

WE ARE GROWING.

ARE YOU GROWING WITH US?

We are a private company offering ship and project management for large conversion and rebuilding projects, as well as consulting services for offshore vessels, jack-up and semi-submersible platforms either owned or under management. Workships also provides management services to the Wind Farm Service Vessels owned by Offshore Wind Services BV. (OWS). These vessels are DNV Classed or MCA Coded and operate in Germany, Denmark, The Netherlands and the UK.

We are looking for a: **Naval Architect / Engineering Superintendent**

Tasks and Responsibilities:

This engineer will oversee the design and construction of new build vessels for the offshore energy sector as well as assist in the day to day operation of the vessels from the Rotterdam office and will attend the vessels to assist in planned and breakdown maintenance.

Functional Requirements:

- Technical education to HTS with background as project Engineer or similar.
- This person will be an outgoing and enthusiastic person, who likes to get their hands dirty and is willing to travel to the vessels located in the UK, The Netherlands and Germany at short notice.
- Good written and verbal communication skills, able to work in a dynamic working environment and adapt quickly to changes.
- Leadership, team building and team working skills.
- Master English in all aspects and the ability to speak and write in German is an advantage.
- Competent with CAD Software.
- This role suits someone who can develop a concept, engineer it and then deliver in the shipyard or onboard a vessel.
- Living in close proximity to Rotterdam.
- Commencement: as soon as possible.

What do we offer?

We are expanding our activities in the marine and offshore wind industry. If you are an ambitious person, there are many possibilities within our company; we give you the chance to grow and bring in your ideas. We work in a dynamic and fun environment where we value teamwork and reward our employees
