In making this application for a plumbing permit, I state that the information given is, to the best of my knowledge, true, complete and accurate. I understand and agree that any error, misstatement or misrepresentation of fact(s) intentional or not may result in revoking this permit. If this permitted property is part of a sub-division, I must construct according to sub-division regulations. I agree to construct according to all state, county and municipal laws. I agree that any construction allowed by this permit shall not create a drainage or erosion problem to surrounding properties. If necessary to accomplish this, I will install a silt fence. Approval of this permit does not constitute waiver of any restrictive covenants of record by deed or otherwise.

All inspections are for building code enforcement and not for defects in materials or workmanship. If during construction, a contractor not named on the permit is hired, the permit must be brought to Unicoi Town Hall for revision.

A Stop Work Order may be issued if a building permit has not been issued before any kind of construction begins.

A Citation to municipal court may accompany this Stop Work Order and work must stop immediately

The citation consists of a fine of \$50 per day if construction continues plus \$75 court costs and \$13.75 Litigation Tax

I have read this form, understand and agree to all of the terms. I grant permission to the Building Inspector to enter onto this permitted property at any reasonable hour to inspect any part or phase of construction.
