## About Social Seducement

The Social Seducement project is co-funded by the European Commission in the frame of the Erasmus plus programme and running for 3 years (September 2014 to August 2017). It aims to develop the key competences and skills of adults with disadvantages, and in particular unemployed adults, to help them start up a collaborative enterprise.

Our approach is to set up an educational process which mobilises unknown or hidden capacities via an empowering learning process.

We will do this by:

- **Designing an online role-play game** to develop, enhance and promote social entrepreneurial skills
- **Enhancing collaboration among training centres, employment agencies, social economy enterprises** to test the Social Seducement online roleplay game
- **Establishing a European network of facilitators** who will have the mission to a) guide unemployed learners through the social seducement game, supporting and mediating their learning process and b) promote the use of the Social Seducement game in Europe to foster the acquisition of social entrepreneurship skills in an innovative way.

With Social Seducement we aim to strengthen the cooperation between education and training, work and the social economy, non-profit and voluntary sectors, in a EU dimension, Social Seducement to maximise impact on individuals and our game.

To know more about the project please visit our website: [www.socialseducement.net](http://www.socialseducement.net)

## Executive Summary

Intellectual Output 10, coordinated by REVES, aimed to implement an awareness-raising campaign on content and implementation of the project “Social Seducement” (and of its main output, the “SocialPlaNet” serious game).

The objectives of the campaign can be summarized as follows:

- a) to get in direct touch with stakeholders in order to disseminate information on the online role play game, the (future) network of facilitators and other outputs/outcome of the Social Seducement project,
- b) to encourage the use of the online role play game beyond test organizations, attracting the interest of potential facilitators and encouraging the involvement of the latter in the network of facilitators;
- c) to collect feedback on the game and further project outputs/outcomes.

The partnership decided to concentrate the campaign on the pilot test period of the game (after finalisation of the beta-version of the game). In the preceding period (before the piloting phase), awareness-raising was basically covered by dissemination activities.

The campaign lasted from autumn/winter 2016/2017 to August 2017 and focused on five types of action:

- 1) European and national events
- 2) “Street actions”
- 3) “Campus actions”
- 4) “Spotlight actions”
- 5) Wider awareness-raising at European level

REVES, TIHR, UNIR, Le Mat and Coompanion contributed in different ways to their implementation.

Awareness-raising activities at EU level were mainly carried out mainly by REVES. During the whole period, REVES could draw on the support of many of its members (ca. 40 policy makers, 62 social economy organisations and one larger civil society network). In addition, three REVES members tested the entire game, and a fourth declared an interest to develop the game further in order to use it for own activities.

Coompanion contributed to the organisation of a first European awareness-raising event that was held in March 2017 in Göteborg and that preceded the final conference which was organised by REVES in June 2017 in Brussels.

TIHR, UNIR and Le Mat focused mainly on activities at national level, including a number of local events (in one case with the involvement of organisations from other European countries).

Street actions were realized mainly by REVES, THIR, UNIR and LE MAT – either through the targeted distribution of information material or through the organisation of meetings and story telling activities.

“Campus actions” involved VET institutions, universities and their students in Belgium, Italy, United Kingdom and Spain. Spotlight actions, in turn, included the publication of posts and articles in social media and on relevant websites (e.g. Open Education Europa Platform), mailings or the presentation of the project at various national and European conferences – these activities and channels appeared most appropriate given the scope and target groups of the project.

## Informe sintético

El objetivo del "IO10", coordinado por REVES, era realizar una campaña de sensibilización sobre los contenidos y el desarrollo del proyecto "Social Seducement" y también sobre su producto más importante (el serious game "SocialPlaNet").

La campaña apuntó a lograr estos propósitos:

- a) Ponerse en contacto con las partes interesadas para divulgar informaciones sobre el juego en línea, la (futura) red de facilitadores y otros resultados del proyecto Social Seducement.
- b) Alentar a organizaciones, que no habían tenido la tarea de experimentar el juego, a utilizarlo, así que otros potenciales facilitadores se interesen y fomentar su participación en la red de facilitadores.
- c) Recopilar comentarios sobre el juego y los principales resultados del proyecto.

Entonces, el partenariado decidió enfocar la campaña en el período que coincidió con la fase piloto del juego (es decir, después de finalizar la versión beta). En el período precedente, es decir, antes de la acción piloto, las actividades de sensibilización coincidieron con las actividades de difusión.

La campaña de sensibilización se desarrolló en el otoño - invierno 2016/2017, extendiéndose hasta el final del proyecto (agosto 2017), centrándose en 5 áreas de acción:

- 6) Eventos europeos y nacionales
- 7) "Street actions"
- 8) "Campus actions"
- 9) "Spotlight actions"
- 10) Acciones de sensibilización de largo alcance, a nivel europeo.

REVES, TIHR, UNIR, Le Mat y Coompanion han contribuido de manera diferente a la realización de las acciones.

Las acciones de sensibilización a nivel europeo se llevaron a cabo principalmente por la red REVES. A lo largo del proyecto, REVES se benefició del apoyo de una gran cantidad de miembros /representantes (alrededor de 40 policy makers, 62 organizaciones de la economía social y una red de la sociedad civil), para la divulgación de los resultados del proyecto. Además, 3 miembros quisieron experimentar directamente con el juego, y un cuarto expresó su interés en seguir desarrollando el juego para poderlo utilizar en sus actividades institucionales. Coompanion contribuyó, por su parte, a la organización de un primer evento europeo de sensibilización en marzo de 2017 en Gotemburgo, que precedió a un evento final organizado por REVES en junio de 2017 en Bruselas.

TIHR, UNIR e Le Mat se centraron más en las acciones nacionales, organizando una serie de eventos locales. En un evento local participaron también operadores de otros países europeos.

Las acciones callejeras fueron llevadas a cabo principalmente por REVES, THIR, UNIR y Le Mat a través de la distribución selectiva de material de información y mediante la organización de momentos de encuentro y experiencias de "narración de historias".

Las "campus actions" involucraron estudiantes en Bélgica, Italia, el Reino Unido y España, mientras que las acciones "spot-light", como el envío de material de información a las listas de correo de los miembros del partenariado, o la presentación de actividades del proyecto en conferencias nacionales y europeas, así como la divulgación a través de redes sociales y plataformas web tanto generales como específicas (como, por ejemplo, la Open Education Europa Platform), completan la campaña de sensibilización más que adecuada al propósito establecido por el proyecto.

## Nota sintetica

Lo scopo del “IO10”, coordinato da REVES, era quello di implementare una campagna di “awareness raising” sui contenuti e l’implementazione del progetto “Social Seducement” (e del prodotto principale del progetto, il serious game “SocialPlaNet”).

Lo scopo della campagna può essere riassunto come segue:

- d) Entrare in contatto con gli stakeholders allo scopo di disseminare informazioni circa il gioco online, il (futuro) network di facilitatori e altri risultati del progetto social seducement,
- e) Incoraggiare l’uso del gioco di ruolo online al di fuori del novero delle organizzazioni incaricate di testarlo, in modo da attrarre l’interesse di potenziali facilitatori e di incoraggiare il coinvolgimento di questi ultimi nella rete dei facilitatori
- f) Raccogliere feedback sul gioco e sui principali risultati del progetto.

La partnership ha quindi deciso di concentrare la campagna nel periodo coincidente con la fase pilota del gioco (vale a dire dopo la finalizzazione della versione beta). Nel periodo precedente, vale a dire prima dell’azione pilota, le attività di awareness raising sono coincise con quelle di disseminazione.

La campagna vera e propria ha coperto il periodo autunno/inverno 2016/2017, estendendosi poi fino alla fine del progetto (Agosto 2017), concentrandosi su 5 aree di azione:

- 11) Eventi Europei e nazionali
- 12) “Street actions”
- 13) “campus actions”
- 14) Azioni ‘spotlight’
- 15) Azioni di awareness raising largo, a livello Europeo

REVES, TIHR, UNIR, Le Mat and Coompanion hanno contribuito in diverso modo alla realizzazione delle azioni.

