

YOUR FIRST VISIT

At BritChiro we aim to **take away your pain** by restoring your spinal function. More than **30 BritChiro team members** are dedicated to help **keep your spine well**, thereby increasing the likelihood of the **pain not coming back**.

Your first Chiropractic consultation will be a very comprehensive and **unique health assessment**, which in many ways is as significant in relation to your overall health as conventional medical examinations but with the crucial difference that we are looking at completely different parameters. All of our clinics have **In-clinic X-ray departments**, so should you require X-rays they can usually be taken straight away.

If you don't go to a dentist, you won't be able to detect, treat and prevent cavities. Similarly, our Doctors of Chiropractic are trained to detect, correct and help prevent problems in your spine and other joints.

Chiropractic aims to treat the cause of the problem, not just the symptoms!
