PRODUCT COMPOSITION

WINTER WRUP-CYCLING

Winter Wrup-Cycling revives recycled materials into high-quality coverings. The recycling of plastic wastes into a new long-lasting product is an enormous contribution to help to reduce energy and disposal of highly continuous waste to landfill and marine world.

For the production of Chamel® Recycled Prestige, we collect and reuse plastic bottles into a high-quality imitation suede leather. This way, we create a new sustainable suede adapted for long lasting and highquality applications.

WASTE EQUIVALENT

The use of PET plastic bottles waste is an effective way to reduce the environmental impact.

The recycling process produces a new product, Chamel® Recycled Prestige, true to the characteristics of fine imitation suede leather. At the same time we save a significant amount of waste that would otherwise have gone to landfill and sea.
