 years led to implementation of water harvesting schemes. Its editorial initiative for the project ‘livable cities’ under Ministry of Urban Development led to institutions voluntarily surrendering land for city development projects.

DBG believed in innovation. It constantly surprised readers with innovations such as first fragrance (Gulal) newspaper on the festival of Holi and the first 3-dimensional newspaper, which won its *Star News* brand excellence award for innovative marketing practices. It invented its own fonts – Bhaskar fonts which were more fine-tuned for greater legibility in newspaper printing. To provide new experiences to readers, DBG

¹¹ Narendra Modi was the chief minister of the state of Gujarat.

¹² It won CMO Asia award for best corporate social responsibility practice.

Dainik Bhaskar Group: Aspiring Growth

changed its layout often. On every Sunday, DBG had the editorial take over the complete first page! It reduced the size of the newspaper by 1.5 inches to make it easier for the readers to handle the paper while also saving the newsprint. Competition quickly followed as DBG had made it acceptable to readers. Rajawat said:

When you know that others will copy you, you have to constantly innovate. For encouraging people to innovate, we not only enjoy their success but also allow them to fail.

DB not only innovated structurally, but also treated the stories differently. It tried to evoke the feeling of ‘did you read *Bhaskar* today?’ among readers. For example, when other newspapers simply reported the news of Yuvraj Singh having cancer, it had a box explaining what cancer is, difference between malignant and non-malignant tumour and a photo of frontal body showing where his tumour existed. In some newspapers, reporters went to the event site and wrote the report after coming back to the office, losing emotional connect with the event and the story. In DBG, reporters carried a laptop and filed their report from the site itself. This not only ensured good quality reporting but the page formation also happened much earlier in the day (see **Exhibit 15** for the process of making the newspaper). To ensure that latest news got reported in its newspapers, DBG invested in technology like CTP (Computer to plate) and in the bigger centres installed high speed KBA machines from Germany which printed 80,000 copies per hour enabling it to take news until late in the night.¹³ For instance, DBG was the only newspaper to carry the story of Shahrukh Khan engaging in a fight after midnight in the stadium during one of the Indian Premier League matches in 2012. DBG not only focussed on speed, but also on high quality of printing which enabled it to win the newspaper printer of the year award by *Print Week*, a reputed magazine that catered to the needs of the printing industry, for three consecutive years. However, good quality printing and editorial content was not enough. DBG had to consistently ensure timely delivery of the paper. Vinay Maheshwari, V.P. Sales and Market Development said:

This is a fastest moving consumer good with a shelf life of 30 minutes. If it gets delayed by half an hour, it is of no value.

DISTRIBUTION

DBG set up a strong distribution channel of distributors, vendors and hawkers to ensure timely delivery of the paper. In bigger and strategically important markets such as Jaipur, Ahmedabad and Chandigarh, it supplied directly to vendors as it had the infrastructure and in smaller markets, it supplied to distributors who in turn supplied to vendors who hired hawkers. Typically, distributors were paid 5% commission and vendors 30%. Vendors in turn hired hawkers at ₹ 700–1000 per month.¹⁴ Commissions of the channel were protected – even if the newspaper sold at a lower price, it had to pay 80 paise (1 ₹ = 100 paise) per copy to the channel.¹⁵ If the paper had more pages, the hawkers would often ask for more money. They were paid extra for inserting leaflets and sometimes levied service charge for delivery in bigger cities. They were also incentivised by publishers for acquiring new readers.

DBG created a bond with the hawkers, as hawkers were the last mile of connectivity. DBG recognised them – it issued identity cards (which protected them from police questioning in the early morning hours), arranged for group insurance and scholarships for their children and printed a newsletter totally dedicated to this hawker–agent community. Maheshwari said:

¹³ DBG as a policy overinvested in capacity. To utilise the idle machinery during day time, it took printing contracts for magazines and supplements of other publication groups.

¹⁴ ABC mandated that only those copies where the commission was 40% or less were considered as ‘sold’ copies.

¹⁵ For instance, in Delhi, DBG had 70 centres.

Dainik Bhaskar Group: Aspiring Growth

We don't incentivise them much as even if they don't recommend our product, it is fine. Whereas traditional publishers use circulation to drive readership (distribute more copies, people would read sooner or later), we use readership to drive circulation (if your content is good, then people would want to read and circulation would automatically go up).

