

SÉURA MIRROR TECHNOLOGY, CUSTOM UPGRADE

Touch Control Color Temperature

Whether you're energizing your morning routine with cool, clean white, or winding down for a good night's sleep with a warm and inviting glow, tune your light color with the in-mirror touch sensor.

IDEAL SPACES

Bathroom Vanity
Dressing Room

TUNABLE LIGHTING

Adjustable color temperature from
2700K up to 6500K

CONTROL

In-mirror touch button

MAKEUP LIGHTING

To get just the right shade and weight of makeup application, fine-tune your color temperature to replicate your destination.

GRADUAL ADJUSTMENTS

Select from calming, natural warm to cool settings that boost alertness or relax your mind and body for a good night's sleep.

EASY TO USE

Each tap of the button will quickly scale to the next preset, or hold to slowly move up and down the light spectrum.

SMART MEMORY

Select your desired color before turning the lights off and your setting will resume the next time you turn the lights on.

Touch Control Color Temperature

TOUCH BUTTON OPERATION

When the mirror lights are on, the energy-efficient button illuminates and senses your touch. Tap to quickly advance to pre-set temperatures or touch and hold to gradually adjust. Lift your finger off to stop at your desired setting.

Refine your white light color temperature

Ambientuate your lifestyle, your look, and your wellbeing with color temperature settings. Create a relaxing atmosphere with warm white, or turn up the vibrancy for hair or makeup in cooler light.

2700K

Warm whites are cozy, inviting and lure you into relaxation. Create warm-light spaces for a peaceful morning meditation or simulate the soft light of dusk, telling your brain it's time to sleep.

4300K

Natural white light mimics early morning sunlight and has a harmonious tone for lighting routine tasks, such as shaving or applying makeup at the bathroom vanity.

6500K

Cool white is similar to high-noon sun. With a crisp look that inspires energy and alertness, cool white is perfect for bright task lighting where details and final touches make all the difference.
