1.0 INTRODUCTION

The U.S. Army Corps of Engineers (USACE) is currently conducting a Remedial Investigation (RI) / Feasibility Study (FS) at the Former Conway Bombing and Gunnery Range (BGR) in Horry County, South Carolina, under Worldwide Environmental Remediation Services (WERS) Contract No. W912DY-10-D-0023, Task Order (TO) No. 0018 in accordance with the approved work plan (HydroGeoLogic [HGL], 2015a). As part of the RI/FS, a Community Relations Plan (CRP) was developed to promote public awareness and participation concerning the RI/FS at the former Conway BGR (HGL, 2015b). Under the provisions of the CRP, this summary is provided to document the activities USACE and U.S. Army Engineering and Support Center, Huntsville (USAESCH) have conducted to accomplish the CRP objectives. The current RI/FS project is being conducted for the following four munitions response sites (MRS):

- MRS-R01, Range II (Formerly Used Defense Site [FUDS] Project No. I04SC002501R01)
- MRS-R02, Range III (FUDS Project No. I04SC002501R02)
- MRS-R03, Range IV (FUDS Project No. I04SC002501R03)
- MRS-R09, Machine Gun (MG)/Rifle Range (RR) (FUDS Project No. I04SC002501R09)

This summary is provided to describe the activities conducted, document public attendance, and record any details relevant to the continued CRP goals to increase public participation. The activities described were conducted in November 2015. The USAESCH, USACE Savannah District, and USACE Wilmington District hosted the media day and public workshop on November 5, 2015. Additional details for each public relations event are provided below.

1.1 MEDIA DAY SUMMARY

The USAESCH, USACE Savannah District, and USACE Wilmington District hosted a media day on November 5, 2015. The media day was intended for the interested media outlets and the state regulators to observe data collection efforts during the RI/FS. The media day started at 1 p.m. at the HGL field office, located at 568 George Bishop Parkway, Myrtle Beach, SC 29579. The attendees from the South Carolina Department of Health and Environmental Control (SCDHEC) and the media were invited to see field data collection and ask any questions regarding the field work. The media day was publicized by the USACE Corporate Communications Office in a news release distributed on November 2, 2015 (See Attachment 1).

External attendees include the personnel listed in Table 1. Prior to beginning the media day demonstration of data collection activities, attendees were required to attend a site-safety briefing provided by contractor personnel. All attendees signed in to demonstrate completion of the site-safety briefing, as shown in Attachment 2. Following

the safety briefing, attendees traveled to a parcel to observe data collection efforts and have the option to ask questions and take photographs. A brief introduction of the purpose of an RI/FS project was given. A description of the equipment and the data to be gathered was provided. The HGL team then collected a transect line of digital geophysical mapping (DGM) data, while invited attendees observed. The HGL team also described the handheld magnetometers used by teams and demonstrated their use. Mr. Allen, a reporter attending on behalf of ABC affiliate WPDE, conducted on camera interviews with Mr. Ray Livermore (USACE Wilmington) and Mr. Neil Feist (HGL). The topics of the interviews included the site history, safety procedures, and the current investigation methods. The WPDE television station website featured the news article provided in Attachment 3, following the media day event. A video featured by the WPDE television station was also provided separately to USACE as an electronic file.

Photographs of the media day activities are provided below. Figure 1 shows the group receiving a brief introduction and explanation of the field activities to be demonstrated. Figure 2 shows an HGL field team member demonstrating the hand-held White’s All Metals detector operation. Mr. Ray Livermore, USACE Wilmington District, is shown being interviewed on camera in Figure 3.

1.2 PUBLIC WORKSHOP SUMMARY

On November 5, 2015 (the same day as the media day event) USAESCH, USACE Savannah District, and USACE Wilmington District also presented a public workshop. The workshop was designed to present information on the ongoing RI/FS at the former Conway BGR to the general public. The public workshop was held on Thursday, November 5 from 6:30 to 8:30 p.m. at the Carolina Forest Elementary School, located at 285 Carolina Forest Blvd, Myrtle Beach, SC 29579. The public was invited to view displays related to the RI/FS being conducted on the former Conway BGR. These public workshop minutes were prepared to meet the performance objectives for the public workshop task.

The public workshop was advertised in three local papers: the Horry Independent, the Myrtle Beach Times, and The Sun News. Newspaper publication affidavits are provided in Attachment 4 along with a copy of the notice. Additionally, HGL mailed 19 letters to local city and county officials and 135 letters were mailed to landowners who had either granted right-of-entry (ROE) access to their property, or had not previously responded to mailings. The letters were all mailed on October 13, 2015.

1.3 ATTENDEES

Representatives from the organizations listed in Table 2 were present at both the media day event in the afternoon and at the public workshop in the evening. The role of the government and contractor attendees was to answer questions, provide information, and generally interact with members of the public.

