## Lash After Care

Following aftercare will ensure your lashes will look better longer and not damage your own natural lash.

### Do Not:

- wet your lashes for the first 24 hours
- pick/pull/touch your extensions with your fingers (they contain oil and can break the bond)
  - wear mascara or gel liner, use an eyelash curler
  - sleep on your extensions/wear a sleeping mask
  - use oil based products (skin care/makeup removers)
    - expose lashes to extreme heat from the oven
- allow your shampoo/conditioner to run over your lashes in the shower
  - frequent steam rooms or hottubs (this loosens the bond)

### Do:

- wash lashes nightly (makeup wearers), 3x a week (non-makeup wearers) with baby shampoo or an oil free cleanser
  - wash after sweat induced activity
    - pat dry and brush
    - sleep on hand/back
  - use powder/liquid liners (pens etc)
    - brush daily
- book refills every 2-4 weeks depending on personal retention

FILLS – must have 40% of your lashes left or full set price will be charged.

Please attend all fills with lashes washed and prepped or you may not receive/be denied a full fill.

Not following guidelines may result in premature lash shedding and /or damage.