ADVERTISING AND SALES

Although DBG succeeded in securing high circulation and readership in new markets, it faced the challenge of earning commensurate advertising revenues. For instance, immediately after the launch, although its readership in Ahmedabad was higher than *Gujarat Samachar*, it earned only 75% of *Gujarat Samachar*'s advertising revenues. Advertisers initially wondered if DB group's readership was the result of marketing blitzkrieg at the time of launch which would dwindle. They questioned as to why readers would subscribe to two newspapers of the same genre or change their reading habits. They preferred to play safe and advertise in established newspapers. However, because of Divya Bhaskar's ability to expand newspaper reader base and get 'sole' readers (who read only Divya Bhaskar), it gained confidence of the advertisers (**Exhibit 16**). DBG obtained 83% of its revenues from advertising and 17% from subscription.¹⁶ Maheshwari said:

A single newspaper costs about ₹ 5-7 to print. The reader pays ₹ 3. Hence, on every paper, there is a loss of ₹ 2- 4 which is to be compensated by the advertiser. This is a business where the more I sell, the more I lose money! Moreover, the price of newspaper has not increased significantly in the last 10 years, whereas the cost of newsprint has increased dramatically.

DBG got 60% of its revenues from local advertisers (typically distributors, retailers and local service providers) and 40% from corporate advertisers. Whereas, local advertisers bought space frequently and in volumes and advertised in 1-2 cities, corporates advertised in urban markets and in multiple states.

Most corporate advertisers routed their buying through media agencies that aggregated space requirements across clients. DBG had a sales team that made presentations to the media agencies suggesting ways of using print media in general and DB newspapers in particular in their communication. Since most media planners were metro-based and read English papers – most did not know Marathi and Gujarati – DBG faced the challenge of making them experience the product. It gave them copies of the paper so that they could get a feel of the layout and print quality. Space selling in media was very competitive and intensely negotiated. Whereas, some publishers organised their sales team agency-wise or client-wise, DBG organised its sales team according to product category. It offered attractive rates to acquire not only new clients but also new categories – which had not been advertising in any print media.

The advertising expenditures were skewed towards metros posing a challenge for DBG as it was focussed on non-metro tier II cities. Although the tier II and tier III cities accounted for 60% of urban consumption, they garnered only 45% of urban advertising expenditure. Advertising rates too were higher in metros. However, the volume of advertising in non-metro cities was increasing in recent years as a result of faster growth of household income in non-metros. This was partly due to several government programmes such as JNNURM which aimed at modernising urban cities and creating special economic zones and the upward revisions in the pay scales of government employees by the two pay commissions which changed the economic status of many working class families. DBG first marketed the city to the advertisers demonstrating the potential to increase sales. Once advertisers were convinced about the potential of the city, DBG being the market leader was an automatic choice. It drew parallels – it compared top 6 metros with 8 states and demonstrated to advertisers

¹⁶ Indian newspaper model is Advertising dependent with more than 75-80% of revenue coming from advertising. But globally, some papers are subscription driven, where the revenue ratio are reversed.

Dainik Bhaskar Group: Aspiring Growth

how it provided higher reach at lesser cost. To attract advertisers, DBG focussed on urban markets and SEC AB – the socio-economic classes having higher purchasing power. For instance, in Rajasthan, DB had only 44% of its readers from rural markets, whereas RP had 53% of its readers from rural markets. Maheshwari said:

We don't have to just sell more; we also have to sell right. We identify the major cities and localities with higher household income and focus our efforts there. For instance, to build my readership in SEC A in Jaipur, I target localities such as Malviya Nagar which have a large percent of households belonging to SEC A.

Further, the English newspapers commanded premium over Hindi and other language papers in advertising rates. However, in the last few years, the difference in the rates was decreasing. Among non-English papers, DBG commanded premium ad rates due to its high reach and brand image (**Exhibit 17**).

To build its image, DBG conceptualised brand building programmes and activities. It signed M. S. Dhoni as its brand ambassador as he embodied the spirit of DBG as well as its readers.¹⁷ A campaign 'Be Persistent. Change the World' ('Zidd Karo Duniya Badlo' in Hindi) featuring Dhoni and reflecting the spirit of *Bhaskar* and its readers was aired on television and print media.

Apart from mass media campaign, DBG conducted many on-ground activities for building its brand and strengthening relationship with readers. These activities rested on two pillars – engagement and corporate social responsibility (CSR). For instance, DBG organised a competition 'Junior editor,' recognised by Guinness world record as the world's largest manual newspaper competition, in which students manually prepared their own newspaper – produced news, drew caricatures, created advertisements – to compete for the awards for best advertisement, best editorial and best layout. Select entries were put up in exhibitions across states and the event was widely covered in the newspaper. To encourage the readers to experience the whole newspaper, in another contest, two visuals of coins – real and fake were sprinkled throughout the newspaper and readers had to count the number of real coins and send it by SMS.