**Table 2, Government and Contractor Representatives

2.0 PUBLIC WORKSHOP MATERIALS

For the purposes of tracking attendance for the workshop, members of the public were greeted by a staff member at a sign in table, and requested to sign in before entering the room. A list of the attendees is provided in Attachment 5. After entry to the room, attendees were greeted and approached by a government representative. If no specific questions were asked, attendees were invited to move among several information booths and/or be seated to watch a slide presentation. The slide presentation (Attachment 6) was repeated throughout the workshop, displaying as a looped presentation which would automatically advance through the slides, from 6:30 pm to 8:30 pm. A group of chairs was provided at the slide presentation area for viewing the presentation. Various booths/tables were also available to the attendees which presented the following information:

- Unexploded Ordnance (UXO) Safety Materials (Figure 4)
- Conway BGR slide presentation (Figure 5)
- Conway BGR website available for view (Figure 6)
- Laptops for specific parcel research, using the HGL GIS webmap
- Large format poster of each MRS (Attachment 7)
- Blank ROE forms
- Restoration Advisory Board (RAB) interest forms

As part of the interaction with the public, the previously approved Fact Sheet dated March 2015 was available for attendees to take with them. As described in the Fact Sheet, there are documents related to the site history available for review in the References Section of the Horry County Memorial Public Library in Conway, South Carolina.

For more information about FUDS in general and the former Conway BGR site, in particular, the public was invited to view the website: www.ConwayBGR.com on laptops and tablets available in the workshop room for the public to use. Additionally, if the attendee has questions specific to a subdivision or parcel, laptops were available for the planned investigation and historical data to be viewed specific to that parcel. Various questions and concerns from the attendees to the public workshop are summarized in Section 3.

Figure 4, UXO Safety Materials Table

Figure 5, Slide Presentation Area

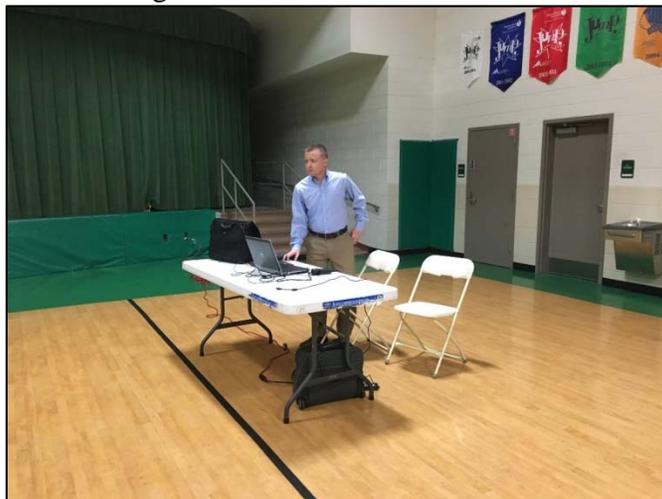

Figure 6, Various Information Available to the Public

3.0 SUMMARY OF ATTENDEE QUESTIONS

The following sections summarize the conversations that occurred with individual attendees. Based on the questions received from members of the public who attended the workshop, various follow up actions will be taken to respond to the specific questions submitted. All interaction by HGL with the landowners and members of the public was coordinated through the Corporate Communications office and USAESCH.

Loy Ballam
Eight Bells, LLC
(o) 843-884-3473
Parcel ID: 1430001049 and 1430001050

Mr and Mrs. Ballam received the letter inviting them to the public workshop and were worried that HGL had found something on their property. The process of the field effort was explained, and they were happy to participate. They have had the wetlands on their property delineated, and are looking to sell the non-wetland portions for development.

Joe Burch, Planning Coordinator
Horry County Schools
1160 E. Hwy 501
Conway, SC 29526
(o) 843-488-6712
(c) 843-421-3285
jburch@horrycountyschools.net
Parcel IDs: 1640001101 and 1640001102

Mr. Burch attended the meeting, as well as the meeting in March. Mr. Burch wanted to make sure we had all the documents we needed regarding the parcels that Horry County Schools owns and historical removal actions. He was also interested in the progress of the ongoing RI.

The Farm at Carolina Forest HOA
Parcel IDs: 1642301479, 1642301252, 1640001059, 1643101125, 1640001124, 1643101171

Ron and Susan Tagliabue attended representing the Farm at Carolina Forest HOA. They asked questions about the types of ordnance that were listed as being previously found in the area. HGL staff answered the questions and then discussed the timeline for upcoming brush clearance plans on the property. Mr. Tagliabue was pleased that HGL assured they would receive a call prior to any work being done on the property.