Le azioni a livello Europeo sono state principalmente condotte dalla rete REVES. Durante l’intera durata, REVES ha beneficiato del supporto di un numero importante di membri/rappresentanti (ca. 40 policy makers, 62 organizzazioni dell’economia sociale ed un network della società civile), per la diffusione dei risultati del progetto. In aggiunta, 3 membri hanno voluto sperimentare direttamente il gioco, ed un quarto ha dichiarato interesse a sviluppare ulteriormente il gioco per poterlo usare nelle proprie attività istituzionali.

Coompanion ha contribuito, per parte sua, all’organizzazione di un primo evento di awareness raising Europeo, nel Marzo 2017 a Göteborg, che ha preceduto un evento finale organizzato da REVES in Giugno 2017 a Bruxelles.

TIHR, UNIR e Le Mat si sono concentrati maggiormente sulle azioni a carattere nazionale, organizzando un certo numero di eventi a dimensione locale, ed, in un caso, con il coinvolgimento di operatori di altri paesi Europei.

Le azioni di strada sono state realizzate principalmente da REVES, THIR, UNIR e LEMAT attraverso sia la distribuzione mirata di materiale informativo sia attraverso l’organizzazione di momenti di incontro ed esperienze di “story telling”.

Le “campus actions” hanno visto il coinvolgimento di diversi studenti in Belgio, Italia, Regno Unito e Spagna, mentre azioni “spotlight”, come l’invio di materiale informativo a mailing lists dei partners o presentazione delle attività di progetto in occasione di conferenze nazionali ed Europee, come pure la sensibilizzazione attraverso social media e piattaforme web sia generali, sia specifici, come ad esempio la Open Education Europa Platform, completano il quadro di un’azione di awareness raising più che adeguata allo scopo prefisso dal progetto.

## 1. About the Project

IO 10, coordinated by REVES, had the objective to develop and implement an Awareness-Raising Campaign.

The aim of the campaign was

a) to get in direct touch with stakeholders to disseminate information on the online role play game, the (future) network of facilitators and other outputs/outcome of the Social Seducement project,

b) to encourage the use of the online role play game beyond test organizations, attracting the interest of potential facilitators and encouraging the involvement of the latter in the network of facilitators;

c) to collect feedback on the game and further project outputs/outcomes.

The partnership had decided to concentrate the awareness-raising campaign as such on the period starting with the piloting of the game (i.e. after finalization of the first beta-version of the game). In the period preceding piloting, awareness-raising activities regarding the project as such coincided actually with dissemination.

The table below illustrates the target groups of the IO 10 awareness-raising campaign and the respective objectives linked to a specific group.

### 1.1. Table 1: Objectives

| Target group                            | Objective  |
|---|--|
| Public authorities (including agencies) | <ul style="list-style-type: none"> <li>- Spreading information on the (pedagogical) model and the game</li> <li>- Encouraging use of the game</li> <li>- Collecting feedback</li> </ul>  |
| Policy-makers                           | <ul style="list-style-type: none"> <li>- Spreading information on the (pedagogical) model and the game</li> <li>- Encouraging use of the game</li> <li>- Encouraging a re-thinking of policy-instruments aimed to promote job</li> </ul> |

## 2. Awareness-raising report

Campaign activities lasted from autumn/winter 2016/2017 until the end of the project phase (August 2017). Given the important additional time investment by partners in the development and testing of the game and given the engagement of each partner in IO 9 dissemination activities (which contributed as such to raising the awareness of different target groups on the project more in general), it appeared useful to concentrate awareness-raising activities on the beta-version of the game and the testing phase. The awareness-raising strategy (incl. description of ARC critical path and toolbox) was developed in cooperation with the partners. Following discussion *of* and agreement *on* the general strategy, including timelines and tools to be used, each partner organisation developed its specific awareness-raising plan. Based on this work, REVES created tools such as adaptable sample leaflets, youtube tutorials, a video (Torres Vedras) or an article that were put at the disposal of partners.

During the conception of the awareness-strategy, the five type of actions indicated in the project description (street actions, campus actions, cooperative actions, spotlight actions, voice actions) were revised and adapted to the concrete needs for action and their target groups. Voice actions which were supposed to stimulate dialogue with policy and decision-makers have been renamed and were realized in the framework of ‘national and/or European events’ and ‘street actions’ (which also included meetings with some policy-makers/public authorities and distribution of information on the game at the offices of public authorities). “Cooperative Actions” aiming to reach social economy were considered by the partners as an activity that was as such already part of all other types of action and should not have been considered as a separate element.

Media relations (and the related strategy) were developed and realized under “Spotlight actions” with a specific focus on social media, as partners considered this a main channel to reach out to the main target groups of the project (potential users and/or promoters of the game, including the final beneficiaries).

Campaign activities turned thus around the following five fields of action:

## 1. National and/or European events

The aim here was to stimulating thinking about another model of entrepreneurship education, collect feedback about the Social Seducement pedagogical model, the SocialPlaNet game and the facilitator network, as well as to stimulate use of the game/the model.

Target groups were public authorities (policy-makers and administration), social economy organizations, VET education bodies, civil society, trainers, researchers/academics and – in the case of EU-level events – their European organizations/networks.

2. Street Actions were designed to identify possible other test players or future players (including ‘community leaders’ able, for example, to launch and facilitate/accompany gaming processes), i.e. to stimulate test/use of the game and, more in general, to raise the awareness of different type of persons or organisations on social economy entrepreneurship and orientate persons towards organizations/agencies working on/with social economy entrepreneurship. They targeted mainly social economy organizations, VET education bodies, civil society organizations in general (community organizations etc.), trainers (to-be-facilitators) and unemployed.

3. Campus Actions focused on awareness-raising in the academic field, targeting representatives of universities and other VET education bodies, social economy organizations active in the field of work orientation, training etc., students (not only of universities)/trainees and youth organizations.

Their objective was to spread information on the (pedagogic) model and the game as well as to identify, if possible, shadow facilitators and other test players/future players.

4. Spotlight Actions (media relations) were to target specialized media linked to the social economy sector, entrepreneurship, education and the different target groups. Moreover, they included awareness-raising through social media.

Their aim was to reach higher awareness of the existence of the game, but also of the features of social economy and of the pedagogical model underlying the game. Furthermore, they were to serve further dissemination of information on the game etc.

At the same time, specific actions were developed to foster exchange and social networking within the community of facilitators/players (meetings, skype calls, facebook ...).

5. Wider awareness-raising activities at EU level had the objective to spread information on the game and its pedagogic model, to stimulate test and use of SocialPlaNet, to identify and recruit possible facilitators, discuss the effective scaling-up of the model and to launch a discussion on existing employment policies/policies to promote entrepreneurship/education policies. Main targets were European social economy

platforms, networks/platforms of public authorities, European (civil society) organizations, including ILO and OECD, other European (Erasmus) projects focusing on similar topics as well as EU institutions and bodies (incl. EP and different intergroups, CoR, EESC ...).

REVES, TIHR, UNIR, Le Mat and Coompanion contributed to the implementation of awareness-raising actions.

Here an overview of the initiatives carried out by each partner at the European/ national level (supporting documents and proofs will be attached at the end of this report):

## 2.1 European events

A **first European event** in the framework of the Social Seducement project was organised by Coompanion, with support from REVES, on 2 March 2017 in Gothenburg. The objective here was to present the Social Seducement project, the beta-version of the game, to recruit possible additional facilitators and test players, and to provide participants with an impression of the local/regional context (Gothenburg/West Sweden) in which the game was to be tested. Approximately 35 participants from seven EU Member States and Palestine took part in the seminar. As a very concrete results, three REVES members (an Italian consortium of social cooperatives, a Portuguese city and a Greek development agency), which had been mobilized by the REVES network to attend the seminar, signaled their interest to test the game.

