

RACEX

MAODILINE
HANDBIKES

**MADE FOR MOTION.
BUILT FOR *EVERYDAY*.**

A RIDE TAILORED FOR YOU

The adjustable fork allows precise customization of both height and length, enabling you to tailor the riding position to your individual needs.

CLEAN LINES STRONG FROM

A clean frame design with a single bent tube. Sleek, strong and made to impress.

PRECISION CRAFTED

The rear part of the frame is fixed, offering a solid and reliable base during use.

ERGONOMIC HOLD, LASTING COMFORT

The ergonomic backrest offers firm stability and comfortable hold, keeping you secure and balanced throughout every ride. Designed to support your posture naturally, it helps you enjoy longer journeys with confidence and ease.

RESPONSIVE BRAKING READY TO GO

The front brake lever is conveniently positioned on the right handgrip, right next to the gear shifter. This intuitive placement allows for quick, easy access.

**For tetraplegic users, options such as a mechanical disc brake reverse system or elbow-operated controls are available.*

POWERFUL HYDRAULIC CONTROL

The front braking system is equipped with a 220 mm hydraulic disc that ensures effective stopping power and consistent safety. It delivers smooth and reliable performance, allowing you to maintain control and confidence on every ride.

SAFETY YOU CAN RELY ON

Additional to the front brake, the Tektro rear braking system lets you brake smoothly while riding and easily engage a secure parking brake when stopped. The rear brake lever is conveniently located on the left handgrip or, for tetraplegic users, mounted on the backrest to allow braking with the elbow for greater ease and comfort. Designed for safety and peace of mind.

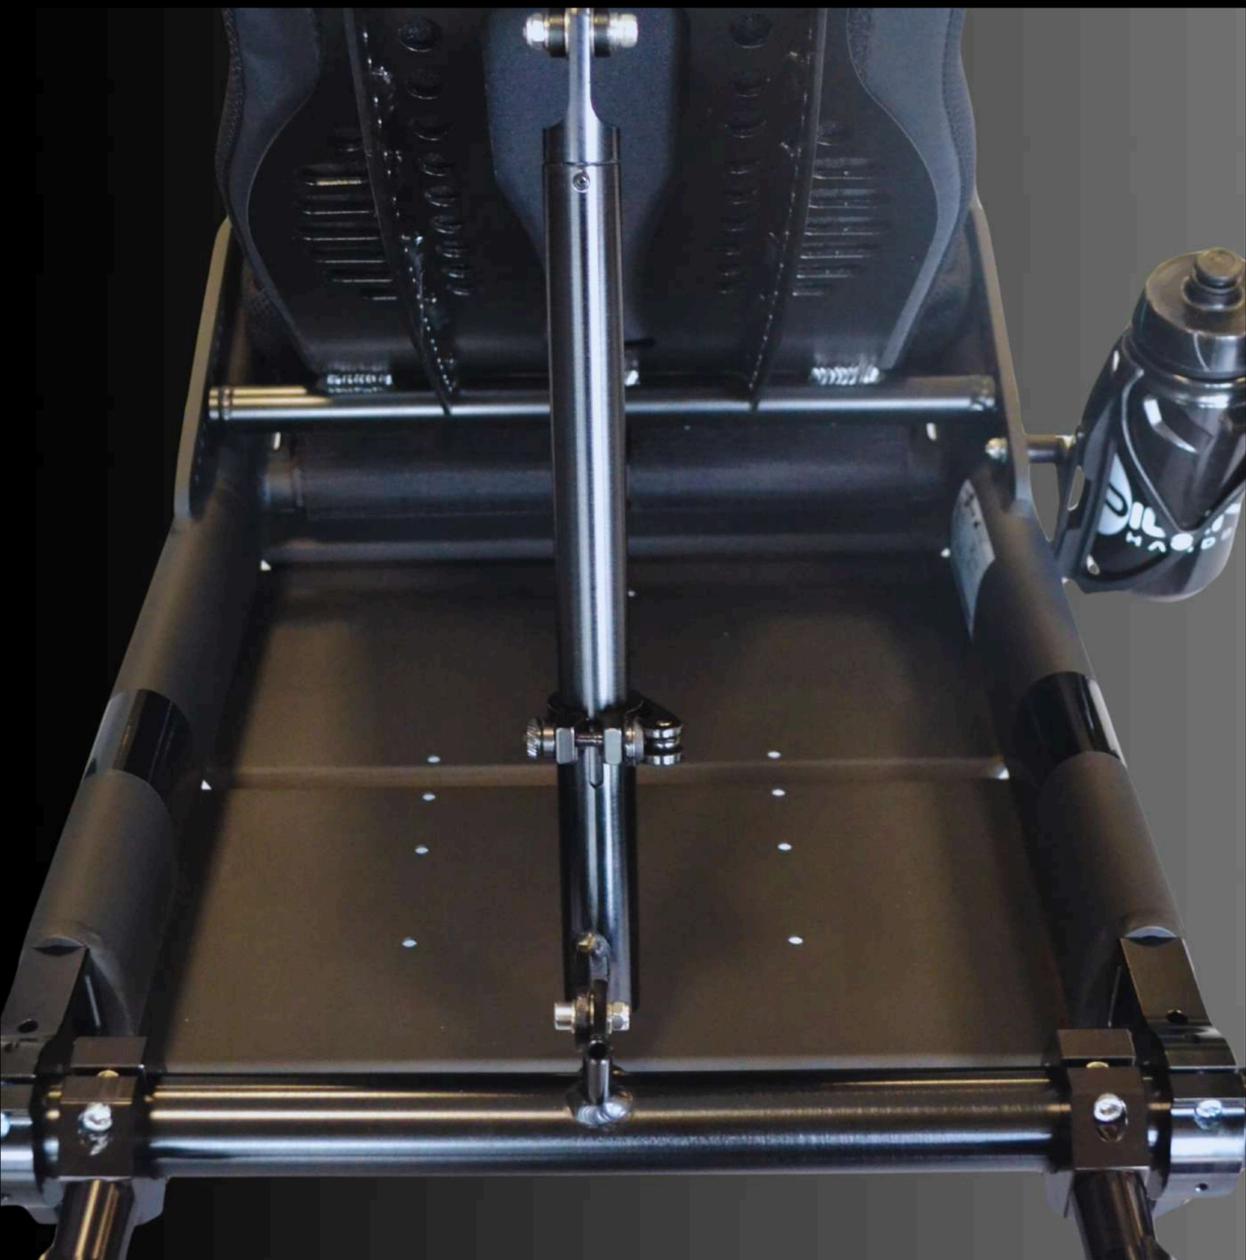

BRAKES YOU CAN TRUST

Equipped with two rear hydraulic disc brakes, this system provides precise and powerful stopping performance. Smooth and reliable, it ensures consistent braking control for safer rides, no matter the terrain.

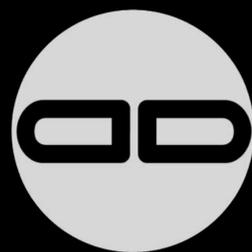

RIM BRAKE OPTION

The parking brake lever is connected to a V-brake cleverly integrated into the fork. A discreet and elegant solution that keeps the look clean without compromising functionality.

READY FOR THE UNPREDICTABLE

The future is unpredictable. That's why the frame is already prepared for the potential installation of additional components. Thanks to this solution, the model can be converted into an RXE version with electric assistance.