Horry County Police Department, Bomb Squad

Mr. Jeff Hamilton and Mr. Alex Smith attended the meeting from the Horry County Police Department Bomb Squad. Both officers have been in contact with the HGL field team and during the meeting, they discussed other ordnance-related calls from the previous year they were involved in. The team discussed any support the Bomb Squad would be willing to provide to HGL in the future if any demolition activities were performed.

James Fowler
South Carolina Department of Natural Resources

Mr. Fowler attended to ask questions about the land that is owned by the South Carolina Department of Natural Resources. These parcels are between MRS R02 and MRS R03. The parcels are within the MRA, but are outside the current investigation MRSs. Mr. Fowler was given general information about the history of Conway BGR, and a description of the goals of the current RI/FS project. At this time, there is not a pending ROE request for the South Carolina Department of Natural Resources owned parcels. Mr. Fowler was aware that in the past, USACE request for a ROE had been discussed, and would have required longer negotiations. HGL confirmed for Mr. Fowler that at the current time, no ROE requests are pending for those parcels.

These landowner concerns and questions have also been documented in the ROE responses database maintained by HGL, for future reference.

4.0 ACTION ITEMS

- Interactions with landowners and landowner requests from the workshop will be documented in the HGL ROE tracking database.

Army Corps gives inside look at work to remove old munitions from old Conway Bombing Range

BY JOEL ALLEN | THURSDAY, NOVEMBER 5TH 2015

Joel Allen/ Officials working with the Army Corps of Engineers to locate and remove any old munitions.

IMAGE GALLERY

3 PHOTOS

(/news/local/gallery/army-corps-gives-inside-look-at-work-to-remove-old-munitions-from-old-conway-bombing-range)

There could be hundreds of old, potentially deadly military shells buried underground in various spots around Horry County and the Army Corps of Engineers has begun a project to find those old munitions in the former Conway Bombing Range, and get rid of them.

The project has been happening for a few months now, but on Thursday Corps officials gave a behind-the-scenes look at how they will go about finding those old shells and disposing of them.

It won't look like what you might see a military bomb squad do in the movies, but that doesn't mean the task will be safe or easy, officials say.

Contractors working for the Army Corps of Engineers will use surveying devices, like an E-M 61, to detect metal anomalies underground.

Then they'll use GPS technology to map out those items with accuracy down to a fraction of an inch, so disposal technicians can come along later and dig them up.

The four sites they'll be surveying around the area are all part of the former Conway Bombing and Gunnery Range that was used for military training during World War Two.

Whatever they find on the site will be very old, but still potentially live ammunition and dangerous.

"There's a variety of items here. There have been items from practice munitions to rockets to bombs, practice bombs at the facility," said Raymond Livermore, with the corps.

Some of what's buried could be un-exploded ordnance, so the engineers say anyone living in the former bombing range who finds something suspicious in their backyard should follow the three r's: Recognize it, retreat from it and then report it to authorities.

If the contractors find something that could be a danger to the public, they'll dig it up and safely dispose of it, according to officials.

"We use protective work, such as sand bags. We can bury the item to reduce the exclusion zone or the effects of the blast. and then we blow it up," said Neil Feist, with Hydrogeologic, Inc.

The Corps says its work will take a year or so to complete and should be wrapped up by December of next year.

U.S. Army Corps of Engineers to Hold Public Workshop

Myrtle Beach, South Carolina – The U.S. Army Corps of Engineers has scheduled a public workshop to present information on the upcoming remedial investigation and feasibility study at the former Conway Bombing and Gunnery Range, a Formerly Used Defense Site located near Myrtle Beach, South Carolina. The public workshop will be on Thursday, November 5 from 6:30 to 8:30 p.m. at the Carolina Forest Elementary School, 285 Carolina Forest Blvd, Myrtle Beach, SC 29579. The public will be able to view displays and exhibits related to the ongoing investigation on the former Conway Bombing and Gunnery Range. Corps representatives will be on hand to answer any questions. Documents related to the site history are available for review in the government documents section of the Horry County Public Library in Conway, South Carolina. The public will also be able to discuss right-of-entry for their property with Corps representatives, and submit their right-of-entry at the workshop. For more information about the Formerly Used Defense Sites and the former Conway Bombing and Gunnery Range or for directions to the open house, contact the U.S. Army Corps of Engineers, Savannah District, Corporate Communications Office at (912) 652-5014 or access the information here: www.ConwayBGR.com

