

PRESS RELEASE: SoftRail suite chosen also by Ouigo Espana

The spanish SNCF subsidiary, the high-speed rail operator that manages passenger services between Madrid and Barcelona, has adopted the Binary System SoftRail's suite, the last generation software suite platform conceived to manage and organize people, rolling stock and operational activities of rail companies with one single tool.

After a dedicated selection process between main European providers held in late summer 2019, Ouigo Espana and Binary System started the implementation project to run 4 software modules dedicated to the railway undertaking management activities, in particular:

- . **LogiShift:** an advanced system for a coordinated planning of employees and company's vehicles fleets;
- . **MainTrack:** the system to plan and monitor the activities of preventive and corrective maintenance in electronic format;
- . **RailMobile:** the electronic folder for the train driver to collect, organize and distribute in real time all the employees documentation;
- . **SkillPlan:** professional tool to plan, monitor and manage all the activities of training, refreshing and employees auditing.

The goliving announcement came from the project responsible Giacomo Mantovani, Chief Operating Officer of Binary System, who has strongly focused himself and his collaborators on the importance of Ouigo project success's result to increase Binary's internationalization process and experience in the public transportation market. "*The investment made to adapt our software to more and more different railway companies has led to the desired results*" stated Mr. Mantovani, who added also: "*We are extremely pleased to have made our entry into the Spanish market, obtaining not only the full confidence of the customer, but also the concrete interest of other European Railway Undertakings.*"

"The good teams relationship created during the build phase and the trust developed between the project referents have permitted to raising the four softwares goliving in less than a year" has confirmed Sergio Barcena, Planning and Maintenance Director *"Since May 2021, Ouigo Espana is successfully running its services with the support of SoftRail suite and Binary System's team; we are looking forward to a long lasting and fruitful partnership with"*.

The trial phase has showed the particular flexibility and versatility of the suite, which hasn't required any renounce to safety and reliable features in order to be adapted it to the Spain infrastructure and to the customer's organization.

The extremely positive result of the project demonstrates the pursuit of the Binary System strategic goal: to become more and more an experienced reference supplier in the daily support to the activities of Railway Undertaking in Europe and worldwide

Piacenza, 28th January 2022

Binary System S.r.l. is the leading Italian company in the development of software solutions for the management of rail activities.
