PalletPOD™

The Compact Solution for End of Line Palletizing!

The ROI **PalletPOD™ Compact Palletizer** is the answer for many end of line palletizing operations. With a small footprint in a pre-assembled package, the **PalletPOD™** is easy to set up, and quickly provides a return on your investment.

Palletizing operations for slow to moderate rate packaging lines are a problem for most companies. Repetitive motion injuries and training / re-training costs can eat away at productivity and profits.

Space constraints in existing facilities are also a challenge. Reconfiguring production lines for end of line automation is typically prohibitive or nearly impossible without major and costly changes.

The **PalletPOD™** may be the solution you have been looking for. The small size easily fits into existing tight spaces, typically not taking more space than what is currently being used for manual palletizing. The system eliminates the ergonomic and repetitive motion issues of manual palletizing operations

CP100-8-L

Patented Technology

The base model allows for pallet jack loading and removal of pallets from the palletizer. A hinged door provides access to the side and a laser scanner is used to guard the pallet entrance / exit.

Multiple pallet patterns are pre-programmed allowing quick production changes.

Features / Specifications:

Maximum capacity: 100 kg (220 lbs)

Product Types: Cartons, Bags, Pails, etc.

Palletizing Rate: Up to 8 cycles per minute.

NOTE: can handle multiple boxes or pails in one pick to increase the palletizing rates.

Palletizing Height:

Model CP100-8 - up to 8' high (102")

Model CP100-5 - up to 5' high (68")

Structure: Heavy duty welded steel base and aluminum profile or steel frame. Pre-assembled on casters for transport, mobility and easy positioning.

Enclosure: Aluminum diamond plate panels and 1" Wire mesh panels or polycarbonate panels on 3 sides.

Overall Height: CP100-8 - 11'3"
CP100-5 - 8'8"

Tooling: Single zone vacuum tool for cartons. More end of arm tools are available.

Conveyor: Powered conveyor, 72" long, conveys product into the palletizer.

Safety: Integrated safety controls and access Interlock / safety scanner.

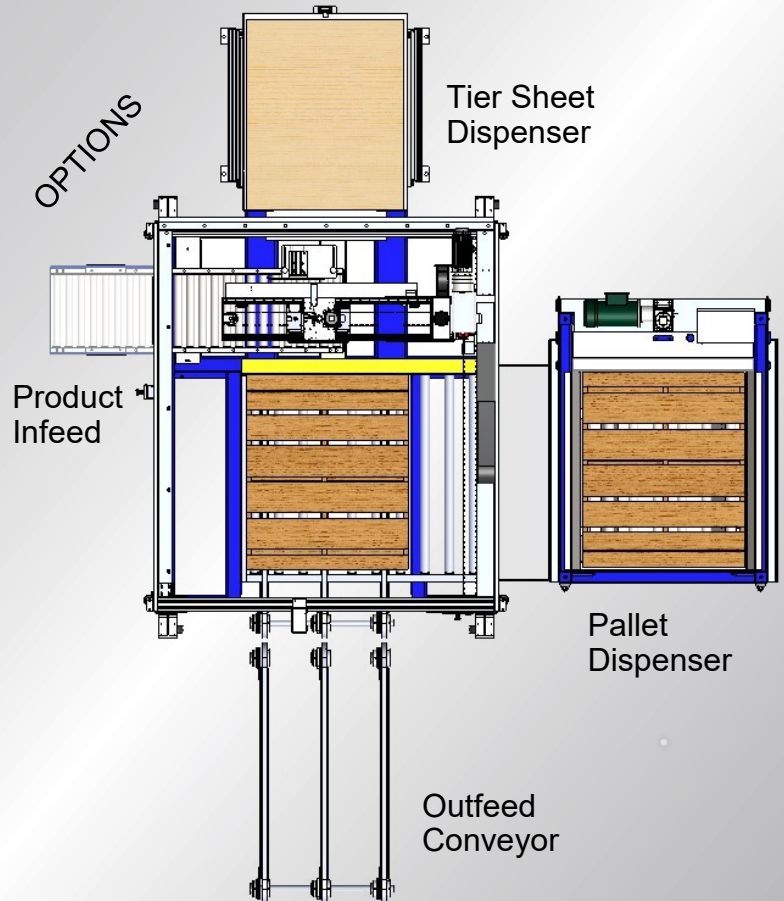

Controls: Integrated control system with HMI interface to select palletizing recipes.

Power: 230 VAC – 3p 20 amps or
460 VAC – 3p 11 amps

Compressed Air: 13 scfm @ 80 psi

Warranty: 1 year Parts and Service

Optional multi year - extended warranty or up-time guaranteed service package

Add pre-engineered and integrated equipment for even more productivity.