Its CSR campaigns challenged traditional practices and brought positive change. For instance, in Maharashtra on Ganesh Utsav, it collected offerings (flowers and sweets) from temples and households and buried them in soil – as against the traditional practice of disposing them in water bodies – thus saving the environment. Its campaign 'dry Holi' encouraged people to play with natural colours – *abeer gulal* – and shun synthetic colours thus minimising the use of water. As part of its 'save bird' campaign, it distributed pots to households and encouraged them to keep water and grains in them to feed the birds in peak summers when many of them die due to scarcity of water (**Exhibit 18**).

LAUNCH IN MAHARASHTRA

The quest for growth led DBG to launch its newspaper in Maharashtra in 2011. The choice was guided by two criteria. Firstly, the high GDP growth rate of 14.5% and high per capita income of ₹ 80,000 per annum, indicating potential to attract advertisers. Secondly, the huge gap between people who could read Marathi (88%) and those who read any Marathi daily (44%), indicating the potential to attract new readers. Nishit Jain, Business Head, Maharashtra said:

¹⁷ M.S. Dhoni was a popular and well acclaimed cricketer and captain of the Indian cricket team.

Dainik Bhaskar Group: Aspiring Growth

On one hand, the state attracted high advertising spends of ₹ 8 billion per year which was growing at the rate of 20% per annum and on the other hand, the total circulation of Marathi newspapers was just 3 million against the much larger number of literates making it attractive to enter the market.

Maharashtra was actually two states in one – 1) Mumbai, Pune and 2) rest-of-Maharashtra (ROM). The market potential of ROM was even higher than that of the entire state of Andhra Pradesh. In line with its strategy of being a non-metro tier II cities player, DBG decided to focus on ROM with a particular focus on Marathwada and Desh socio-cultural regions (**Exhibit 19**) which were culturally rich and economically prosperous. Aurangabad was chosen for launch in Maharashtra even though Nasik had higher population because of the greater potential of Aurangabad to attract advertising revenues.

Since 88% people spoke Marathi and Marathi newspapers accounted for 83% market share, Marathi was the natural choice of language for DBG. *Lokmat*, the fifth largest Indian daily, was the market leader with 53% circulation share followed by *Sakal* with 30% share. DBG followed its proven twin-contact strategy for launch. DBG surveyed 1.4 lakh households reaching out to 75% of the total households in Aurangabad. Survey revealed the readers dissatisfaction with biased news and unanimous preference for an unbiased paper. Readers considered existing newspapers to be politically biased – both *Lokmat* as well as *Sakal* had political lineage wherein the founders held prominent positions in national and state politics.¹⁸ It was perceived that *Lokmat* was aligned to Congress party and *Sakal* to National Congress Party. Kumar Ketkar, Chief Editor, *Divya Marathi* said:

Marathwada has a rich political history. It was formerly ruled by Nizam. Aurangabad had a newspaper ‘*Marathwada*’ which was anti-Nizam and a movement by itself. It had a strong cultural and emotional connect with people of Aurangabad. Then *Lokmat* came and it slowly expanded into other regions of Marathwada and became a dominant player. Readers had to opt for *Lokmat* as there was no other paper – *Sakal* came much later. But, the attitude towards it was hostile. When *Divya Marathi* was launched, people felt liberated. A paper without political affiliation was a welcome relief!

DBG aggressively targeted four segments – mass, corporate, SEC A (English newspaper households) and high visibility areas (airports, railway stations, bus stands, hospitals, malls, restaurants, shopping centres, etc.). Although DBG’s readers spanned across age groups, income and SEC, a typical reader of DBG was 30 years old who started his day with either morning walk or regular exercises. He was self-employed individual or working in a private/government office, had a wife and two kids and lived in a joint family in a self-owned two-bedroom flat. He was proud to be associated with DB, read it for 30-40 minutes and left for work by 9:30-10:00 a.m. on his vehicle. He was traditional and festivals/religions were an important part of his life. He visited temple, relatives and went out for movies with his family.

The annual subscription of *Divya Marathi* (Aurangabad) was sold for ₹ 1,095 (cover price of ₹ 3) against ₹ 1,278 of *Lokmat*. DBG gave a pre-launch offer of ₹ 799 for annual subscription out of which ₹ 199 had to be paid at the time of booking and ₹ 45 had to be paid to the vendor every month. It also distributed coupons worth

¹⁸ *Lokmat*’s Chairman Vijay Darda was the Member of Parliament from Rajya Sabha since 1998 and his brother Rajendra Darda was the minister for education in the Maharashtra State government.

