TESTS

Lightfastness: ISO 105-B02 = 4-5
Colourfastness: ISO 105-X12 = Dry 5 / Wet 5
Tensile strength: ISO 13934-1 = MD 442 N / CD 232 N
Elongation: ISO 13934-1 = MD 50 / CD 40
Tearing resistance: ISO 13937-2 = MD 12.4 N
Hydrolysis test: ISO 1419/Jungle Test equivalent of over 15 years
Martindale: ISO 12945-2 = 51'200 cycles / 1 (very slight modification of brightness)
The materials are tested periodically, deviations from the specified values are possible within the industrial tolerances.

PRODUCT COMPOSITION

WINTER WRUP-CYCLING

Winter Wrup-Cycling revives recycled materials into high-quality coverings. The recycling of plastic wastes into a new long-lasting product is an enormous contribution to help to reduce energy and disposal of highly conterminous waste to landfill and marine world.

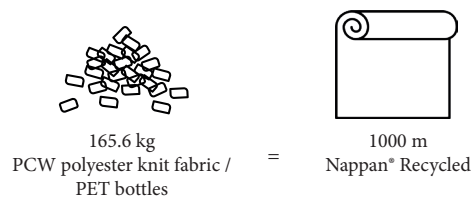

For the production of Nappan® Recycled, we collect and reuse plastic bottles into a highquality nappa leather imitation. This way, we create a new sustainable material adaptedfor long lasting and high-quality applications.

WASTE EQUIVALENT

The use of PET plastic bottles waste is an effective way to reduce the environmental impact.

The recycling process produces a new product, Nappan® Recycled, true to the characteristics of fine imitation nappa leather. At the same time we save a significant amount of waste that would otherwise have gone to landfill and sea.
