

API & MCP Server Disclosure

This disclosure provides important information regarding your use of the API and/or MCP Server offered by Composer Technologies Inc. ("Composer") and its affiliates, Composer Securities LLC. Please review this disclosure carefully before accessing or using the API Products.

1. **Overview:** Composer offers a proprietary application programming interface ("API") and an MCP server, within the context of Model Context Protocol (MCP), that enables clients to develop software applications for their personal use, allowing them to access and manage their investment accounts ("Accounts") on the Composer platform. The API enables clients to view account data, place buy or sell orders, and manage their personal accounts. Access to the API is limited to registered users who have accepted all relevant terms and conditions and opened an account with Composer or its affiliates.
2. **Permitted Use:** The API and related materials are provided solely for your personal use in connection with your own accounts. You may not distribute, sublicense, or make the API or any part of the Composer platform available to third parties. Use of the API is subject to compliance with all applicable agreements, including but not limited to [Composer's Customer Agreement](#), [Terms of Use](#), and other referenced agreements.
3. **Fees and Costs:** You are responsible for all trading, account, and administrative fees associated with your accounts, as described in Composer's [Fee Schedule](#). Composer reserves the right to charge fees for API access or additional features in the future.
4. **Restrictions:** You may not reverse engineer, distribute, or use the API for any unlawful, unauthorized, or commercial purposes. Automated or systematic copying, unauthorized access, or interference with Composer's systems is strictly prohibited. Composer may limit or revoke your access to the API at any time and for any reason.
5. **Data and Security:** You are responsible for maintaining the security of your API keys and credentials. Composer may require you to update your applications to comply with security requirements and may suspend access to protect the integrity of its systems. Account and market data accessed through the API may be subject to additional terms and conditions.
6. **Intellectual Property:** All rights, title, and interest in the API, API materials, Composer's platforms, and related intellectual property remain with Composer. You retain ownership of your applications, excluding any Composer property included or accessed.

7. **Confidentiality:** Information provided by Composer, including API keys and materials, is confidential and must be protected accordingly. Disclosure or use of such information outside the scope of the policy/disclosure is prohibited.
8. **Compliance and Responsibility:** You are solely responsible for ensuring your applications comply with all applicable laws, rules, and regulations, including those related to securities, data privacy, and intellectual property. Composer does not guarantee uninterrupted or error-free access to the API and is not responsible for data loss, outages, or inaccuracies.
9. **Limitation of Liability:** Composer and its affiliates provide access to its API and related systems on an “as is” and “as available” basis, without warranties of any kind, express or implied. Composer, its affiliates, officers, directors, employees, agents, and third-party providers shall not be liable for any losses, damages, or expenses arising from interruptions, delays, errors, omissions, or failures of performance related to the API or system, regardless of cause, including but not limited to system failures, unauthorized access, or force majeure events. By using the API or system, you agree to indemnify and hold harmless Composer and its affiliates from any claims or liabilities resulting from your use of, or inability to use, the API or system. Composer makes no guarantees regarding the timeliness, accuracy, or reliability of any data or functionality provided, and your sole remedy for dissatisfaction with the API or system is to discontinue use.
10. **Termination:** Composer may suspend or terminate your access to the MCP Server or API at any time, with or without notice. Upon termination, all rights granted to you will immediately cease, and you must discontinue use of the API and destroy any confidential materials.
11. **Changes to the Policy:** Composer may modify, suspend, or discontinue the MCP Server or API at any time. Continued use of the API after any changes constitutes your acceptance of those changes.
