Position: Software Engineer

Period & Start date: Full time - ASAP

Salary: Competitive + Stock options

History

Treeapp (thetreeapp.org) was founded because our team realised the devastated state of the world's environment. Treeapp enables anyone to have an impact, just by doing a simple action on their phone every day. We chose trees, because deforestation is a pressing issue that needs to be addressed.

About Treeapp

Our vision is to let anyone come on our platform and start living a sustainable lifestyle by discovering / purchasing sustainable products and creating real impact by planting trees online / offline. Treeapp has been growing rapidly and has gained 65,000+ users and 200+ business partners, including L'Occitane en Provence.

The role

This role focuses on helping build the tech that powers our app and marketplace. You will work closely with the product team and engineering team to solve engineering challenges. We are constantly building new systems and evolving/scaling our current ones. Some of the technologies we use include Java, Go, Postgres and GCP.

What we look for:

- 2+ years of experience in software engineering
- Strong expertise in a backend language, such as but not limited to Java and Go
- Strong problem solving and system design skills
- Passion for our goal and strong desire to be part of the mission

What we'd love to see:

- Experience with distributed systems and microservices
- Experience in a scale-up organisation
- Experience with internationalization
- Experience with ecommerce technologies

What you'll get:

- Work with the co-founders, serial entrepreneurs who founded businesses valued £30mln+
- Monthly drinks on the founders (when quarantine is over!)
- Have your own personal impact on positively contributing to restoring the world forests
- Competitive salary and options to get equity in Treeapp
- Occasional Treeapp merchandise
- Pension Scheme
- 28 days off & day off on your birthday