The **Social Seducement final conference**, organized by REVES aisbl on 7 June 2017, involved about 60 participants representing social economy organizations, development agencies, public authorities, universities and other education/training institutions, think tanks and (European) networks from different EU Member States and Montenegro. The event has been the occasion for presenting the final outcome of the project, providing an insight into the Belgian context concerning the creation of social economy enterprises, discussing the usefulness of online role play games to promote social economy entrepreneurship, and of course to distribute relevant info materials (mostly leaflets – approximately 50). The success of the SocialPlaNet idea has been once more confirmed by the interest, from 5 participants (legal persons), including an organisation from Montenegro that came on purpose to learn more about SocialPlaNet to test the game within their own organizations (a test session with the organisation from Montenegro was held some days after the conference). Damnet, a workers' cooperative that figured among the speakers of the morning, reflected on the possibility to use the game as an instrument in the training of newly arrived team members.

## 2.2 National events

Two events organized by Le Mat took place in Riva del Garda (Italy) and Perugia (Italy), in September 2016 and April 2017. For the first occasion – the annual meeting of IRIS Network - the actors involved were social enterprises (100), social economy research organizations (30), training organizations (20), young university students (50); during the second event - Innamoratevi dell'Impresa Sociale -, several Social Enterprise development agencies (3), Universities (5), young and elder unemployed people (25), associations (4), social enterprises and experts (10) participated. Lots of people asked for more information about the project and showed an interest in using the game (about 60 in total).

In March 2017, Universidad Internacional de la Rioja (UNIR) hosted, in Madrid, the event “Juegos serios para la inclusion social” involving 15 representatives (in addition to 7 internal UNIR staff) of small companies, social entrepreneurs, policy makers, teachers and public universities: participants showed a great interest for the project and the game, asking about the possibility to test and further develop the latter.

## 2.3 Street actions

From May to July 2017 REVES distributed, in Brussels and Wallonia, a number of leaflets at the premises of employment agencies, training organizations etc., targeting therewith policy makers at local level (1), public authorities (11), social economy organizations/NGOs (10), and – indirectly (through the abovementioned bodies) – unemployed people.

In April 2017, REVES also organised a meeting with the city administration of the city of Kortrijk (responsible for social economy and for employment and training) in order to present the project and the game.

In Italy, Le Mat carried out street actions and storytelling activities in order to keep persons and social enterprises updated about the game, the piloting and progress of players and the theme of social entrepreneurial training: this way, 300 people, 50 training and development agencies and 100 social enterprises and others have been reached via social media channels, meetings and through the distribution of informative material. Lots of them have showed an interest in a further development of the game, as well as to test the same.

UNIR organised additional street actions and a presentation of the game within a roundtable in June 2017 in Spain (Tenerife) June. This was done in the frame of the V Congreso Internacional de Videojuegos y Educacion, addressing 106 representatives of higher education institutions with expertise in games for learning and game designers,

some of which (2) asked for more information and about the possibility to test the game. The event has been widely disseminated via social media channels and some informative materials (e.g. 40 t-shirt carrying the logo of the project) have been distributed.

In England, TIHR – the Tavistock Institute of Human Relations carried out some street actions and storytelling activities addressing via email a series of actors, including social investment organizations (2), a relationship and investment manager, an entrepreneur and philanthropist, (1) Hatch enterprise programme manager and 38 contacts (been emailed twice) across all target groups from London Seminar, held in November 2017. Some experts among them expressed their interest to discuss further the project and attend the final event in Brussels. One of them also provided advices on running enterprises, on the barriers organizations might see to taking up the game and using it sustainably, and on generally what supports successful entrepreneurship. Hatch Enterprise also proposed Tavistock to participate in the Summer of Change festival, London 3-15 August 2017, to discuss the future of 'Social Business' and to raise awareness of and promote the SocialPlaNet game through a panel discussion and the distribution of informative material.

TIHR had the possibility to encourage 1 contact in local council (government), in locality of Hatch Enterprise (Southwark), to collaborate with Hatch to support social enterprise business start ups.

Finally, TIHR organized a video installation in central London including a ca 10-minute clip of the SocialPlaNet game, accompanied by the distribution of Social Seducement leaflets and results brochure.

## 2.4 Campus actions

During the period May-June 2017, some university teachers, trainers and students (35 in total) from the Vrije Universiteit Brussels and schools for social workers in Belgium have been encouraged by REVES via e-mails and leaflets to spread information about and use the game: 4 VUB students and 1 student from the school for social workers have tested the game; 1 person teaching social economy entrepreneurship from the latter school requested to do the same.

From July 2016 until the end of the game, REVES also mobilised persons representing VIVES College (Kortrijk) who finally tested the game. The positive impact of this activity will be translated in the inclusion of the game in the social economy course scheduled for the autumn/winter semester 2017/2018.

From October 2016 to March 2017, REVES has carried out a conversation and e-mail exchange with the French association and training provider Arobase, which finally

attended the Social Seducement final conference and is considering to integrate extracts of short videos of the event (filmed by Arobase) into a MOOC on social economy which is currently being created.

In May 2017, SocialPlaNet has been presented during the International Training Week, organized in Rome by the Italian Centre for Permanent Learning (CIAPE), following the contact built by REVES with 2 people employed in the organization: 26 adult education professionals from Italy, Namibia, Spain, Poland and UK have been reached during that event and some of them expressed their interest in testing the game.

In May, REVES also published an article on the Open Education Europa Platform, targeting in general education and training providers (the platform's users).

In Italy, Le Mat organized several campus actions in Perugia, Ravenna and Belluno (Italy), reaching and involving 4 training organizations, 14 social economy enterprises and 70 students/locals.

Further campus actions were realized by UNIR in Spain in order to raise awareness among UNIR staff (professors and researchers) about the project and the possibility to take part in the piloting phase: one person showed interest in collaborating, but dropped off when explained the tasks to be carried out.

THIR (Tavistock Institute of Human Relations) gave a formal slide presentation to University of Tennessee State psychology students, including a presentation of the Social Seducement project and the game SocialPlaNet, and organized a lunchtime talk on 'Social Seducement: a new support for creating social economy enterprises', attended also by a young adult's employment services organization staff member, interested in using game. SocialPlaNet has also been presented to the Council members of the Tavistock Institute at a council meeting for their expertise and feedback on the game: after the presentation, Pro vice chancellor of University of Hertfordshire invited Tavistock to present the game to their Careers Advisory Service staff.

## 2.5 Spotlight actions

From September 2016 to July 2017, several spotlights actions (mainly via email, websites and social media) were implemented by REVES in order to encourage media and media users to spread information on/test the game (data and other details in annex). REVES also published an interview with a facilitator taking part in the piloting phase on the Open Education Europa Platform.

Also TIHR, UNIR and Le Mat have been spreading information around piloting in their countries, different events etc. in social media.

## 2.6 Wider dissemination at EU level

Activities in this field were mainly carried out by the REVES network. During the whole project duration, REVES has been supported by a number of members/representatives (policy makers – 40; social economy organizations – 62; civil society networks – 1) in spreading the project and its outputs. Moreover, three of its members have tested the game; 1 member wishes to further develop the game and use it for its training purposes.

Following awareness-raising activities among non-members, the project had a great echo also among non-members (e.g. organizations and network such as Social Economy Europe, Social Platform, various Italian social cooperatives – members of DIESIS), which invited REVES to present the game in the frame of conferences/seminars (e.g. “Social Keys” or “Social Entrepreneurship in training and education: Developing skills for social entrepreneurs and breaking barriers to migrants’ entrepreneurship”). These interventions have been followed by the requests of other organizations to be kept informed on the development of the game and further events (Montenegro) and to test the game (Young Foundation, UK; Caritas Gdynia, PL); an invitation by OECD LEED programme to join task force for development of another online tool; the request by an Italian social cooperative/consortium working on an online tool to share experiences.

