Hard track

Explore this spectacular limestone gorge and Cooleman Cave within Kosciuszko National Park. As you walk along the usually dry Cave Creek, keep your eye out for ancient fossilised shells of brachiopods. The walk is closed during winter and only open between the October and June long weekends. The walk can flood so always check the weather forecast. Bring a torch to help you explore the entrance to the cave. Let us begin by acknowledging the Wiradjuri people, Traditional Custodians of the land on which we travel today, and pay our respects to their Elders past and present.