U.S. Army Corps of Engineers
to Hold Public Workshop

Myrtle Beach, South Carolina – The U.S. Army Corps of Engineers has scheduled a public workshop to present information on the upcoming remedial investigation and feasibility study at the former Conway Bombing and Gunnery Range, a Formerly Used Defense Site located near Myrtle Beach, South Carolina. The public workshop will be on Thursday, November 5 from 6:30 to 8:30 p.m. at the Carolina Forest Elementary School, 285 Carolina Forest Blvd, Myrtle Beach, SC 29579. The public will be able to view displays and exhibits related to the ongoing investigation on the former Conway Bombing and Gunnery Range. Corps representatives will be on hand to answer any questions. Documents related to the site history are available for review in the government documents section of the Horry County Public Library in Conway, South Carolina. The public will also be able to discuss right-of-entry for their property with Corps representatives, and submit their right-of-entry at the workshop. For more information about the Formerly Used Defense Sites and the former Conway Bombing and Gunnery Range or for directions to the open house, contact the U.S. Army Corps of Engineers, Savannah District, Corporate Communications Office at (912) 652-5014 or access the information here: www.ConwayBGR.com

301 Legals & Public Notices

NOTICE OF APPLICATION

Notice is hereby given that SMC Enterprises, LLC DBA Beer 30 intends to apply to the South Carolina Department of Revenue for a license/permit that will allow the sale and ON premises consumption of Beer, Wine and Liquor at 810 Highway 17 South of I-95, Curdessa Beach, SC 29575. To object to the issuance of this permit/application, a written protest must be received by the S.C. Department of Revenue no later than November 2, 2015. For a protest to be valid, it must be written, and should include the following information:
(1) The name, address and telephone number of the person filing the protest;
(2) The specific reasons why the applicant should be denied;
(3) That the person filing is willing to attend a hearing (if one is requested by the applicant);
(4) That the person resides in the same county where the proposed issue of business is located or within five miles of the business; and
(5) The name of the applicant and the address of the premises to be licensed.
Protests must be mailed to: S.C. Department of Revenue ATTN: ARL SECTION P.O. Box 135 Columbia, SC 29214 or faxed to: (803) 898-0110
000096221-0

NOTICE OF SERVICE

As of May 16, 2015 in the State of South Carolina County of Horry, Justina R. Sherman filed a judgment by default that will be entered against Paul Eugene Houtteker on December 2, 2015 at 9:30 am. You have 30 days from November 1, 2015 which is the first date of this publication to respond. Justina R. Sherman, 1107 Cherokee St. Apt. 106 Myrtle Beach, SC 29577
000096221-0

REQUEST FOR BIDS

R.H. Moore Company, Inc. is actively seeking M B E / W B E Subcontractors for use on the Curdessa/Myrtle Beach Water Line Interconnection Project. This project is to be bid on Thursday, November 5, 2015 @ 2:00 pm. See 0096225 for the following areas of work: Excavation, Grading, Hauling, Traffic Control, Asphalt Patching, Horizontal Directional Drilling, Bore & Jacking and Material Supplies. Plans and specifications may be viewed at the office of MBE Co., Inc. located on Hwy 707 in Myrtle Beach. Bids may be faxed to 843-650-0742. Our telephone is 843-650-7155. R.H. Moore Co., Inc. is an equal opportunity employer.

U.S. ARMY CORPS OF ENGINEERS TO HOLD PUBLIC WORKSHOP
Myrtle Beach, South Carolina - The U.S. Army Corps of Engineers has scheduled a public workshop to present information on the upcoming remedial investigation and feasibility study at the former Conway Bombing and Gunnery Range, a Formerly Used Defense Site located near Myrtle Beach, South Carolina. The public workshop will be on Thursday November 5 from 6:30 to 8:00 p.m. at the Carolina Forest Elementary School, 285 Carolina Forest Blvd, Myrtle Beach, SC 29575. The public will be able to view displays and exhibits related to the ongoing investigation of the former Conway Bombing and Gunnery Range. Corps representatives will be on hand to answer any questions. Documents related to the site history are available for review in the government documents section of the Horry County Public Library in Conway, South Carolina. The public will also be able to discuss right-of-entry for their property with Corps representatives and submit their right-of-entry at the workshop. For more information about the Formerly Used Defense Sites and the former Conway Bombing and Gunnery Range or for directions to the open house, contact the U.S. Army Corps of Engineers, Savannah District, Corporate Communications Office at (912) 632-6214 or access the information here: www.CERCLA.gov

Public Workshop Slide Presentation

FORMER CONWAY BOMBING AND GUNNERY RANGE REMEDIAL INVESTIGATION/FEASIBILITY STUDY HORRY COUNTY, SOUTH CAROLINA

PUBLIC WORKSHOP November 5, 2015

US Army Corps of Engineers
BUILDING STRONG

WELCOME

(Please sign in at the front desk)

Munitions and Explosives of Concern (MEC) Safety

RECOGNIZE

Military items can be
DANGEROUS.

RETREAT

DO NOT TOUCH IT!
Move away from the area.

REPORT

CALL 911.

