

Rubean and GLS Spain improve parcel delivery with an advanced "tap-to-pay" solution using the delivery app

- **Thanks to Rubean's PhonePOS solution, GLS Spain's delivery staff can now accept card payments using advanced and secure technology.**

Madrid, October 30th, 2023 - Rubean AG, a FinTech company, and GLS Spain, a leading courier and parcel delivery company, have deployed Rubean's PhonePOS solution in GLS Spain's delivery app, used by around 5,000 drivers to deliver parcels across the country.

Hermann Geupel, CEO of Rubean AG, has stated: *"We are delighted to be working with the GLS Spain team and helping them integrate our solution for the Black Friday and Christmas periods in record time. The PhonePOS solution is designed help our customers achieve shorter lead times."*

Rubean's application is a Full-SDK certified, purely software-based card acceptance solution for smartphones, tablets and handheld devices. Also known as a softPOS, it allows drivers to accept card payments on their current device instead of carrying and accepting cash. This translates into greater operational efficiency by reducing payment times and enabling integration with GLS Spain's financial and logistics systems.

"The Black Friday and Christmas campaigns are always a challenge due to the volume of online purchases and our commitment to continue providing our customers with high-quality service and positive user experiences. From now on, thanks to the solution we have developed with Rubean, deliveries will be faster, delivery staff will be able to accept quick card payments and the overall shopping experience will be more satisfying", added Roberto Martínez, chief financial officer (CFO) of GLS Spain.

This new solution will further optimise last-mile delivery efficiency while maintaining a high-quality service.

About Rubean

Rubean AG (symbol: R1B, ISIN: DE0005120802, WKN: 512080), based in Munich, is the leading provider of pure software point-of-sale solutions for banks, acquirers and retailers. These include the PhonePOS mobile point-of-sale software solution, which allows merchants to receive card payments directly on their smartphone without

needing another device. This solution is used by payment service providers, large banks, retailers and small merchants all over Europe, and is the only softPOS solution in Germany that supports the girocard (ec-card). Rubean is listed on m: access, as well as on most over-the-counter markets and on XETRA.

About GLS Group

The GLS Group is one of Europe's largest independent parcel service providers, with a strong local presence in almost every country on the continent. It also operates through wholly owned subsidiaries in Canada and on the west coast of the US within a single GLS network. This allows the Group to seamlessly connect its customers and communities with millions of parcels and stories every day.

GLS proactively manages its network, flexibly connecting its markets to respond to their changing and dynamic nature. The company prides itself on offering its customers high-quality service that suits their needs in more than 40 countries. The GLS network comprises over 120 hubs and over 1,600 depots, supported by over 35,000 last-mile delivery vehicles and 4,700 long-haul trucks. This offers network resilience, enhanced flexibility, and greater reach. In 2022/23, GLS generated record revenues of EUR 5.4 billion and delivered 862 million parcels across all markets.