Partners from the EMISE+ Erasmus+ project took part in the final conference of the Social Seducement project, organized by REVES aisbl. They used the occasion to film parts of the intervention in order to eventually spread extracts in the framework of a MOOC on social economy which is currently being designed.

Moreover, REVES used the occasion of the REVES Excellence Award conference (8 June 2017), involving also VET education bodies and the European Entrepreneurship Education Summit (11-12 June 2017) to distribute information leaflets on the SocialPlaNet game (respectively 65 and 75 leaflets).

Le Mat Europe Assembly has been the occasion for the Le Mat network to put in place a European level event, involving 14 social co-operatives from 5 EU countries, showing a great interest in the subject and declaring to be potential users of the game. Further scaling-up events have been organized with the presence of social enterprises (50), experts in training and job creation (20) and development agencies coming from Sweden, UK, Slovenia, Bosnia-Herzegovina, Hungary, Austria, Germany and Greece.

TIHR – Tavistock Institute of Human Relations - introduced the SocialPlaNet game in a private consultation followed up with email with relevant material and web links, to Legacoop Toscana, Florence, Italy; they run a training and acceleration programme with 3 business ideas to be turned into 3 co-operatives.

The meeting with Euro-com, a global translation business, helped to evaluate the possibility of taking the game into other markets, exploring the role of culturally appropriate translation of the content. This led to the identification of Germany (migrants) as a possible market in which to raise awareness of the game.

TIHR also took part in the Social seducement final event in Brussels and led a presentation of learning about making the game and the Social seducement project; about piloting the game and the learning from facilitator's feedback and the evaluation findings; and about the social investment funding climate in the UK. The intervention made it possible to achieve a comparative awareness of differences in social enterprise context in UK compared to co-operative context in Europe.

### 3. Monitoring and evaluation

Throughout the whole campaign REVES organised short phone calls, skype calls, meetings or sent out e-mails to partners and relevant stakeholders in order to gather

- a) feedback from awareness-raising activities (from partners) and
- b) perceptions on the project, the usefulness of the game and open questions (from external organizations).

In the case of the final conference in Brussels an online evaluation was realized by REVES.

These activities were complemented by evaluation actions carried out by TIHR.

The awareness-raising campaign ended in August 2017. It is therefore difficult to gather more detailed quantitative data.

However, in general, the campaign showed the following results:

1. It led to the recruitment of additional facilitators.
2. A number of organizations considered (further) testing and/or use of the game and asked for access/help/'guided tours' on the gaming platform.
3. At least one organisation showed its interest to develop the game further and use it in its activities.

4. The project, game and campaign led, in a number of organizations and public authorities, to a re-thinking of concepts of and tools for (social economy) entrepreneurship education, but also to a review of instruments for intra-organisational exchange and participation.

## Annex 1 - General IO 10 Strategy

### Questionnaire on awareness-raising activities carried out by the partner organisation

**Name of the partner organisation:**

1. **National events:** Are you organizing a national event? If so, please fill in the table below.

| When | Where | Title and objectives (including main points on the agenda) | Target groups | Means of communication used |
|------|-------|--|---------------|-----------------------------|
|      |       |  |               |                             |

2. **European events:** Are you organizing a European event? If so, please fill in the table below.

| When | Where | Objective (including main points on the | Target groups | Means of communication used |
|------|-------|---|---------------|-----------------------------|
|      |       |   |               |                             |

|  |  |                |  |  |
|--|--|----------------|--|--|
|  |  | <b>agenda)</b> |  |  |
|  |  |                |  |  |

### 3. **Street actions** (and Storytelling): What are you planning (or already doing)?

| <b>When</b> | <b>Objective</b><br>(e.g. encouraging institutions/organisations to use the game; encouraging unemployed persons to get in touch with organizations using the game) | <b>Target group(s)</b> | <b>Means of communication used</b><br>(including participation in external events) | <b>Where</b> (e.g. at the premises of a training organisation; at a community centre; waiting room of an employment agency...) |
|-------------|---|------------------------|--|--|
|             |   |                        |  |  |
|             |   |                        |  |  |
|             |   |                        |  |  |

(Add rows if necessary)

**4. Campus Actions:** What are you planning (or already doing)?

| <b>When</b> | <b>Objective</b><br>(e.g. encouraging training institutions to use the game; encouraging students/trainees to play the game...) | <b>Target group(s)</b> | <b>Means of communication used</b> | <b>Where (e.g. at the premises of a training organisation; in a university...)</b> |
|-------------|---|------------------------|------------------------------------|--|
|             |   |                        |                                    |  |
|             |   |                        |                                    |  |

|  |  |  |  |  |
|--|--|--|--|--|
|  |  |  |  |  |
|--|--|--|--|--|

(Add rows if necessary)

**5. Spotlight Actions:** What are you planning (or already doing)?

| When | Objective | Media to contact | Means of communication used |
|------|-----------|------------------|-----------------------------|
|      |           |                  |                             |
|      |           |                  |                             |

(Add rows if necessary)

**6. Wider dissemination at EU level:** What are you planning (or already doing)? (...even though this point concerns mostly REVES)

| When | Objective | Target group(s) | Means of communication used (including participation in external events) | Where (if applicable) |
|------|-----------|-----------------|--|-----------------------|
|      |           |                 |  |                       |

|  |  |  |  |  |
|--|--|--|--|--|
|  |  |  |  |  |
|--|--|--|--|--|

(Add rows if necessary)

7. Could you please indicate how many contacts you are already sure to reach (for example with mailings) per target group?

| Target group   | Number |
|--|--------|
| Public authorities (administrative level, including employment agencies, VET organizations and other type of public training agencies...)<br><br>a) at local level<br><br>b) at regional level<br><br>c) at national level<br><br>d) at European level |        |
| Policy and decision makers<br><br>a) at local level<br><br>b) at regional level  |        |

|   |  |
|---|--|
| <ul style="list-style-type: none"> <li>c) at national level</li> <li>d) at European level</li> </ul>  |  |
| <p>Social economy organizations (and their platforms)</p> <ul style="list-style-type: none"> <li>a) at local level</li> <li>b) at regional level</li> <li>c) at national level</li> <li>d) at European level</li> </ul> |  |
| <p>VET education bodies (and their platforms/networks)</p> <ul style="list-style-type: none"> <li>a) at local level</li> <li>b) at regional level</li> <li>c) at national level</li> </ul>                              |  |
| <p>Other organizations (active in the field of work orientation, enterprise creation and training)</p>  |  |
| <p>Trainers (to-be-facilitators)</p>  |  |

|  |  |
|--|--|
| Game designers (and their platforms)   |  |
| Researchers (and their platforms)  |  |
| Relevant projects within and outside Erasmus+ <ul style="list-style-type: none"> <li>a) national</li> <li>b) European</li> </ul> |  |
| Other (please specify)   |  |

8. Do you know of any other (Erasmus+) project at European or national level that might be interested in receiving information on Social Seducement and the game that is being developed? If so, do you perceive any opportunities for collaboration (beyond exchange of information) that should not be missed?

### **O10 - Social Seducement – Awareness-Raising Campaign**

**Duration:** -31/08/2017

The Social Seducement Awareness-Raising Campaign is embedded *in* and has thus been developed *in coherence with* the General Dissemination Plan for the project (IO9).

