

Milk Bottle Igloo

Learning Objectives

Promotes the idea of recycling to children and encourages them to drink milk, as they can bring in empty milk cartons from home to participate in the activity.

Resources

- Milk Cartons
- Glue

Instructions

1. Explain to the children that you are all going to work together to build a milk carton igloo.
2. Ask the children to bring in empty milk cartons from home, and get any friends and family to help contribute.
3. Once you have collected enough cartons, work as a class to build a life size igloo made up of what the children have brought in.

Top Tip

Once the igloo has been made, the children can sit inside it for lessons or story time.

If you don't have enough room in the classroom for a life size igloo, make a model that can be displayed.