Goals of the RI/FS Project

- Protect Human Health and Welfare
- Protect and Preserve the Environment
- Manage Risk

Project Delivery Team

US Army Corps of Engineers

US Army Corps
of Engineers

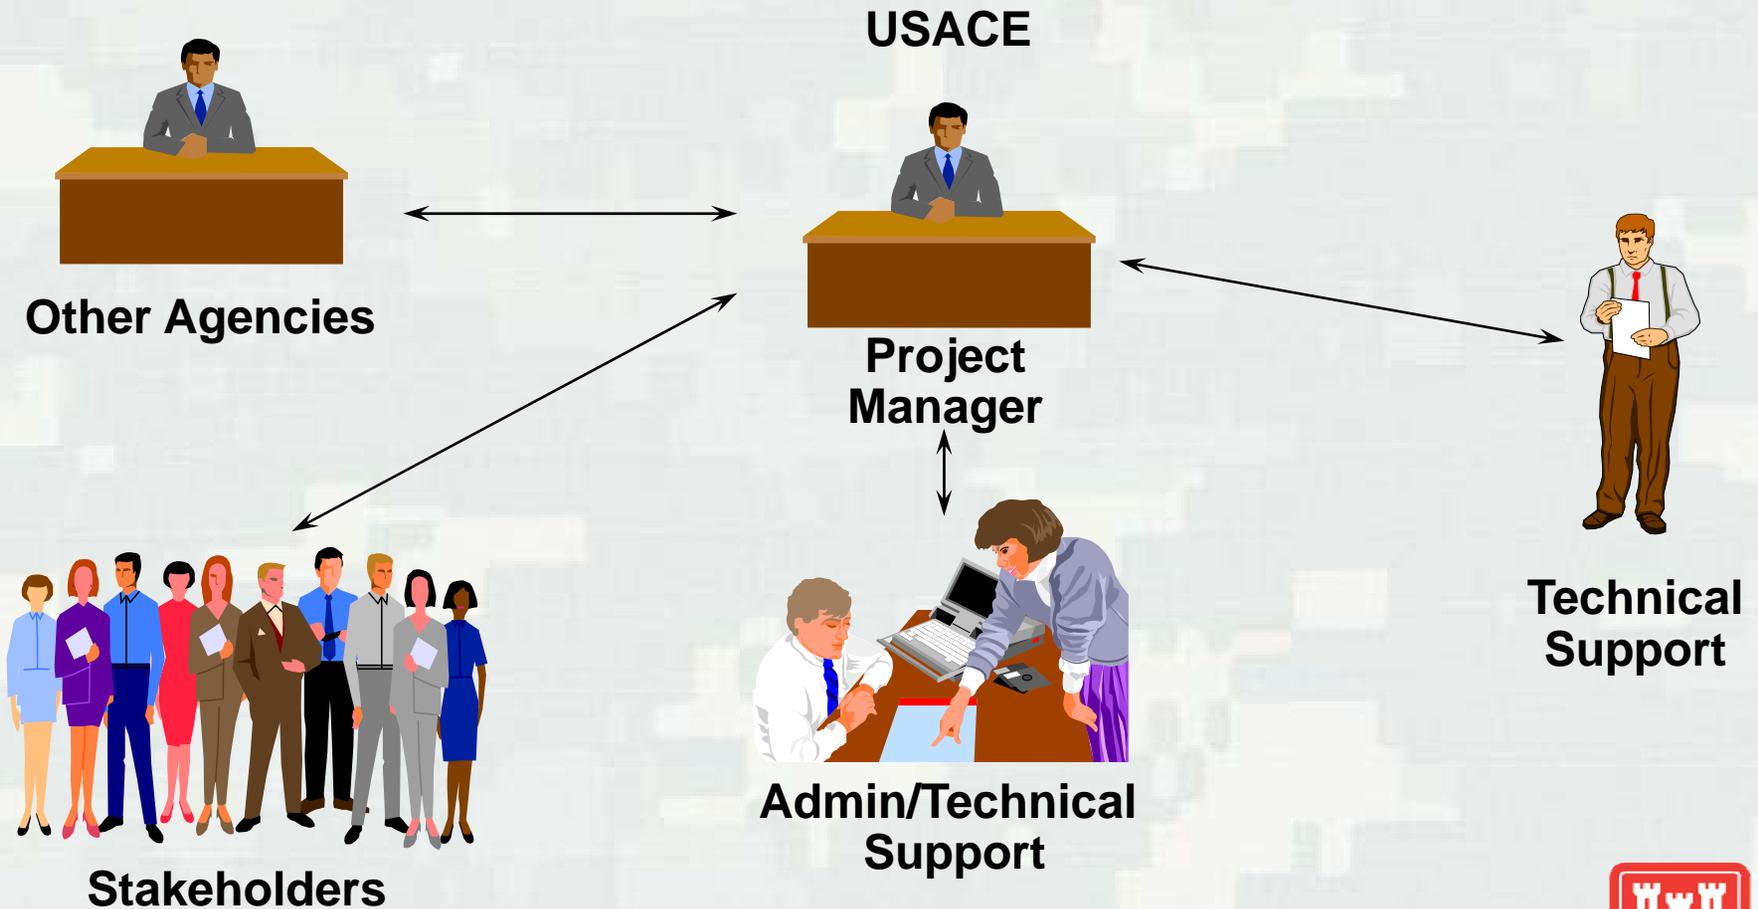

South Carolina Department of
Health and Environmental
Control

HydroGeoLogic, Inc. (HGL)

