WELCOME TO YSJ SEEDS

**We are specialist growers and producers of
british native wildflower meadow seed and british native wildflower bulbs.**

YSJ Seeds wildflower meadow seed mixtures will help our declining bumblebee and butterfly population along with other important wildlife that will benefit from newly created gardens, meadows and existing places.
Our native wildflower bulbs play an important role to for supporting the first emerging bees, and butterflies.
Let's all do our bit for nature to create wonderful places for our wildlife to visit.
