

Dear Future Customers,

Green LED MFG provided most of our products only for the wholesale suppliers until now.

However, we announce our move for selling to the sign companies in the US market directly from our company. We are happy to offer the lowest prices for the best quality products.

We would like to present the information on our LED modules to the sign companies that have not yet seen or heard about our products. This will give you a chance to test, use, and compare our LED modules with others.

We are very confident that this is a valuable opportunity for your company to save money and satisfy your customers with better quality products.

Thank you very much,

Everyone at Green LED MFG.

We are Green LED MFG.