Project Team Composition

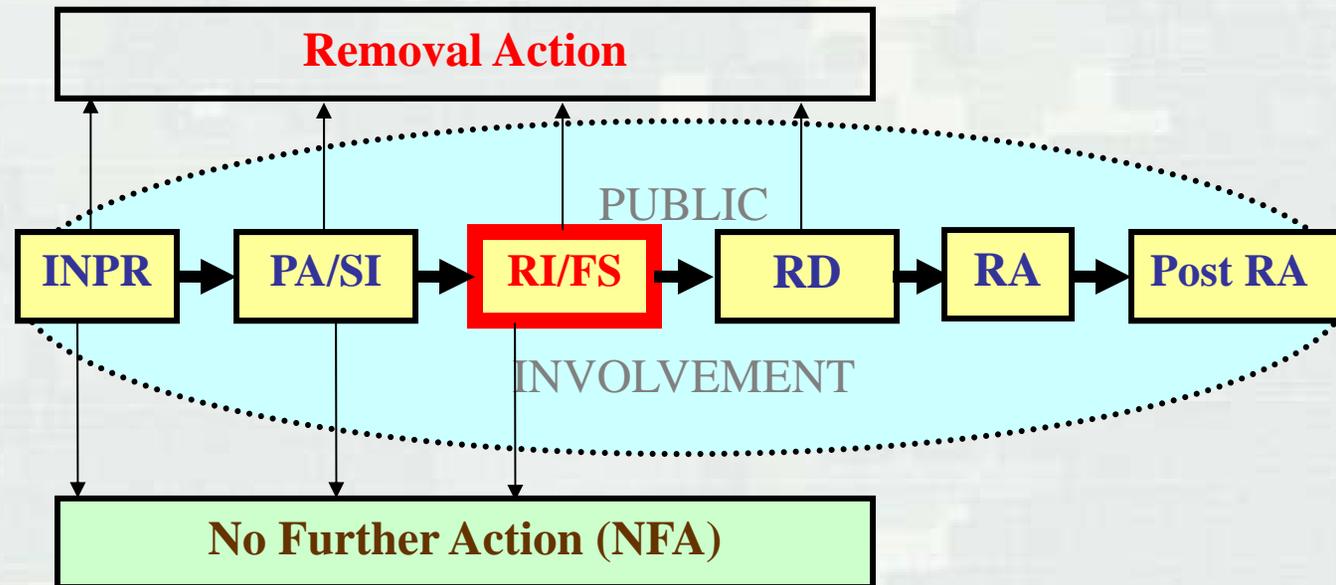

FUDS Program

- Congress established the Formerly Used Defense Sites (FUDS) Program in 1986.
- The USACE manages the FUDS program for the Department of Defense (DoD).

MMRP Project Process

MMRP: Military Munitions Response Program
INPR: Inventory Project Report
PA: Preliminary Assessment
SI: Site Inspection
RI/FS: Remedial Investigation/Feasibility Study
RD: Remedial Design
RA: Remedial Action

Munitions and Explosives of Concern (MEC)

Our focus is minimizing the safety hazards from MEC remaining at this FUDS site.

