

Standardized Test Prep

ACT CLASS SIGN UP

There are small "tricks" to speed up your progress on standardized tests, but I am also a huge proponent of old fashioned repetition. The math portion is not extremely difficult in terms of pure mathematics. The difficult part is in understanding the questions. The writers of these exams purposefully make the questions confusing and attempt to overwhelm the test taker. The more practice test the student takes.....the more comfortable they will get in seeing these type of problems. My class and individual sessions will work with students on how to break down individual problems so they aren't so daunting.

Please contact me to save a spot in a class or for any possible individual sessions!!

The majority of my tutoring for standardized tests has been for the ACT and SAT math portions. I have also helped students out with the science portion of the ACT exam. I also offer help in any standardized tests that involve math, logic, and problem solving. The approach for standardized tests is completely different than a typical high school or college exam. The big difference is that the answers are right in front of you! I will go through sample problems with students to show how they should approach specific problems on their standardized test.

The majority of my ACT math tutoring will be done through group classes. These will occur at the Central Resource Library on at least a monthly basis throughout the year. This is the most economical situation for students and families on a budget. I also really like the group form because it allows students to learn from each other. I also will go over different practice tests and problems at each class, so taking multiple classes will be very helpful!!

I will also try and meet as many students as I can for individual sessions. I will not be able to be as flexible with meeting for individual ACT/SAT sessions because my calendar fills up very quickly from my normal tutoring duties. If you are flexible with your schedule, then I will most likely be able to find time to help!
