

porce-clean

Detergent for cleaning ceramic and natural stone flooring. Effective degreaser for deep and thorough cleaning. Quick drying. Neutral pH to protect delicate surfaces.

Recommended for polished surfaces; low foaming and quick drying to prevent marks. Suitable for automatic floor cleaners.

Composition:

porce-clean contains amongst other ingredients:

- < 5% Non-ionic surfactants..
- < 5% Nitrilotriacetic acid (NTA) and its salts.
- Perfumes; Limonene; benzyl alcohol; 5-chloro-2methyl-2h-isothiazol-3-one, 2-Methyl-2h-isothiazol-3-one

Instructions for use

- Depending on the level of soiling, add 100-200cc per 10 litres of water. (Dilution 1:50 to 1:100)

Storage

- 36 months in original container and away from heat, cold and moisture. Store in a dry, covered place out of direct sunlight.

Health and Safety

- Normal precautions for using cleaning products are recommended, such as the use of gloves.
- We recommend the following safety precautions:
- S2 Keep out of the reach of children.
- S46 If swallowed, seek medical advice immediately and show the label or container.

In case of accident consult the toxicological information medical service (+34) 91 562 04 20

Safety data sheets are available for the professional user on request. Do not ingest.

Coverage (1L)

Ordinary maintenance: (1:100) 750m²

Initial cleaning: (1:50) 125m²

The amount of cleaning product required per square metre (m²) may vary depending on the type of surface, the concentration of the product, and the nature and amount of dirt or stains. Therefore, the coverage indicated are purely informative and butech does not assume responsibility for any discrepancies that may arise in its use.

Technical data sheet conditions

- This technical data sheet does not apply to a finished product, but rather a material which, together with other products and materials, constitutes an installation system for ceramics. The advice contained in this technical data sheet is based on our experience and technical expertise but should only be considered as general recommendations which, together with other products, may assist the professional installer in carrying out the work.
- Since we are not familiar with individual site conditions and characteristics, it is the sole responsibility of the user to assess these and, where appropriate, carry out prior tests to confirm that the product is suitable for the work to be carried out.
- This technical data sheet may not take into account all applications and conditions in respect of a material. We therefore recommend that, for situations not referred to in the data sheet, you carry out prior tests and consult our technical department.
- This data sheet was updated in February 2024.
