

Bradford County Elementary Envirothon

As explained in the narrative for the High School County Envirothon, the elementary school Envirothon competition generally works the same way as the other but involves testing materials and testing styles that are adapted to the grade levels and the PSSA testing topics that are most pertinent and appropriate for the schools and students involved. Last year was our first ever elementary school Envirothon event and after a great first year with this new program, we are always looking for additional teachers, schools and students to join in on this opportunity! Please consider contacting me if you are interested as a teacher, student, parent and/or administrator to find out more. We also are in great need of additional sponsors for this elementary contest that will allow us to financially support the expansion of the size and scope of the services we provide in this program.
