Depths of Nature **By Rachel Watson**

31st August – 20th September 2017
Crowborough Community Centre

Theme

Nature consisting of plants, insects and animals.

Medium

Encaustic wax, drawing and transfer on deep cradled wood panels.

Description

Handmade cradled wooden panels with nature style drawings of plants, insects and small animals combined with encaustic wax painting techniques and transfer.

The Title

represents a visual collection of drawings from nature.

Whether plants, insects or small animals the concept is of simplicity and beauty. The choice of medium works to enable the original drawings to work independently with subtle colour being added through encaustic wax paint and encaustic wax medium to build depth and a smooth finish. The works are all created on handmade deep cradled wooden panels 15 cm x 70 cm (some portrait, some landscape) depending on the composition.

Do come and take a look!