The **general objective** of the campaign is

- a) to get in direct touch with stakeholders to disseminate information on the online role play game, the (future) network of facilitators and other outputs/outcome of the Social Seducement project,
- b) to encourage the use of the online role play game beyond test organizations, attracting the interest of potential facilitators and encouraging the involvement of the latter in the network of facilitators;

c) to collect feedback on the game and further project outputs/outcomes.

### Objective/Target groups:

1. Public authorities (administrative level), including employment agencies, VET organizations and public training agencies ...(and their platforms/networks)
2. Policy and decision makers at local level and EU level
3. Social economy organisations (and their platforms/networks)
4. VET education bodies in general (and their platforms/networks)
5. Other organisations active in the field of work orientation, enterprise creation and training (and their platforms/networks)
6. Trainers (to-be-facilitators), including free-lance
7. Unemployed persons
8. Game designers
9. Researchers
10. General public
11. Relevant projects within and outside Erasmus+

Table 1: Objectives

| Target group                            | Objective   |
|---|---|
| Public authorities (including agencies) | - Spreading information on the (pedagogical) model and the game |

|   |   |
|---|---|
|   | <ul style="list-style-type: none"> <li>- Encouraging use of the game</li> <li>- Collecting feedback</li> </ul>  |
| Policy-makers   | <ul style="list-style-type: none"> <li>- Spreading information on the (pedagogical) model and the game</li> <li>- Encouraging use of the game</li> <li>- Encouraging a re-thinking of policy-instruments aimed to promote job creation, (re-)integration into the labour market and capacity-building (i.e. highlighting the existence and advantages of social economy collective entrepreneurship; outlining the advantages of creative instruments such as games in the framework of (work) orientation processes etc.)</li> </ul> |
| Social economy organisations (and their platforms/networks) | <ul style="list-style-type: none"> <li>- Spreading information on the game (incl. results of piloting demonstrating the value of the game)</li> <li>- Encouraging use of the game</li> <li>- Collecting feedback</li> </ul>   |
| VET education bodies (including universities)               | <ul style="list-style-type: none"> <li>- Spreading information on the (pedagogical) model and the game (incl. results of piloting demonstrating the value of the game)</li> </ul>   |

|   |   |
|---|---|
|   | <ul style="list-style-type: none"> <li>- Promoting the integration of modules on social economy entrepreneurship in traditional training schemes</li> <li>- Stimulating (discussion on) a new model of (work) orientation, entrepreneurship education and training</li> <li>- Encouraging use of the game</li> <li>- Collecting feedback</li> </ul>               |
| Trainers (to-be-facilitators), including free-lance | <ul style="list-style-type: none"> <li>- Spreading information on the (pedagogical) model and the game (incl. results of piloting demonstrating the value of the game)</li> <li>- Encouraging use of the game and active involvement as a facilitator</li> <li>- Encouraging participation in the facilitators' network</li> <li>- Collecting feedback</li> </ul> |
| Unemployed persons                                  | <ul style="list-style-type: none"> <li>- Spreading information on possibilities to play the game and related (training/education ) opportunities</li> </ul>   |
| Game designers                                      | <ul style="list-style-type: none"> <li>- Spreading information on the game (incl. results of piloting demonstrating the value of the game)</li> </ul>   |

|                                      |  |
|--------------------------------------|--|
|                                      | <ul style="list-style-type: none"> <li>- Collecting feedback</li> <li>- Encouraging further development of the game or the development of similar instruments</li> </ul>   |
| Researchers                          | <ul style="list-style-type: none"> <li>- Spreading information on the game (incl. results of piloting demonstrating the value of the game)</li> <li>- Collecting feedback</li> <li>- Reflecting on the further use/development of the game in different kind of contexts</li> </ul>                                      |
| General public                       | <ul style="list-style-type: none"> <li>- Spreading information on the game (incl. results of piloting demonstrating the value of the game)</li> <li>- Spreading information on possibilities to play the game and related (training/education ) opportunities</li> <li>- Collecting feedback (where possible)</li> </ul> |
| Projects within and outside Erasmus+ | <ul style="list-style-type: none"> <li>- Spreading information on the game (incl. results of piloting demonstrating the value of the game)</li> <li>- Exploring possibilities for the integration of the game (or the pedagogical model) in other initiatives</li> </ul>   |

|  |                       |
|--|-----------------------|
|  | - Collecting feedback |
|--|-----------------------|

**ACTIVITIES (MEDIA RELATIONS ARE INTEGRATED IN THE SCHEME BELOW):**

*Given the different type of context partners work in and their different roles and networks, awareness-raising activities will differ from partner to partner.*

*Each partner will exploit his/her respective competences, capacities and channels. Partners will outline their specific awareness-raising plan in their response to a questionnaire that will be circulated by REVES (see page 19).*

Table 2: Activities

| When   | Activity                 | Target  | Results (also in terms of change of behaviour)   | Who (Partner)  | Means  | What to communicate ?   |

| <b>European seminars</b>               | <ul style="list-style-type: none"> <li>- Interest/appreciation/willingness to contribute to further development and test of the game: expressed in evaluation forms</li> </ul>                | <ul style="list-style-type: none"> <li>- Number of participants</li> <li>- Number of hits (cc. website articles, posts on social media etc.)</li> <li>- Number of persons having asked</li> </ul>  |

|  |  |   |
|--|--|---|
|  | <ul style="list-style-type: none"> <li>- Proposals/Engagement for further action to be taken (also by non-partner organizations, including EU institutions)</li> <li>- Articles on Social Seducement published by non-partner organizations</li> </ul> | <p>for more information and possible participation (in test activities, further development of the game etc.)</p> |
|--|--|---|

Key players that could have a “multiplier function” for dissemination for each target group (“champions”) have to be defined by each partner (depends in our view very much on the local/national context).

#### **Schedule for the preparation of (different stages of) the campaign:**

1. **All partners/6 March 2017:** Team call on the Awareness-Raising campaign (fixing tasks, tools and budget)
2. **All partners/March 2017:** Establishing a list of organizations/bodies/persons to contact for each part of campaign
3. **All partners/March 2017:** Providing some information on ongoing and/or planned awareness-raising activities (the partner’s awareness-raising plan)
4. **REVES/as of March 2017:** Providing sample version for an article on the final test version of the game and the piloting phase (article not oriented towards specialized media/organizations) – with messages adapted to different target groups

5. **REVES/all partners, in cooperation with the facilitators as of March 2017-May 2017:** Providing content on the piloting phase (for the blog and FB)
6. **REVES (and TIHR graphic designer?)/as of March/April 2017:** Developing a model for a poster and leaflet/bookmark (in ENG) which will then be translated, printed (number of copies to be confirmed) and distributed by each partner
7. **All partners/as -31/08/2017:** Continuation of awareness-raising activities following the scheme above (and the partner's awareness-raising plan)
8. **REVES/as of May 2017:** Providing sample version for an article on the results of the piloting phase
9. **All partners/as of June 2017:** Compiling a report on awareness-raising activities in the framework of IO10

During the whole period, REVES will stay in touch with all partners to remain informed about ongoing activities – also with a view to adapt actions to the results of the piloting and to propose additional actions (if appropriate!).

#### Risks:

- So far we cannot be sure the game fits all contexts and situations mentioned in the project application/grant agreement (it might finally be more adapted for work with unemployed that do not have prior experiences and knowledge on social economy than for a kind of re-orientation of persons working already in social economy enterprises). The piloting phase will bring more certainty on this point. However, for this reason, awareness-raising activities during the test phase might sometimes risk to address groups that might finally not be those for which the game would be most useful.
- There is a risk to generate false expectations and deception/frustration (including a loss of reputation of test and partner organizations) if the term “game” will be used during the awareness-raising activities. It would be useful to adapt the terminology used when communicating on the instrument: better to stress the ‘gamification’ element than to talk about a game.
- Organizations testing the game might not in every case want to make it public or already recruit new players already during the piloting period (they might want to be sure the game fits their needs and improvement, if necessary, are done according to their

suggestions and needs). Partners have to well define, together with them, whether, in which way and to whom information on the test phase can be spread.

