ABOUT ME

Software Engineer with six years of experience in software development, with an emphasis on UI and a keen eye for detail. I am passionate about UX design and strive to not only develop robust software but also produce a great user experience.

EXPERIENCE

Senior Android Software Engineer

Thales Avionics; Irvine, Ca Oct 2015 - present

Worked in an agile environment on the company's In-Flight Entertainment software (with embedded Android OS), focused on GUI development. Although originally hired as an Android developer, I adapted to the company's needs and learned Qt/QML to create new customer GUIs for several different airlines. Acted as lead developer for the American Airlines program.

Software Engineer

Raytheon; Fullerton, Ca Sep 2013 - Oct 2015

Worked on the entire software development process, including analyzing requirements, creating top-level design artifacts, implementing software and creating formal test procedures. Developed and maintained Human Machine Interface (HMI) tabular displays using XML for presentation layer, as well as Java components for the HMI framework layer.

SKILLS

Android/Java development

Qt/QML

Javascript

SQLite

Photoshop/Illustrator

HTML/CSS

React/React Native

EDUCATION

California State University,
Los Angeles

Bachelor of Science in
Computer Science, 2013
