

Electricity Pricing Choice

If you're a residential or small commercial customer that pays Time-of-Use (TOU) electricity prices, you can choose to switch to Tiered prices.

These prices affect the 'Electricity Charges' section of your bill.

TOU Pricing

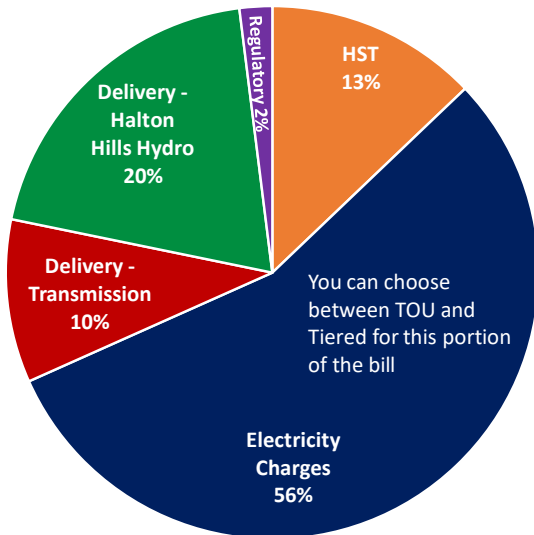

TOU Pricing depends on when you use electricity. You can help manage your electricity costs by shifting your usage to lower price periods when possible.

Tiered Pricing

Tiered Pricing allows you to use a certain amount of electricity at a lower price. Once you exceed that limit; a higher price applies.

Considering a switch? Visit haltonhillshydro.com/electricity-pricing/ for tools and information to help you decide.

How your bill is calculated

All of our rates charges are prorated daily and based on a 30-day calendar month.

This means that if your bill is for a longer or shorter period, you may see a different amount than is shown above. If you pay Tiered prices, this will also affect the amount of electricity at Tier 1. All charges are based on actual metered electricity used.

Sample calculation:

Based on a 30-day month, the Winter threshold for Tier 1 is 33.3 kWh per day, whereas the summer threshold for Tier 1 is 20 kWh per day. If you use more electricity per day than the threshold amount, those amounts will be billed at Tier 2.
