

Electricity Pricing Choice

If you're a residential or small commercial customer that pays Time-of-Use (TOU) electricity prices, you can choose to switch to Tiered prices.

TOU Pricing

The price depends on when you use electricity. You can help manage your electricity costs by shifting your usage to lower price periods when possible.

Tiered Pricing

With Tiered pricing, you can use a certain amount of electricity at a lower price. Once you exceed that limit; a higher price applies.

Considering a Switch?

Customer Choice

If you don't want to switch to Tiered prices, you don't need to do anything. You will automatically stay on TOU prices.

If you do switch to Tiered prices and you change your mind, you can switch back to TOU at any time by submitting a new request.

Ontario Electricity Rebate (OER)

The OER will be reducing to 21.2% effective January 1st, 2021. The Government's intention is that, for residential and small business customers, the reduction in the electricity price will be offset by the change in the OER.

The OER is a total pre-tax credit that appears at the bottom of electricity bills. As a result of lower RPP prices and the reduced OER, typical residential customer bills will be held stable.
