## ENVIRONMENTAL DATASHEET

### PRODUCT COMPOSITION

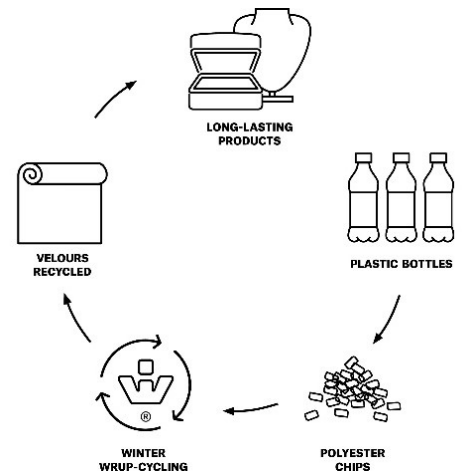

### WINTER WRUP-CYCLING

WINTER WRUP-Cycling revives recycled materials into high-quality coverings.

The recycling of plastic wastes into a new long-lasting product is an enormous contribution to help to reduce energy and disposal of highly conterminous waste to landfill and marine world.

For the production of VELOURS RECYCLED, we collect and reuse plastic bottles into a high-quality velvet with a soft touch. This way, we create a new sustainable material adapted for long lasting and high-quality applications.

### POST-CONSUMER WASTE

In our modern society, we produce and consume large quantities of plastic bottles. This generates an enormous quantity of waste, which is also called post-consumer waste (PCW). The PET plastic bottles waste is used for the production of the upcycled product VELOURS RECYCLED.

Through this process, we avoid the need of newly resourced polyester yarns and large quantities of plastic.

**REACH**

Registration, Evaluation, Authorisation and Restriction of Chemicals is a European Union regulation dating from 18 December 2006. REACH addresses the production and use of chemical substances, and their potential impacts on both human health and the environment.

**UN GLOBAL COMPACT**

The UN Global Compact is the world's largest corporate sustainability (a.k.a. corporate social responsibility) initiative with 13000 corporate participants and other stakeholders over 170 countries with two objectives: "Mainstream the ten principles in business activities around the world" and "Catalyse actions in support of broader UN goals, such as the Millenium Development Goals (MDGs) and Sustainable Development Goals (SDG's). Moving forward, the UN Global Compact and its signatories are deeply invested and enthusiastic about supporting work towards the SDGs.

**VEGAN**

Vegan means that this material does not contain any animal products or animal-derived ingredients.

**OEKO-TEX®**

The Standard 100 by OEKO-TEX® is a worldwide consistent, independent testing and certification system for raw, semi-finished, and finished textile products at all processing levels, as well as accessory materials used.
