Category:GURPSEfficacy and safety of oral  
dipyridamole in the treatment of chronic stable angina  
pectoris. To assess the safety and efficacy of long-term,  
low-dose dipyridamole (0.5 mg/kg) in the treatment of  
chronic stable angina. In a double-blind, placebo-  
controlled, randomized, parallel-group trial, 187 patients  
were enrolled to receive dipyridamole (n = 96) or placebo

(n = 91) for 12 months. Clinical, electrocardiographic and exercise test variables were assessed at baseline and after 6 and 12 months of treatment. Patients in both groups experienced a significant improvement in the frequency and severity of anginal attacks at 6 and 12 months of treatment with no difference in clinical efficacy.

Dipyridamole was well tolerated. The percentage of patients developing ECG signs of coronary artery disease (CAD) was not significantly different between the two groups ( $p > 0.05$ ). The incidence of drug-related adverse effects was higher in the dipyridamole group than in the placebo group ( $p$  Tom Cruise has responded to our post from last week by giving us his view of Scientology and expressing support for the U.S. government's decision to block access to the Church of Scientology's videos on YouTube and Wikipedia. In a statement posted on his Twitter page, Tom Cruise said, "Scientology is a religion that I am deeply proud of, and it has taught me much. I have never been a member and have never met David Miscavige. "However, after spending a few days researching and reading about it, I have to conclude that
