

Séura’s marine-grade mirror housing positions COB LEDs closer to the mirror etch and mirror edge for a brighter lighted mirror. Unlike traditional SMD LEDs, Séura’s COB LEDs provide uniform light that doesn’t cause bright hot spots, so they can be placed closer to the mirror.

Beauty Lighting

Séura combines a 90+ CRI rating with a 96 R9 value (red color) to bring your vibrant skin tones to life, providing the ideal light for applying makeup

Uniform and Exact

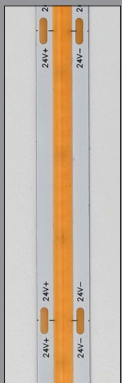

High-end lighting emits smoothly and evenly, eliminating the need for add-on diffusers.

Greener Energy

Save money with sustainable COB LEDs that shine brightly for over a decade and consume 40% less power than previous Séura LEDs.
