

On June 1, 2015, BORIDE Engineered Abrasives will acquire Adamas Laboratory Corporation, the manufacturer of Adamas Diamond Compounds. We are working closely with the Adamas management team to ensure that you continue to receive quality product and great service.

As part of the transition, the manufacturing of Adamas Diamond Compounds will be moved to BORIDE's Michigan location. **This move will require us to temporarily suspend product shipments for up to one week starting on June 1st.**

The phone and fax numbers for Adamas will remain the same and will be forwarded to the BORIDE team.

Our distributor of Adamas compounds in Canada is Component Guys Inc. and they will handle your orders directly. All orders and payments should be made through Component Guys Inc., as this will ensure you will continue to receive the best service and quickest delivery.

The BORIDE Sales and/or Customer Service team are also available to answer product questions. Contact information for both companies is below:

As you may already know, BORIDE Engineered Abrasives is an ISO-Certified manufacturer of abrasive products. We currently manufacture mold polishing stones, dressing sticks, industrial wheels and floor polishing products in our Traverse City, Michigan location. As part of the ISO certification, we have documented quality control standards in place to ensure product quality and consistency. BORIDE is known in the mold polishing industry as a supplier with great customer service and short lead times.

Please feel free to contact your Sales Manager if you have any questions or concerns during the transition. Thank you for your business and we look forward to working with you.
