

# BRADFORD COUNTY CONSERVATION DISTRICT

## 2019 SEEDLING SALE

### EVERGREENS

**Colorado Blue Spruce**  
7-14"

One of the finest for Christmas trees, ornamental and windbreak use. Color ranges from blue-green to silvery blue. It is a quick growing tree that likes all types of soils that are moist, but well drained.

**Norway Spruce**  
10-15"

This graceful pyramidal has sharp, shiny, dark green needles. Beautiful spreading branches with drooping twigs. An extremely hardy tree that is successful under most soil conditions. Ideal for Christmas trees, ornamental, protective windbreaks, and timber.

**Black Spruce**  
5-10"

Native that grows well in most soil types even boggy situations. Needles are deep blue green and non prickly. Grows in a dense habit making it desirable for landscape and versatile windbreaks.

**Douglas Fir**  
12-18"

A splendid pyramidal evergreen conifer, with short-stalked flat, dark green or bluish-green needles, 3/4" to 1-1/4" long. Bears cones at maturity 2-4" long. A rapid grower, hardy tree that grows well in a variety of soils, but does best in deep well-drained soils. Beautiful Christmas tree, picturesque ornamental, windbreak, and can be sheared as a hedge.

### HARDWOODS/SHRUBS/FRUITS

**Sugar Maple**  
6-12"

Hardwood with rounded head, dense green foliage that has serrated 3-5 lobed leaves. Smooth silvery bark becomes darker as the tree ages. Maturity at 70-100 feet. Maple syrup and furniture.

**Black Locust**  
6-18"

One of the best soil conservation trees. Fast grower and will grow almost anywhere. Will build the soil while growing. Erosion control, timber products, fence posts, and makes excellent fire wood.

**White Oak**  
12-18"

Broad, round, dense head, spreading branches and purple-red fall color. Leaves remain on tree in winter, bark light gray and flaked. Acorns are much less bitter than the acorns of red oaks. Valuable wildlife food.

**Swamp White Oak**  
12-18"

An excellent wet land plant which will grow in moist to swampy soils. Good for wildlife, reforestation, and wetlands.

**Silky Dogwood**  
18-24"

Shrub form dogwood producing good wildlife cover and feed for birds. Berries produced are a pale blue with foliage turning a deep red in fall, used for borders, landscapes, and soil erosion.

**Butternut**  
24-36"

Also called White Walnut. Edible nuts resemble Black Walnuts, but smaller with an oily, spicy flavor. Tree is best known for the rich quality of its wood. Prefers moist, rich, well drained soil, but also tolerates drier, rocky soil conditions. Grows 40-60 feet and spreads 30-50 feet.

**Persimmon**  
6-12"

Growing to 60 feet, this native tree does well in difficult extremely dry soils. Fragrant white flowers in spring yield orange edible fruit in the fall and are a favorite of honeybees. More than one tree is needed for pollination to produce fruit.

**American Redbud**  
12-18"

A small flat-topped tree, producing pink blooms on bare stems in early spring. Foliage is large and heart shaped, changing to yellow in the fall. Does well in a protected location.

**Pachysandra  
Terminalis**

Grows in sun or shade, uniform height of 6-12". Excellent in masses under heavy shade trees. A dense, lustrous evergreen, trailing vine-type of ground cover. White flowers, March/ April. If planted 6" apart, it gives a pleasing effect immediately and in two years time will form a solid ground cover. Any soil, water liberally. Very Hardy. Terraces or anyplace grass is not successful.

**Black Raspberries**

Jewel black raspberries. June bearing.

**Strawberries**

Everbearing/Day Neutral Seascape. Large, firm, flavorful berries. Very productive in North East.

**Duke Blueberries**  
12-18"

Midseason, hardy big berries. They are self-pollinating but will produce more fruit if another variety is nearby. Different variety than last years sale.

**Bartlett Pear**  
4-6'

\*\*limited Supply\*\*

Standard pear up to 18' but you can prune to your liking. Pears like well draining light soil, like a sandy loam. If your soil is heavy clay, consider adding compost or moistened peat moss. They are self pollinating but produce more fruit if paired with another of the same kind

**Northeast Annual and Perennial Wildflower Mix:** A mixture of 23 varieties of annual, biennial, and perennial wildflowers selected especially for the northeast. Colors include white, pink, gold, yellow, violet, red, orange, purple, blue, scarlet, and coral. Seed at rate of 1/2 oz. per 100 square feet. List of seed included in mix available upon request.

### Food Plots:

**Premium Clover Blend**-blend of Premium Red, White, and Ladino clovers, suited to most sites in the northeast. Extreme wet or dry locations should be avoided. High-protein clovers are the underpinning to a complete foodplot system. (8 lbs.)

**Fall Brassica Blend**-Barkant Turnips, Barsica Rape, and Daikon Radish (2.5 lbs Turnips/Rape each and 1 lb Radish) Mix intended for mid-summer, early fall planting. Brassicas gain favor with deer when palatability increases significantly after a few frosts in the fall. Planting too early in the summer should be avoided if attractive forage is to be made available late in the year.