Dainik Bhaskar Group: Aspiring Growth

₹ 500 to the consumers which they could use for giving classified ad anytime within a year.¹⁹

The launch was a resounding success with *Divya Marathi* becoming No. 1 on the first day itself.²⁰ Moreover in the next six months after the launch of *Divya Marathi*, the average circulation of *Lokmat* declined from 73,158 copies to 59,548 copies and that of *Sakal* from 55,972 copies to 40,370 copies.²¹ (**Exhibit 20**). *Divya Marathi* also earned attractive advertising revenues. With capital expenditure of ₹ 130 million and one-time operating expenses of ₹ 55 million, DBG projected to break even in 4 years. The successful launch of *Divya Marathi* in Aurangabad was followed by launches in other cities – Nasik, Jalgaon, Ahmednagar and Solapur.

Not only did DBG successfully enter new markets, it also warded off threat from competition in its home turf. For instance, when RP entered Bhopal, DBG introduced a lower priced variant without any supplements – *Jan Jagruti*, also called *Green Bhaskar*. Its flagship brand – *Red Bhaskar* had all the supplements free and was priced higher (the two variants had green and red lines, respectively under the mastheads). *Patrika* (*Rajasthan Patrika* was branded as *Patrika* in markets other than Rajasthan) on its entry had to fight *Green Bhaskar*. Later, *Green Bhaskar* was phased out. Another threat was posed by *Dainik Jagran* (DJ) when it entered Indore. However, due to loyalty of readers towards *Dainik Bhaskar*, DJ could not make much headway and eventually closed operations. The fierce competitiveness of the DB group stemmed from its vision of being the dominant player in each of the markets it operated in. Pawan Agarwal said:

We want to not only maintain our readership, but also widen our lead over competition. Our goals are very clear – if we are in a 4-player market, we have to be ahead of our nearest rival by 25%; in a 3-player market by 30% and in a 2-player market by 40%. We also have the responsibility to grow the market as the penetration levels of print media are very low. Although 71% of India's population is literate, only 20.1% read newspapers daily, leaving a huge potential for readership growth in future. We can do this by consolidating our existing markets as well as by expanding into new territories.

¹⁹ The subscription offer varies from market to market. In Maharashtra, the classified advertisement coupons were a success. However, these have not been used in any other launches by DBG.

²⁰ According to the IMRB Survey (Aurangabad) initiated by DBCL *Divya Marathi* had the highest number of readers: 3.42 lakh and hence was the leader.

²¹ As per Audit Bureau of circulation (ABC) *Lokmat* had an average circulation of 73,158 copies in Aurangabad city during January-June 2011 but after the launch of *Divya Marathi* on 29th May, 2011, the average circulation for *Lokmat* for the period July-December 2011 dropped to 59,548 copies. Similarly, the average circulation of *Sakal* dropped from 55,972 copies in January-June 2011 to 40,370 copies during July-December 2011.

DNA is the English newspaper, *DB Star* is a tabloid and *Prabhat Kiran* is the afternoon newspaper in MP. Average Issue Readership (AIR) is the number of people who have read the publication within its publication interval. For instance, for a daily, AIR is the number of people who have read the newspaper yesterday. Indian Readership Survey (IRS) is the largest continuous study of the world with a sample size of more than 250,000 households across India. It collects readership information of print media, viewing habits of television and channels, listening habits of radio and usage of internet. It also collects information on consumption of over 100 product categories. It is conducted by Market Research Users Council (MRUC), a not-for-profit industry body and Hansa Research, a private market research company.

Tier I/Metro: Population > 4 Mn; Tier II: 1 Mn < Population < 4 Mn; Tier III: Population < 1 Mn.

Socio-economic classification was a tool for segmenting households in India. Originally developed by IMRB, it was standardised and adopted by the Market Research Society of India to categorise consumer behaviour. The urban SEC classified households in to 5 groups A, B, C, D, and E on the basis of education and occupation. SEC A had the highest purchasing power. The rural SEC classified households into 4 groups R1, R2, R3 and R4 on the basis of education and type of house (mud, brick and mix). SEC R1 had the highest purchasing power.

Market potential value (MPV) was a measure of aggregate potential of the market by R K Swamy BBDO which helped marketers to prioritise markets. It combined various indicators of prosperity across two groups – ability to buy and willingness to buy through indices such as per capita income, house ownership, consumption of FMCG products, ownership of durables and media reach to indicate market potential.
