Buying a home is most likely the largest purchase you will ever make! It is important to get the most detailed information about the condition of the investment so you can make a worry free, confident, educated decision. When you hire me, you're hiring a certified, Insured, professional inspector with over 9 years inspection experience.

Current technology allows the inspection to be completed in virtually real time. An average inspection will take about

three hours to complete with a detailed report outlining the condition of your investment emailed to you in PDF format usually that same day. I am available after the inspection to go over the report with the buyer and agent to answer any questions you might have.