- Concepts and terminology might differ from country to country. Translations of model press releases etc. should be done carefully in order to avoid any mistakes/misunderstanding.
- On actions targeting unemployed (part of the “street actions”): To us it makes only sense to inform unemployed about the game if they will then also have access to the game. For this, however, we need to be sure that somebody could accompany them/be a contact person/facilitator if ever they decide to play. With all the technical difficulties we met during the start of the piloting phase and the need to clarify some issues a facilitator is needed. However, we cannot be sure that all our facilitators would like or are able to do this additional job and there is not much time to search and recruit other facilitators NOW!

## Annex 2 - Dissemination reports

### IO 10: Report on awareness-raising activities – Monitoring and Evaluation questionnaire

*(Please provide also relevant documents such as copies of attendance lists, short reports and evaluation of the events, articles you might have written, presentations you might have done etc.)*

**Name of the partner organisation:** REVES aisbl

**National events:** Did you organize a national event? If so, please fill in the table below.

| When | Where | Title and objectives (including main points on the agenda) | NUMBER of participants and PROFILE <sup>1</sup> of persons attending the event (need to report on the diversity of target groups!!) | Means of communication used | Outcome/Impact   |
|------|-------|--|---|-----------------------------|--|
|      |       |  |   |                             | Next to qualitative aspects (e.g. information requests, contribution to game development, participation in |

**Could you please indicate how many persons/contacts you were able to reach (for example with mailings) per target group?**

Tavistock sent out follow up emails (detailed above in street actions) with feedback from the London seminar and an update on the project and invitations to forthcoming events: to the final project seminar in Brussels on 7 June; and to the Lunchtime Talk at the Tavistock Institute in London on July 5 to present the piloting results and evaluation results.

These emails (on 23 May; and on 26, 27 and 30 June) were sent to all the same 37 contacts given in the previous table submitted to Reves (Awareness Raising Plan) in April, which were listed by stakeholder category. These are the 19 contacts who participated in the London seminar, and 18 further contacts made by running the London seminar, who didn't participate in the seminar but asked to be sent further information.

The breakdown of these 37 contacts in number per target group was specified in the previous Awareness Raising Plan table. **In addition to** these emails to these 37 contacts, the following individual follow ups were made:

| Target group   | Number  |
|--|---|
| Public authorities (administrative level, including employment agencies, VET organizations and other type of public training agencies...)<br><br>i) at local level<br><br>j) at regional level<br><br>k) at national level<br><br>l) at European level | Connexions, Camden, London: 1 person, local level |

|   |   |
|---|---|
| <p>Policy and decision makers</p> <ul style="list-style-type: none"> <li>i) at local level</li> <li>j) at regional level</li> <li>k) at national level</li> <li>l) at European level</li> </ul>                         | <p>Southwark Council, London: 1 person at local council level</p>   |
| <p>Social economy organizations (and their platforms)</p> <ul style="list-style-type: none"> <li>i) at local level</li> <li>j) at regional level</li> <li>k) at national level</li> <li>l) at European level</li> </ul> | <p>Social Investment Business (a national investment body lending to social enterprise): 1 person, national level</p> |
| <p>VET education bodies (and their platforms/networks)</p> <ul style="list-style-type: none"> <li>g) at local level</li> <li>h) at regional level</li> <li>i) at national level</li> </ul>                              | <p>Westminster Adult Education Service, Tower Hamlets, London (a VET organization) : 1 person, local level</p>        |

|   |  |

| Other organizations (active in the field of work orientation, enterprise creation and training) | Nick Jenkins Foundation (philanthropic investor in Educational technology): 1 person, national / international level                                 |
| Trainers (to-be-facilitators)   | Hatch Enterprise, social enterprise and social business trainers: 1 person so far (we will meet more of their staff in early September), local level |
| Game designers (and their platforms)  | 0  |
| Researchers (and their platforms)   | 0  |
| Relevant projects within and outside Erasmus+<br>e) national<br>f) European                     | Westminster Adult Education Service have previously run relevant Erasmus+ projects: 1 person, local level  |
| Other (please specify)  | 0  |

**Did you engage in any cooperation with other**

**(Erasmus +) projects at European or national level? Could you provide some more details (type of exchange/cooperation, results, further perspectives...)?**

Phone conversation with and emails to an adult vocational trainer at WAES (Westminster Adult Education Service), London; and follow up emails to him with further information: Invitation about the project and website; information about the game; feedback from the London seminar held in November 2016; invitation to a lunchtime talk presentation at the Tavistock Institute, including

feedback on the value of the game from the Pilot and its evaluation. However, whilst Chris initially expressed interest, no further response was given.

**Additional comments/information (e.g. interesting reactions/comments you did not mention before)**

**Powerpoint slides of talks are attached**

## Annex 3 - Conference report (European conference)

### **“Promoting social economy enterprise creation as a key tool for empowerment and active citizenship: The added value of online (learning) games”**

On 7 June 2017 a conference on the social economy and SocialPlaNet, a newly developed online role play game on the social economy, brought together approximately 60 persons representing social economy organisations, development agencies, public authorities, university and other education/training institutions, think tanks and (European) networks from different EU Member States and Montenegro. The event was organised in the framework of “Social Seducement”, an Erasmus+ project co-financed by the European Commission.

The event consisted of two parts:

**The morning session** gave participants the occasion to develop a deeper understanding of the values and the broad range of activities of social economy enterprises.

Canelle, Les Grignoux and Damnet – three Belgian social economy enterprises operating in the sectors of work integration, IT and culture - shared their experiences of setting-up and running this type of enterprise. They explained how they dealt with challenges such as fundraising, democracy&participation at the enterprise, training of employees etc.

The following session focused on training/education on social economy entrepreneurship, the legal context and support schemes in Wallonia, Brussels-Capital region and (partially) Flanders. Discussions around related opportunities and needs made participants agree on the fact that broad alliances are needed to make social economy and the Social Business Model Canvas become one concept next to others present in (university) education, management courses, business support, labour market integration initiatives and entrepreneurship orientation courses for unemployed and other target groups. Entrepreneurship online tools such as SocialPlaNet were perceived to be able to contribute to this.

The SocialPlaNet game, test results and upscaling perspectives stood at the centre of the **afternoon session**. Project coordinator Kerstin June (Tavistock Institute of Human Relations, UK) gave participants an insight into the game (beta version), its story board and functioning.

Her colleagues presented test results including criticism but also rather encouraging outcomes, shared experiences concerning game facilitation and reported on first exchanges (e.g. with social impact investors) about the future use and upscaling of the game.

Together with Renate Goergen/Le Mat, Kerstin Junge then introduced and launched the SocialPlaNet facilitator network which will serve interested current and future facilitators as a platform for exchange, further dissemination and recruitment.

The conference concluded with a panel discussion bringing together

- Giannis Vikas, from the Athens development and destination management agency (GR), Gio Lodovico Baglioni, representing Sol.Co Camunia, a consortium of social cooperatives (IT) and Ana Umbelino, a city councilor in Torres Vedras (PT) who had already taken the opportunity to test the game, as well as
- Laurent Staner, a SocialPlaNet facilitator and gaming expert and Patricia Martinez, a delegate of the European network AEIDL (representing at the same time the Social Innovation Community initiative).

When discussing the added value of the game, most speakers and participants agreed on the following:

- The game fills a gap, as existing programmes of (social economy) entrepreneurship education lack interaction and possibilities to simulate practical experiences.
- SocialPlaNet can be a means to help isolated individuals getting out of their isolation and meeting other (unemployed) persons to exchange on their current situation and possible ways out.
- SocialPlaNet has the potential to give unemployed, disadvantaged persons ‘some power’, the possibility to be empowered instead of feeling patronized and subordinated to indications by public authorities (e.g. agencies in charge of unemployment benefits etc.).
- Players see what they have created which is encouraging and a main condition to feel “able to” and self-confident...