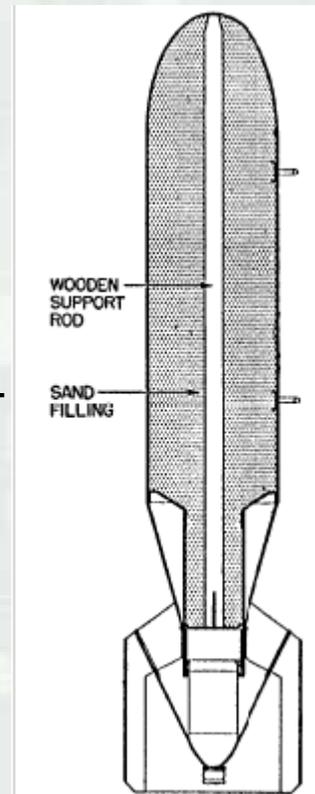

High Velocity Aircraft Rocket

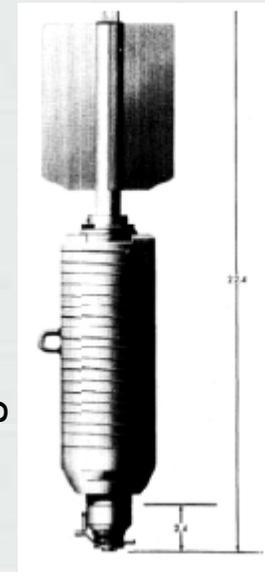

M63 37mm projectile

M38 100-lb practice bomb

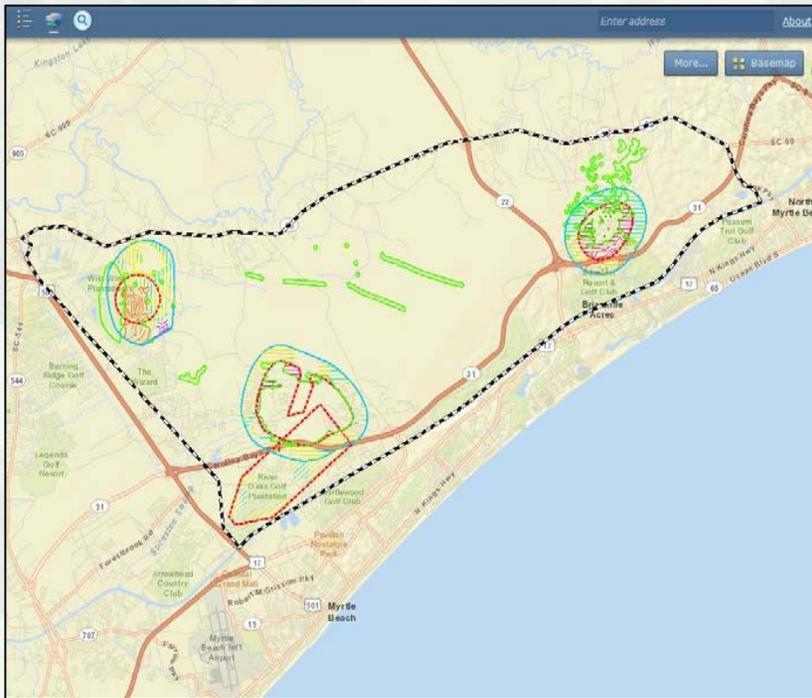

M41 20-lb Fragmentation Bomb

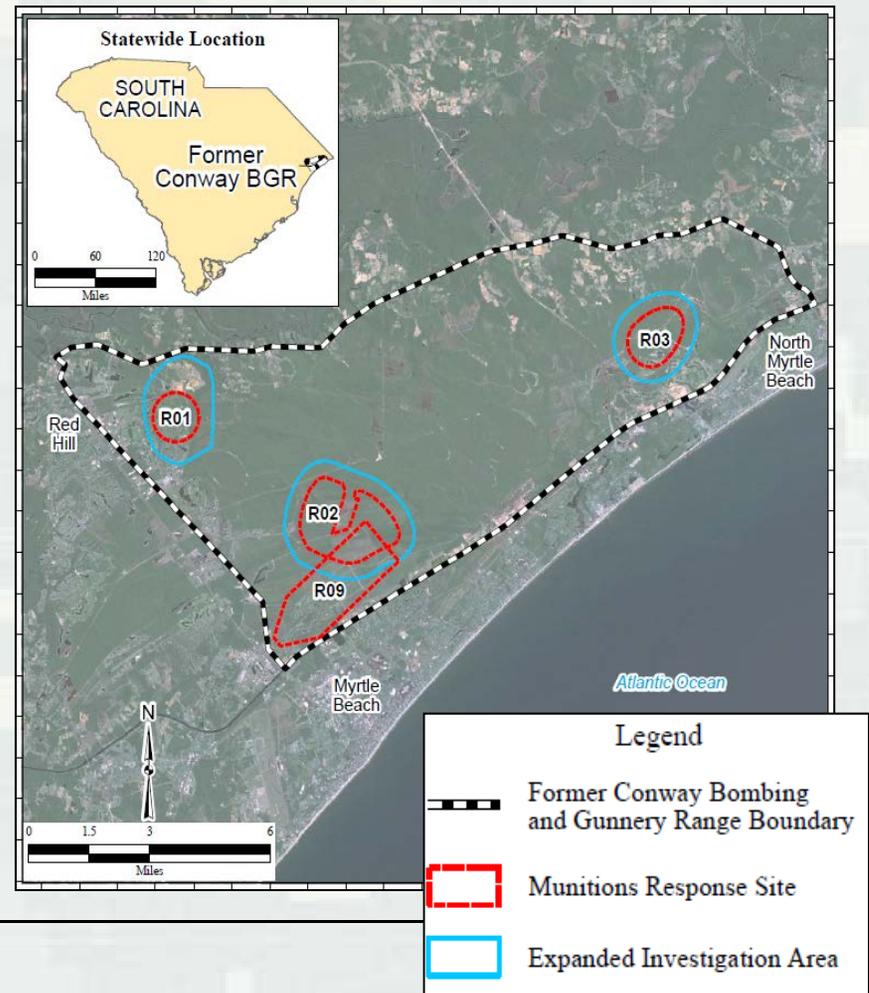

Past Investigations

- 1991: Preliminary Assessment by Twin City Testing-St. Louis
- 1991: Final Environmental Impact Statement by U.S. DOT
- 1994: Preliminary Assessment by USACE, Charleston District
- 1995: Site Investigation and Archives Search by USACE, Rock Island District
- 2003: Engineers Evaluation/Cost Analysis (EE/CA) By Parsons
- 2012: Remedial Investigation (RI) by EODT

General Location Map

Webmap Option to view MRS Locations
(ask a representative)

Munitions Response Sites (MRSs)

RI/FS Objectives and Tasks

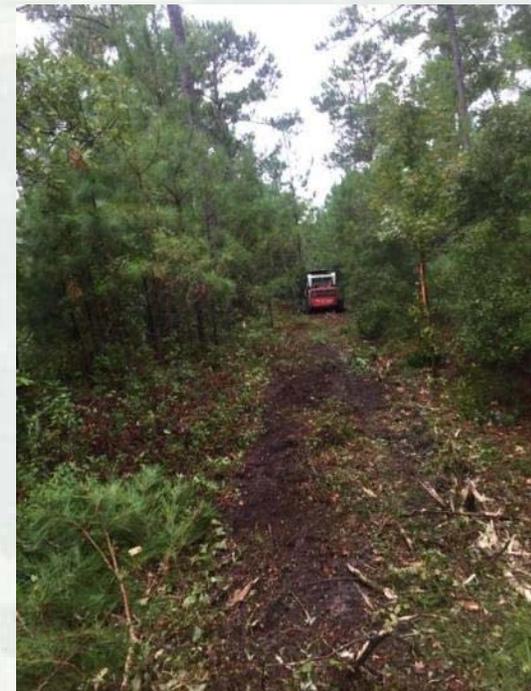

Define the **NATURE** and **EXTENT** of MEC Contamination

- Brush clearing
- Digital geophysical mapping (DGM) transect survey
- DGM grids survey followed by intrusive investigation within grids
- Environmental sampling for munitions constituents (MC)

Data Collected from Transects or Grids

- Brush clearance (mechanical or hand clearance)
 - ▶ Negotiated with landowner
- Linear transects designed to detect target areas with a 90% confidence
- Person portable geophysical survey
- Alternate transect approaches based on land use:
 - ▶ Golf courses, residential areas
 - ▶ Overland wooded, open, or wetlands areas

Brush Clearing

Transects and grids will be cleared of vegetation (based on landowner consent) to facilitate intrusive operations.

Surveying

Transect and grid locations will be recorded with GPS survey instruments.

