

# CARBIDE

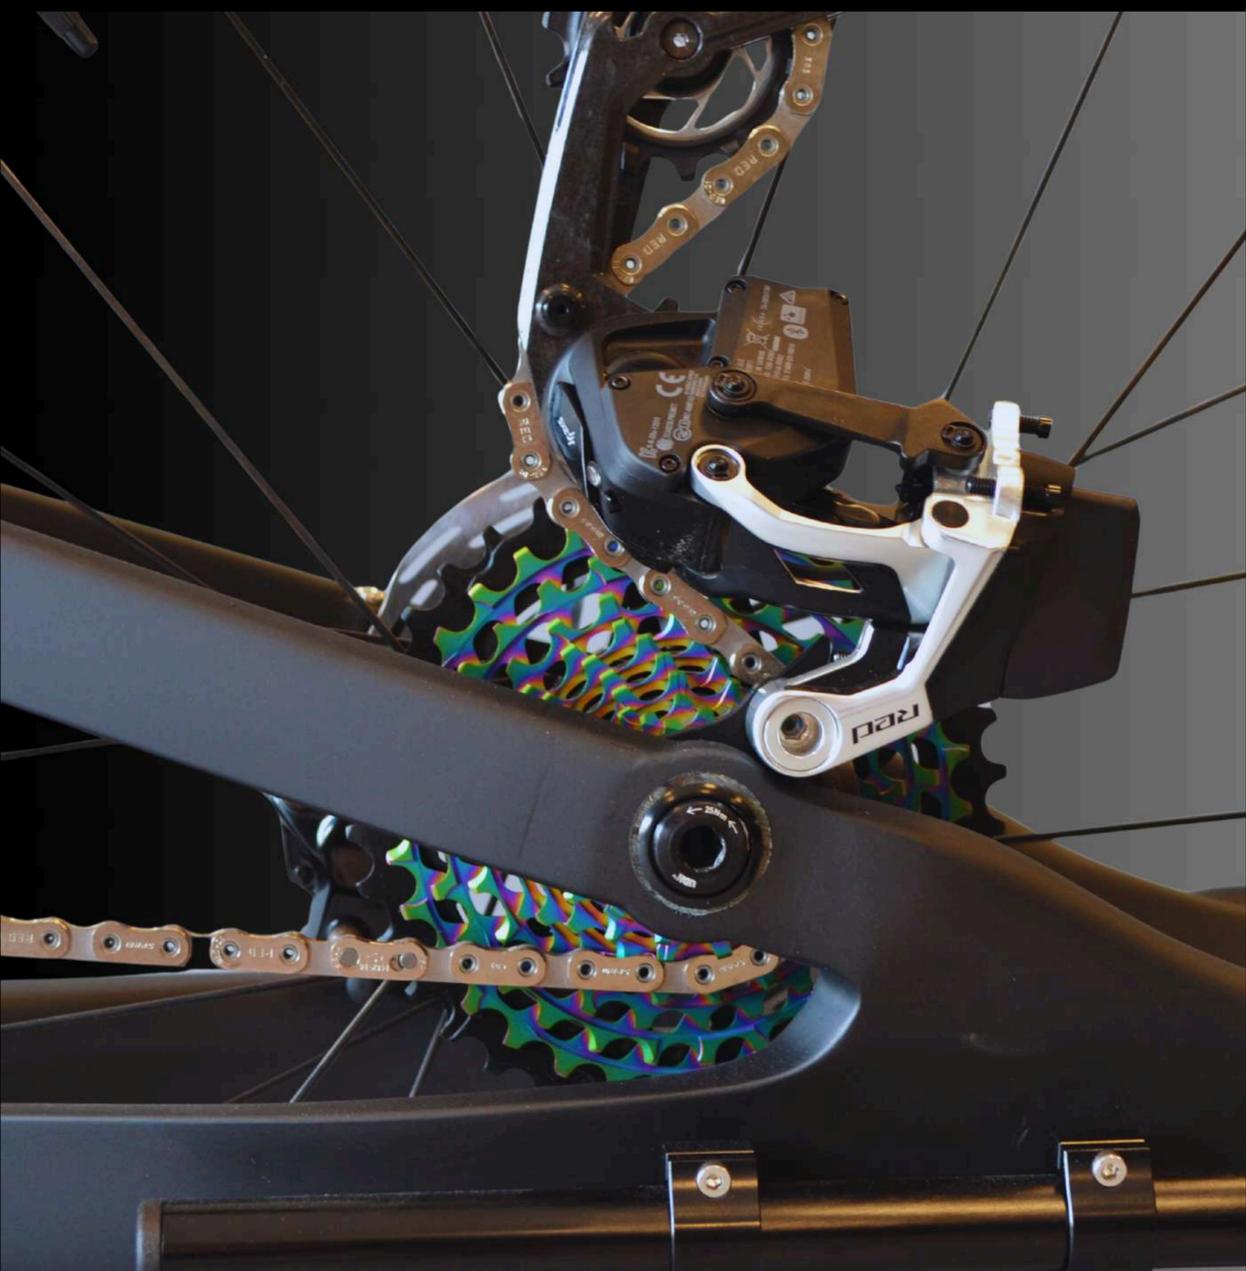

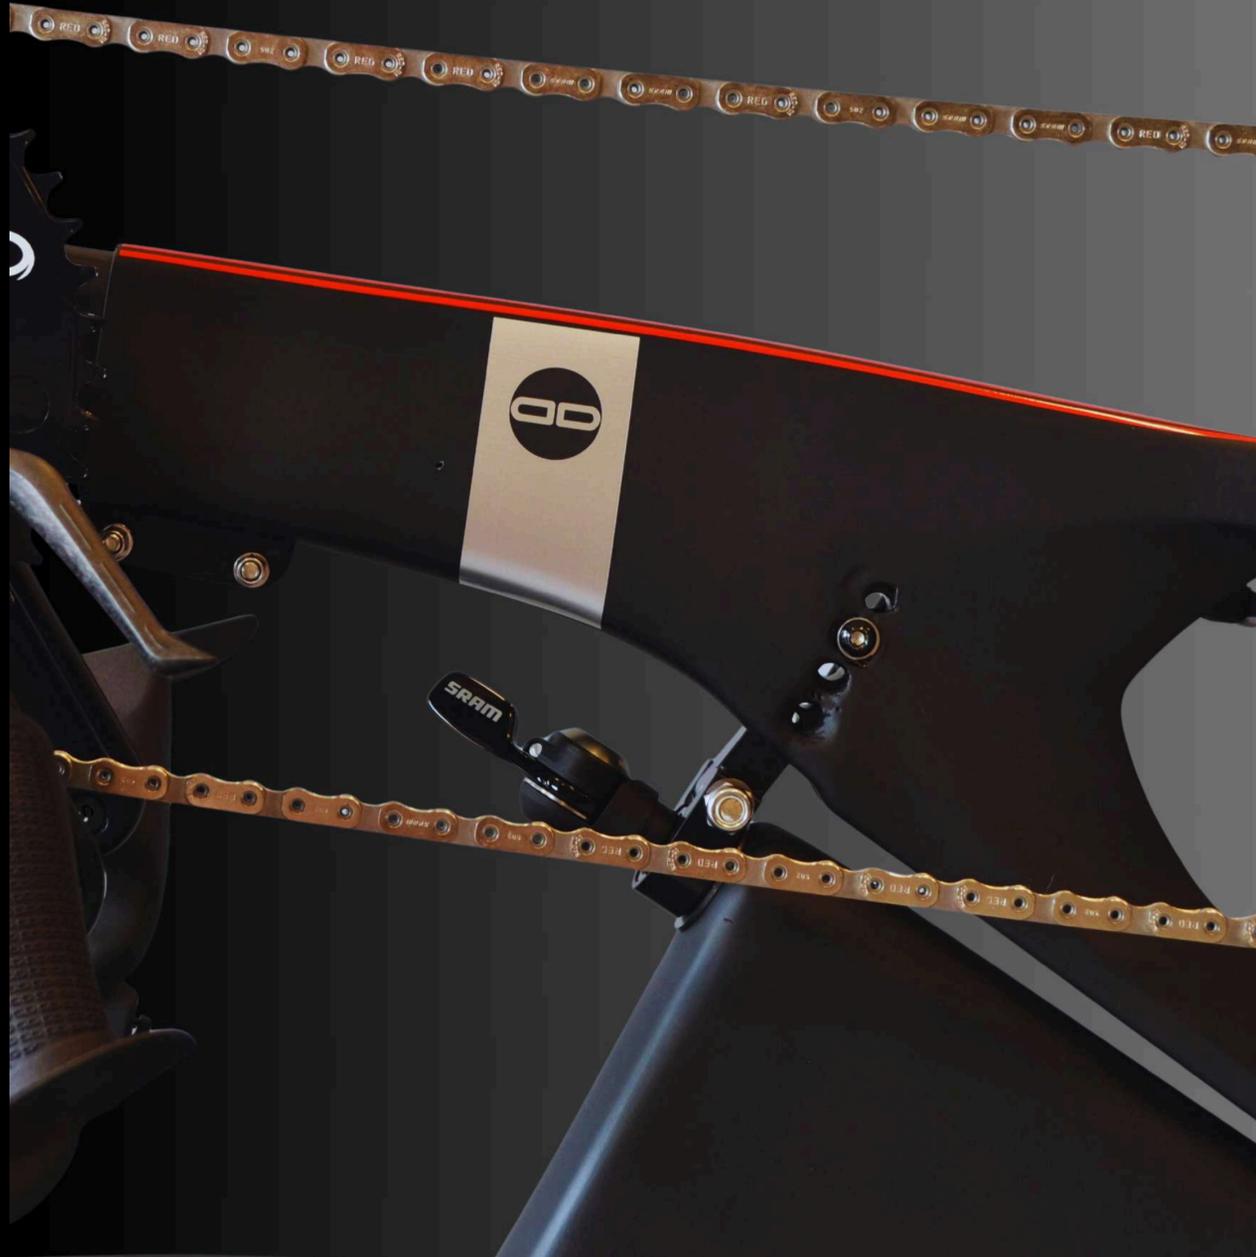

MAODILINE  
HANDBIKES

**ENGINEERED FOR *SPEED.***  
**RIDDEN TO *WIN.***

# TECHNOLOGY THAT ANTICIPATES TOMORROW

A world-first adjustment system that allows precise customization of both the height and reach of the fork.

A fork that combines advanced engineering and sporting vision for those who aim to lead, not follow.

# ENGINEERING AT THE HIGHEST LEVEL

Engineering precision and flawless finishes in a thru-axle system delivering unmatched stiffness and security.

Compatible with direct mount derailleurs via hangerless interface or UDH derailleurs.

## EFFORTLESS CONTROL RACE SPEED

Crafted with 3D printing technology, the handgrips are shaped for perfect ergonomics and natural control.

Custom mounts place the shifters exactly where your fingers expect them, making every shift quick, seamless, and effortless at race speed.

## BUILT TO RESPOND IN A BLINK

Mounted directly onto the handgrip, the carbon brake lever offers immediate response with minimal hand movement. Lightweight and ultra-precise, it delivers confident braking without disrupting your rhythm.

Control that moves as fast as you do.

\*For tetraplegic athletes, options including elbow shifting and braking adaptations are available.

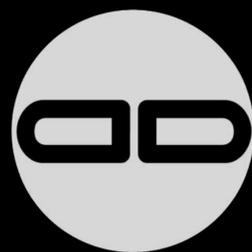

## STOP FAST. STAY SHARP.

The high-performance disc brake delivers precise stopping power without sacrificing speed, giving you the confidence to push limits while staying firmly in control.

## MAXIMUM EFFICIENCY

Cutting-edge aerodynamics combined with lightness and stiffness to push beyond limits on the road and deliver peak performance.
