Combining brokerage and crypto trading can create a more complex investment strategy with additional risks and challenges. While this strategy aims to achieve diversification by combining different asset classes, diversification does not eliminate all risks.

Cryptocurrencies are highly volatile and their prices can fluctuate significantly. You may experience substantial gains or losses in a short period. Purchasing cryptocurrencies involves a high degree of risk, and there is a possibility of losing some or all of your capital.

If a strategy is appropriate for you depends on your risk tolerance, investment objectives, and financial situation. Past performance is not indicative of future results. There is no guarantee that you will profit from purchasing cryptocurrencies. Please conduct your own research and consider your investment objectives and risk tolerance before purchasing cryptocurrencies.