On risks or motivation not to play, speakers and other conference participants had the following thoughts:

- Some people, especially unemployed, might feel somewhat “tired” of experiments.

- Not everybody might want to share such an experience with others, interact, set-up a joint initiative, co-decide...
- Some persons, when playing the game with other, might be tempted to follow more or less blindly the ideas of their 'playmates' without coming up (or daring to come up) with their own thoughts.
- Persons wishing to further improve and implement their business plan after having played the game might not be able to do this – e.g. due to a lack of finance.
- It is important to ensure an appropriate follow-up (players that have finished the game and created their Business Plan should have the occasion to be directed to organizations/institutions helping them to realize their plan if this is what they would like to do).

-----

*Would you like to test the game? Please have a look at [www.socialseducement.net](http://www.socialseducement.net) and/or contact ... (to be filled in by each partner according to his/her needs)*

*Would you like to get to know more about the facilitator network? Please have a look at <http://www.socialseducement.net/facilitators-network> and/or contact ... (to be filled in by each partner according to his/her needs).*

## Annex 4 - Interview

### **Entrepreneurship education: Social economy and the added value of online role play games**

*SocialPlaNet is an online game, designed as a gamified learning platform which is currently being developed by a European partnership around the Erasmus+ project [“Social Seducement”](#).*

*It has the objective to train and entertain players supporting them in the acquisition of knowledge, skills and attitudes to create and run successfully a Social Economy Enterprise.*

*Jef Tavernier is one of the 16 facilitators running test sessions on the beta-version of the gamified learning platform. He does this together with a group of students at the VIVES University College in Kortrijk, Belgium.*

*In the following short interview the former teacher of economics, politician and civil society activist shares some of his thoughts on social economy, training and the potential of online tools used in training courses on (social economy) entrepreneurship...*

#### **1. What was your motivation for teaching social economy?**

Throughout my whole life – in particular during my work for FEBEA (European Federation of Ethical and Alternative Banks) and as a local and national politician - I have been working on topics related to sustainable development and social aspects, including the social economy. It does not make sense to work *on* or *in* economy and entrepreneurship without considering social aspects. This applies both to the research field and to practice on the ground.

With FEBEA we published an atlas of good practices of social economy enterprises. It was in that period that VIVES, for which I already gave lectures on another subject matter, came up to me with the proposal to offer specific courses on social economy.

I started giving my first lectures on “social economy” in 2010, in the framework of the “International Business programme” of the VIVES university college - at that time for Erasmus students and students coming from third countries.

Later I also started teaching social economy at the University of Lille (France).

With the growing interest, at EU and the national level, in the single social entrepreneur, decreasing funds for everything which is “social” and increasing budget headings for entrepreneurship, we enlarged the title of the lectures to “Social economy and social entrepreneurship”.

## **2. Did social economy now find its place in education and training curricula of Belgian universities, VET institutions and other educational institutions?**

No. In existing curricula the subject “social economy” is still very much sidelined.

It is part of the training of social workers - here, however, with a focus on work integration enterprises, their legal context and possibilities to support these enterprises.

Specific chairs or Centres of Social Economy such as the one at Liège University are an exception.

In courses on economy, management and entrepreneurship ‘social economy’ is usually presented and discussed more ‘at the periphery’ and in a not very structured manner.

## **3. For which reasons do students choose to attend your lectures? Have they usually already been in touch with social economy enterprises?**

Each semester I work with approximately 20 students from different European and non-European countries. Some of them know or have already had experiences with social economy – this is, however, a minority. Others are simply interested in the subject matter.

I always seek to create a link between the content of the course and the situation (of social economy) in the countries of origin of my students. Some of them discover for the first time what is actually happening “at home”. In the end of the course I ask my students to write a paper on their own country in order to enlarge their knowledge and interest and – maybe – opportunities to work in social economy once they have finished their studies.

## **4. You accepted to test SocialPlaNet with your students. What could be, in this context, the added value of a gamified learning platform such as SocialPlaNet?**

Also at university, we should not only *talk* about entrepreneurship and its theory, but *show examples*. Yet, examples are not enough. Students should have the opportunity to *simulate*.

On the other hand, there are a number of business games, but more or less nothing on social economy and social entrepreneurship. Many business games use the Business Model Canvas. However, in the case of social economy we need a different Business Model Canvas which integrates, in each of its elements, considerations on social aspects and impact. This also requires new methodologies and tools.

It appeared interesting and worthwhile to contribute to the creation of a game that does not have profit as its core idea, but the social objective.

**5. Some think the game character of SocialPlaNet could be lost due to the lack of competition between the players who are supposed to develop their business idea collectively. Do you share this opinion?**

In my view, elements of competition between the players are not essential. The process of developing an idea *together, in a different (virtual) environment*, by using different types of tools (including the possibility to use a different kind of identity) is as such already fairly rich and diverting. (ek)

---

*Jef Tavernier holds a Master in Economics as well as a Master in Town and Country Planning from the University of Ghent. During eighteen years he taught economics in a secondary school. After this period he became professional politician and was successively member of the Belgian Senate, member of the Belgian House of Representatives, Federal Minister of Public Health, Flemish Minister of Environment, Agriculture and Cooperation and Development, and member of the Flemish Parliament.*

*From September 2009 to the end of 2013 Jef worked as Secretary-General for FEBEA (European Federation of Ethical and Alternative Banks).*

*He is chairman of the Ghent school for basic-education (school for adults) and coordinator-promoter of social economy in higher education in Flanders for In-C (Flemish umbrella organisation for social economy).*

*As lecturer 'social economy and social entrepreneurship' for Erasmus-students at VIVES (University college in Kortrijk, Belgium) and at the University of Lille (France) he follows-up the European programs on 'entrepreneurship in education'.*

*The SocialPlaNet game, developed by the Social Seducement project, is now being tested across Belgium, Italy, Spain, Sweden and the UK! The game is available in English, French, Italian, and Spanish.*

*If you would like to be involved in the piloting or are interested in knowing more about the game, please contact us at the following email addresses:*

## Annex 5 – Awareness-raising tools

**IO10 - Social Seducement Awareness Raising Campaign** turned around 5 fields of action: European and national events, Street Actions, Campus Actions, Spotlight Actions; wider dissemination activities at European level. The campaign toolkit includes: a planning and monitoring device (see Annex 1), an evaluation tool (see Annex 1), , [web tutorials](#), sample leaflets, a [video](#) that gives potential users/players additional information on the game and the perspective of different type of test users; a [Q&A document](#) as well as short web tutorials produced by REVES provided clear support to test players/test organizations and can be used to promote the game beyond the time limits of the project.

