

4. Healthcare

85% of Thai medical equipment relies on imports. The annual import of medical equipment in Thailand amounts to 40 billion Baht, constituting a noteworthy business opportunity. The Taiwanese medical industry combines technology and brands to leverage existing advantages and expand the market. Taiwanese manufacturers' advantages for promotional marketing include home-based testing equipment and auxiliary rehabilitation medical equipment for chronic diseases such as diabetes and hypertension.

<p>Digital Commerce & Startups Pavilion AdvMeds Co. Ltd.</p>	<p><u>Smart Health Station</u> Smart Health Station is an All-in-One self-service device, which enables self-management of blood pressure, body temperature, oxygen concentration, height and weight. Logging in with your own smart cards, smart phone app, or wearable devices, you can access your own health data within seconds. Analysis results can be shared with your friends and families on FB, twitter, or by SMS, forming a self-healthcare circle. These continuous data can also be important information for doctors during medication treatment. Knowing your personal health status anytime, anywhere is an absolutely smarter way of living and an unstoppable trend today.</p>	 <p>The image shows a white, compact medical device with a large circular cuff on the right side. On the left, there is a small screen displaying various health metrics and icons. The device is labeled 'SMART HEALTH STATION' at the top.</p>