Digital Geophysical Mapping

EM61-MK2

Data Logger

GPS for Positioning

Single 1-meter Coil

Intrusive Investigation Team

Instrument Operator
(Detects Anomalies
using a Metal
Detector)

UXO Technician
(Excavates
Anomalies using a
Shovel)

Data Logger
(Records Intrusive
Results)

Environmental Sampling

Soil Sampling

Sediment Sampling

Soil Sampling

Environmental Sampling

- Incremental sample methodology (ISM) samples will be obtained
- Subsurface samples will be collected with a hand auger or similar.
- ISM and discrete soil and sediment samples will be analyzed for explosives and select metals.*
- Background IS samples will be analyzed for select metals.*

* Lead and zinc

Remedial Investigation Report

- **Remedial Investigation**

- ▶ The first part will detail how the work was done and the results.

- **Risk Assessment**

- ▶ The second part will assess risk, specifically the following:

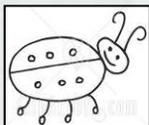

- MEC hazards

- ▶ Evaluates Explosive Hazards To Humans Presented by Munitions

- Human Health Risk

- ▶ Evaluates Risk to Human Health Presented by Munitions Constituents

- Ecological Risk

- ▶ Evaluates Risk to the Environment Presented by Munitions Constituents

What's Next?

- Obtain ROE: February – August 2015
- Final Work Plan: July 2015
- Fieldwork: August 2015 – January 2016*
- RI Report: July – October 2016
- Present future recommendations to the public: October – December 2016

* Pending Rights of Entry and Field Conditions

Review of MEC Safety

RECOGNIZE

**Military items can be
DANGEROUS.**

RETREAT

**DO NOT TOUCH IT!
Move away from the
area.**