**Name of the partner organisation: REVES aisbl**

9. **National events:** Are you organizing a national event? If so, please fill in the table below.

| When | Where | Title and objectives (including main points on the agenda) | Target groups | Means of communication used |

| When          | Where          | Title and objectives (including main points on the agenda)  | Target groups  | Means of communication used   |
|---------------|----------------|---|--|---|
| 15-16/09/2016 | Riva del Garda | Annual meeting IRIS-Network – Social Seducement: serious gaming for collective social economy enterprise                        | Social enterprises, social economy research organizations, training organizations, young university students | The event is well known all over Italy and Iris network provides the communication. In addition we used our channels and a printed booklet was edited |
| 07/04/2017    | PERUGIA        | Innamoratevi dell'Impresa Sociale – We presented the main social enterprise business models as a result of the piloting actions | Social Enterprise development agencies, University, young and elder unemployed                               | The event took place in the center of Perugia and has been spread through the official channels of the co-  |

|  |  |  |                        |                            |  |
|--|--|--|------------------------|----------------------------|--|
|  |  | explaining through concrete examples and results the functioning of the game | people, social experts | associations, enterprises, | operative movement, through facebook, twitter, other social networks, direct mailing |
|--|--|--|------------------------|----------------------------|--|

**European events:** Are you organizing a European event? If so, please fill in the table below.

| When              | Where           | Objective (including main points on the agenda) | Target groups                                       | Means of communication used            |
|-------------------|-----------------|---|---|--|
| 29-30-31 May 2017 | Pieve di Cadore | Le Mat Europe Assembly                          | Social co-operatives from Italy and other countries | Mailing list, webside, social networks |

**Street actions (and Storytelling):** What are you planning (or already doing)?

| When | Objective | Target group(s) | Means of | Where |
|------|-----------|-----------------|----------|-------|
|------|-----------|-----------------|----------|-------|

|   |  |   |  |   |
|---|--|---|--|---|
| Since 2015 we tell about the progress of the project on our Social network channels as facebook Le Mat - Europe | encouraging institutions/organisations, social enterprises and people o become curious about the theme of social entrepreneurial training; | People, training and development agencies, social enterprises                   | <b>communication used</b><br>Social networks | Social Networks, facebook, twitter etc and all our meetings with other social entrepreneurs |
| In January 2017 we started the piloting and opened a fb page SocialSeducement_It                                | We want people to follow the participating and the progress of the players and the groups starting to use the game                         | Friends and colleagues of players, interested organizations, other facilitators | Social Networks                              | Facebook, twitter   |
| Newsletter<br>www.socialseducement.net  | Information about what is going on   | Interested organizations  | Web+social networks                          | Web, facebook, twitter  |
| Le Mat network  | Informing and discussing with members and other social entrepreneurs   | Interested organizations  | Meetings + mailing + social networks         | Meetings, web, social networks  |

(Add rows if necessary)

**Campus Actions:** What are you planning (or already doing)?

| When   | Objective  | Target group(s)  | Means of communication used                | Where   |
|--|--|--|--|---|
| Our piloting actions are going on in three different areas: Perugia, Ravenna, Belluno. In order to organize the piloting we met many different organizations and proposed the game | Encouraging training institutions to use the game; encouraging students/trainees to play the game... | Social enterprises, training organizations, local development organizations, job agencies<br><br>Unemployed elder women, young students searching work, migrants, refugees, unemployed people, aspiring social entrepreneurs | Mailing, meeting                           | In many different places where the organizations are located, social centers, public places |
| The piloting now is going on and we meet new people and organizations during the work in the three different areas   | Collecting feedbacks, involving new people interested  | Social organizations, unemployed people, social cooperatives   | Meetings, social networks, mouth to mouth, | Many different places, wherever they call us  |
|  |  |  |  |   |
|  |  |  |  |   |

(Add rows if necessary)

**Spotlight Actions:** What are you planning (or already doing)?

| When   | Objective                                      | Media to contact   | Means of communication used  |
|--|--|--|--|
| From now on we know more or less how the game works and we can start to offer the game to others | To scale-up and multiply the users of the game | We are asking many social cooperatives if they maybe interested to use the methodology of SocialPlaNet | Mailing, social networks, phone calls, participation in events organized by others |
|  |  |  |  |

(Add rows if necessary)

**Wider dissemination at EU level:** What are you planning (or already doing)? (...even though this point concerns mostly REVES)

| When | Objective | Target group(s) | Means of communication used (including participation in | Where (if applicable) |
|------|-----------|-----------------|---|-----------------------|
|      |           |                 |   |                       |

|  |             |  | <b>external events)</b>  |   |
|--|-------------|--|--|---|
| Le Mat is a European organization and we participate in many other European Networks and meetings. Since the game is ready we are informing and involving all our contacts | To scale-up | Other social enterprises, experts in training and job creation, development agencies | Participation in external events, mailing, social networks, study groups | Sweden, UK, Slovenia, Bosnia and Herzegovina, Hungary, Austria, Germany, Greece |
|  |             |  |  |   |

(Add rows if necessary)

|--|--|

Do you know of any other (Erasmus+) project at European or national level that might be interested in receiving information on Social Seducement and the game that is being developed? If so, do you perceive any opportunities for collaboration (beyond exchange of information) that should not be missed?

We are thinking about this and will communicate as soon as we know something more.

**Name of the partner organisation: Coompanion**

**32. National events:** Are you organizing a national event? If so, please fill in the table below.

| When      | Where      | Title and objectives (including main points on the agenda)  | Target groups            | Means of communication used |
|-----------|------------|---|--------------------------|-----------------------------|
| Sept 2016 | Gothenburg | Stora Sociala Företagsdagen. Using the event to meet and promote Social Seducement to as many as possible. Find faciclitators | Actors working with WISE | Verbal at the event         |
|           |            |   |                          |                             |
|           |            |   |                          |                             |

**33. European events:** Are you organizing a European event? If so, please fill in the table below.

| When | Where | Objective (including main points on the | Target groups | Means of communication used |
|------|-------|---|---------------|-----------------------------|
|      |       |   |               |                             |

|                |            | agenda)  |  |  |
|----------------|------------|--|--|--|
| 1-2 March 2017 | Gothenburg | <p>Showing up the game and potentially find more Facilitators.</p> <p>WISE in a Gothenburg contest. Show the Game. Discussion on how the game can support replication of WISE, LE Mat as an example.</p> |  |  |

you know of any other (Erasmus+) project at European or national level that might be interested in receiving information on Social Seducement and the game that is being developed? If so, do you perceive any opportunities for collaboration (beyond exchange of information) that should not be missed?

## Annex 5.1 Sample Leaflets

**JOIN A UNIQUE ENTREPRENEURSHIP SIMULATION AND FIND OUT MORE ABOUT YOURSELF, YOUR ENVIRONMENT AND SOCIAL ECONOMY**

- Did you ever think of becoming an entrepreneur?
- Are you curious to see how entrepreneurial activities could go together with an overarching social objective?
- You have business ideas or previous business experience, but you are not really willing to launch yourself on your own?
- Fancy testing together with friends or persons you might not yet know a brand new online role play game on social economy as another way of doing business?
- Eager to find out whether you are/ could be a social economy co-entrepreneur?

**Contribute to the development of a unique learning platform!**

Tests of the beta-version of the first online role play game on social economy - SocialPlaNet - are now up and running.

Please don't hesitate to get to know more about the initiative! [www.socialseducement.net](http://www.socialseducement.net)

**... then this is for YOU!**

**ONLINE ROLE PLAY GAME ON SOCIAL ECONOMY:  
A NEW INSTRUMENT FREE OF CHARGE  
TO ENRICH YOUR TRAINING COURSES**

- Are you a public authority, VET organisation, university or any other player involved in entrepreneurship training and/or work orientation for different target groups?
- Do you search for new (pedagogic) tools that could enrich your course/lecture on social economy or entrepreneurship in general?
- Would you like to have an opportunity to bring together persons with different background in a rather diverting way to make them simulate collectively the set-up of a social economy enterprise?

**SocialPlaNet is a brandnew online role play game which has been conceived to be played by a group of individuals.**  
It provides players with the opportunity to...

- discover what social economy is and what difference it makes compared to other type of business;
- discover what it means to work in a team;
- simulate the set-up of a social economy enterprise (creation of a business idea) together with others;
- contribute to the game with his/her specific competences whilst acquiring new knowledge and developing capacities;
- advance in a flexible way, respectful of different rhythms of life and learning speeds of players, through additional single player sessions during which each player has the occasion to review what has been achieved during multi-player sessions and deepen knowledge through additional learning material.

Contribute to the development of a unique learning platform and join tests of the beta-version of the first online role play game on social economy!
