

OIX Document Development Process Listserv

The OIX Document Development Process (OIX DDP) is the process by which current Standards and best current operational practices (BCOPs) for the operation of the Internet, and connected networks, are documented by the Global Network Engineering Community (GNEC). These OIX documents are developed and published in an open, transparent, bottom-up, and ongoing manner designed to yield functional documentation that is accessible to all. To support this, OIX maintains an OIX DDP mailing list for public discussions of proposed documents and/or changes to published documents.

The list address is:

oix-ddp@mailman.swcp.com

If you're familiar with mailman, the various associated addresses are all there too. Most notably:

oix-ddp-subscribe@mailman.swcp.com

oix-ddp-unsubscribe@mailman.swcp.com

To make the list name easier to remember, we have email alias:

oix-ddp@oix.org -> oix-ddp@mailman.swcp.com

The web page for users of the OIX DDP mailing list is:

<https://mailman.swcp.com/cgi-bin/mailman/listinfo/oix-ddp>
