

YEAR-END ROUNDUP

2025

In Review

As we close the year, we extend our deepest gratitude to our international donors whose unwavering support continues to make free, quality healthcare possible for millions across Pakistan. Your generosity has enabled Indus Hospital & Health Network to care for the most vulnerable with dignity and compassion. You are not only treating illness but restoring hope, strengthening communities, and reaffirming our shared belief that access to healthcare is a right, not a privilege.

EXPANSION UPDATES

The Karachi campus is located in the densely populated area of Korangi, spread over 20 acres of land area.

Significant progress continues under the Karachi Expansion Project, as several key hospital facilities were successfully operationalised over the past few months. Highlights include the launch of partial radiology services and the Central Sterile Services Department (CSSD) in the basement of Hospital Building 1, along with 70 new inpatient ward beds on its 6th - 10th floors. The Clinical Research Unit (CRU) also became functional on the Lower Ground Floor of Hospital Street, while administrative offices were established on the 10th floor of Hospital Building 2.

Together, these developments mark steady progress toward fully activating IHHN's expanded infrastructure, strengthening IHHN's capacity to deliver quality care, research, and operational excellence

1,350 beds

3.52 Million square feet

Basement

Operationalisation of partial radiology services in the basement of Hospital Building-1 (HB-1)

3rd Floor

Operationalisation of 36 Operation Theatres and 12 Surgical Intensive Care Units (ICU)

Testimonials

Physical Rehabilitation

Shabana - 40 years

"After my accident, I thought my life had come to a stop. At Indus Hospital & Health Network, I was treated with kindness, patience, and respect. They helped me learn to walk again, regain my confidence, and return to everyday life. Today, I can work, take my son to school, and move freely once more. IHHN didn't just treat my injury; it gave me back my independence and hope."

Childhood Cancer

Syeda Fatima - 9 years

"There was a time when Fatima couldn't move her left leg, and we worried about her future. At Indus Hospital & Health Network, she received treatment for cancer. Today, she walks, goes to nursery, gives her exams, and enjoys her cartoons like any other child. IHHN gave our daughter back her confidence and her childhood, and for that, we will always be grateful."

Primary Care

Azra Younis - 70 years

"For people like us on Baba Island, proper medical care is out of reach. I have been living with a thyroid problem for many years, and Indus Hospital & Health Network has been my lifeline throughout this journey. From timely treatment to the kindness of the doctors and staff, I have always been cared for with respect and compassion."

Maternal & Neo-natal

Khadija from Alipur

"I had no way to reach a hospital because of the floods, and I was scared for my baby and myself. When the Maternal Health on Wheels team from Indus Hospital & Health Network arrived, they gave me hope. They cared for me, stayed with me, and helped me safely deliver my baby boy. In a time of fear and uncertainty, IHHN brought safety, dignity, and life to our community."

Looking Ahead

IHHN'S STRATEGIC GOALS

- Embracing Universal Health Coverage
- People Centered Policies & Processes
- Education & Capacity Building
- Research, Innovation & Development
- Alliances & Partnerships
- Ensuring Quality Through Cost-Efficient & Continuous Process Improvement
- Integrating a Technology-centric Approach
- Enhancing Resource Generation
