OTHER WAYS TO SAVE ON YOUR ENERGY BILL!

Set your thermostat to 20°C when home during the winter and 25°C when home during the summer

Prevent wasting water, electricity and money by checking for water leaks in your water heater and home regularly

Turn the 'heated dry' setting on your dishwasher off and let the dishes air dry

Wait until off-peak hours to do your laundry or run your dishwasher

Hang dry your clothes after washing them. Your clothes will last longer and you will use less energy!

Turn your lights off when not in use

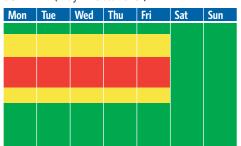

Time-of-Use Electricity Rates

Off-peak

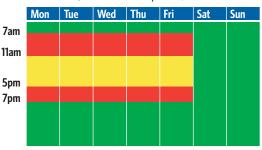

Mid-peak

On-peak

SUMMER (May 1 - October 31)

WINTER (November 1 - April 30)

The Home Assistance Program helps you save energy with the following products!

PRODUCTS	BENEFITS
LED bulbs	Last 25 times longer than incandescent light bulbs
Power bar with timer	Save up to 10% on monthly electricity use by reducing phantom power
Drying rack	Can reduce the need for using a conventional dryer
Hot water tank pipe wrap	Helps reduce heat loss and brings hot water to the faucet and shower faster
Efficient showerheads and aerators	Lowers water heating costs by using and wasting less hot water
ENERGY STAR® refrigerators, freezers and air conditioners	10% more efficient than current standard models
ENERGY STAR® dehumidifier	10% to 23% more efficient than current standard models
Basement and attic insulation	Over 20% of a home's heat can be lost through the basement and attic. Insulation can significantly reduce heat loss and yield high savings

Note: Availability of products depends on the findings from the energy audit.
