

2N[®] Attendance System

Effective work hours records

Say goodbye to manually controlled attendance records

Considering buying a simple attendance system without investing in extra devices? If you use one or more door intercoms from the 2N[®] Helios IP portfolio, we have the solution for you. Using the 2N[®] Attendance System software application, you can gain a tool for logging attendance of your employees which provides you with a perfect overview of their presence in or absence from the workplace and of the hours they have worked.

The 2N[®] Attendance System processes all information gained and you can then work with the data as you need, for instance filtering it into specific periods or exporting it to the salary department. Using this attendance system from 2N means simple compliance with legislative requirements for monitoring work hours. And all you need to get the attendance system up and running is an intercom from the 2N[®] Helios IP range with a card reader and a computer, so you do not have to invest in extra hardware.

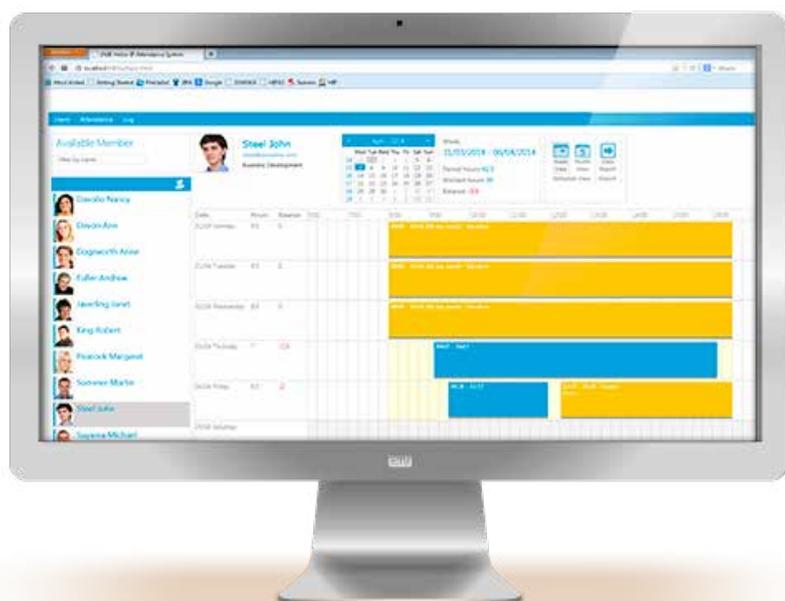

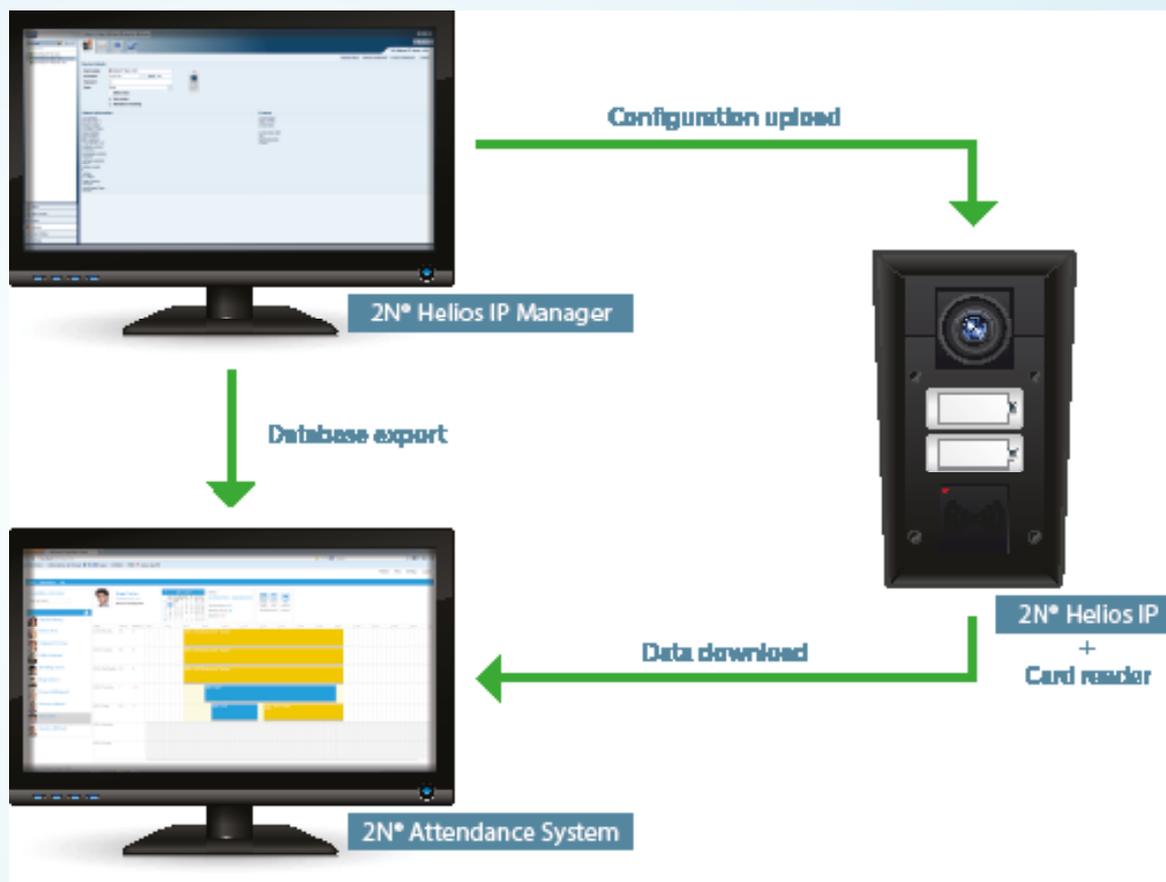

Use:

- Small and Medium Enterprises
- Office complexes

Why choose the 2N[®] Attendance System?

- Detailed attendance records for all employees
- Keeps you abreast of employee attendance in the workplace
- Easy processing and evaluation of data gained
- Uses existing computer (no need to buy more hardware)
- Easy setup and intuitive control
- Great price
