David A. Pope, CPA CGMA

WELCOME to my news and blog site. I am a CPA that provides creative solutions to complex business and tax problems experienced by organizations throughout the United States. Through my CPA firms in Wyoming and Colorado, as well as my other affiliates, I help to structure businesses that balance tax, financial and asset protection strategies. So whether you are a new start-up business trying to decide the best structure and operational methodology, or an existing business that would like to move from "surviving" to "thriving", I can help you make it happen.
