The following notice gives notice of the variation of an environmental permit.

This variation adds storage for recovery operations to the existing permitted activities along with additional waste codes. The additional waste codes are included in Appendix A1 and A2 of the schedules attached to this variation. The annual throughput is increased from 1,000 to 1,500 tonnes and the overall storage amounts have also been increased. All hazard codes are now accepted at the site except for Hazard Code H1 - explosive. The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
