NORTH CENTRAL WASHINGTON RECOVERY NAVIGATOR PROGRAM OVERVIEW

Investing in our community decreases stigma and saves lives. Come see us at upcoming community events throughout North Central Washington.

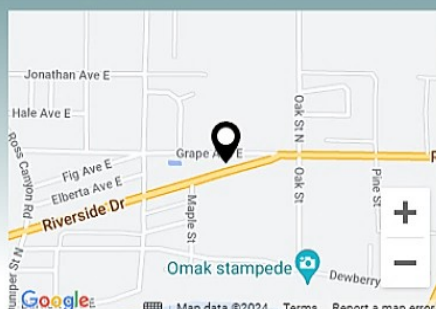

In collaboration with Family Health Center Opioid Treatment Network, we offer overdose prevention education, free overdose reversal medication and the training to administer it.

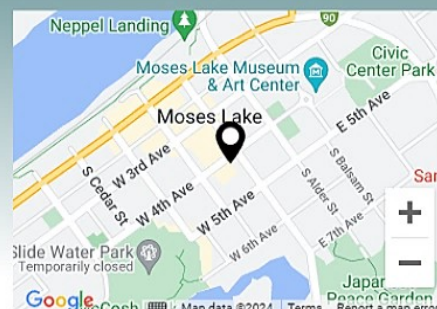

We were joined by Tom Dent, State Representative for the 13th District at Grant County's Overdose Awareness event. Tom shared his passion for supporting individuals and saving lives impacted by substance use with our Grant County RNP Team and Grant County Public Health.

Check out the Gazette Tribune... [Okanogan County Recovery Navigator Program](https://www.gazette-tribune.com/news/everyone-knows-someone-who-is-suffering/85881/) made the front page. If you or someone you know is suffering from a substance use disorder, we have some amazing Recovery Outreach Specialists to walk side by side with you and help find a different way of life. We are resource brokers who help fill in the gaps and provide transportation, emergency needs, help you navigate treatment facilities, assist with accessing local recovery programs, help find stable housing, employment and focus on whole person health and wellness.
