

In Combat Since 1967

McRae Industries was founded in 1959 by Branson J. McRae as a manufacturer of children's work/play footwear utilizing the process 82 construction. In 1965, the United States Government chose the direct molded sole, vulcanized construction for our military's combat boots. McRae converted their Process 82 equipment to accommodate the vulcanized construction. In 1967, McRae bid on and was awarded its first contract through the United States Department of Defense to manufacture Olive Drab Jungle Boots for soldiers fighting in the Vietnam War. It was at that time that McRae Footwear emerged as one of the highest quality manufacturers of military footwear on the market today.

Since 1967, McRae has consistently manufactured military footwear for the United States Department of Defense. Not a single year has passed when McRae was not a key supplier of footwear to the most advanced fighting force in the World. The reason that our military has always relied on McRae Footwear as a contractor is because of our unprecedented craftsmanship and our commitment to providing military personnel with a product that surpasses performance standards; a product that many consider to be the most important item a soldier possesses.

Due to popular demand, McRae Footwear is now offering to the commercial marketplace the same level of performance, durability, and quality that our US Military requires. Our mission from the beginning was simple. We will do one thing and we will do it right!

Sincerely,

Victor Karam

President – McRae Footwear

Mil-Spec Hot Weather Desert Boot with Vibram Sierra Outsole™

This is the authentic, standard issue Hot Weather boot that is worn by the U.S. Army. State-of-the-art direct attach midsole/outsole construction is utilized to provide the end user with extraordinary shock absorption capabilities as well as class leading durability.

- Height – 8”
- Direct Attach Sole Construction
- Rubber Vibram Sierra Outsole™
- Oil, Acid, and Slip Resistant Vibram Rubber Sierra Outsole™
- Removable Cushioned Polyurethane Inner Sole
- Full Grain Tan Suede and Cordura™ Upper
- Padded Collar
- Speedhook & Eyelet Lacing System – Nylon Coated Brass
- Drainage Vents
- 100% Berry Amendment Compliant
- Sizes available: 5 – 12, 13 R & W

MADE IN THE USA

STYLE # 4188

Hot Weather Desert Boot with Ripple Outsole

Utilizing the design of the current, standard issue Hot Weather boot, this style offers the user the same durability and performance, but does so with improved shock attenuation. This is a result of our 3-layer construction method and the incorporation of a ripple outsole.

- Height – 8"
- 3-Layer Sole Construction
- Oil, Acid, and Slip Resistant Vibram Rubber
- Ripple Outsole™
- Removable Cushioned Polyurethane Inner Sole
- Tan Suede and Cordura™ Upper
- Padded Collar
- Speedhook Lacing System – Nylon Coated Brass
- Drainage Vents
- 100% Berry Amendment Compliant
- Sizes available: 5 – 12, 13 R & W

MADE IN THE USA

STYLE # 4189

Hot Weather Desert with Panama Outsole

Often referred to as the Schwarzkopf boot, this is the boot that our soldiers wore during Desert Storm. The vulcanization process is used to attach the outsole to the upper. This process creates a bond of unprecedented strength. The boot has a Panama outsole which is designed to effectively shed debris and does so with ease.

- Height – 8"
- Military Specification Vulcanized Rubber
- Oil, Acid and Slip Resistant Panama Outsole
- Removable Cushioned Polyurethane Inner Sole
- Tan Suede and Cordura™ Upper
- Padded Collar
- Speedhook Lacing System – Nylon Coated Brass
- Drainage Vents
- 100% Berry Amendment Compliant
- Sizes available: 5 – 12, 13 R & W

Specialized Performance Components & Features

The Vibram® brand is recognized worldwide as the leader in high performance soling products for outdoor, dress casual, and service footwear. McRae uses Vibram® outsoles on many of our military boot styles and also on our newly introduced tactical collection. The following soles are used in specific McRae boots:

VIBRAM® Style #1276 Sierra

- The Sierra's unique design and placement of lugs provide maximum traction on various terrain.
- Multi-directional lugs provide user with substantial edging capabilities for braking, push off, and stability.
- The Sierra utilizes an exclusive Vibram compound which guarantees maximum traction on a variety of terrains including wet and cold surfaces.

VIBRAM® 360 Force™

- Made with Vibram® Rubber providing high abrasion and long-wearing characteristics.
- Patented 360° lug ensures traction in all directions.
- Wide outer lugs for stability on uneven terrain.

VIBRAM® Ripple

- Made with VIBRAM® Rubber providing high abrasion and long-wearing characteristics.
- Broad heel and toe pad for stability.
- Distinct ripple pattern ensures grip, even on steep inclines.

VIBRAM® Multi-Sport

- Made with VIBRAM® rubber providing high abrasion and long-wearing characteristics.
- Combined with ultra lightweight molded EVA midsole providing a unit bottom with superior cushioning.
- High traction directional lug design providing stability on a variety of surfaces and conditions.

VIBRAM® and the yellow Octagonal Label are registered trademarks of Vibram S.p.A of Italy

Durably waterproof and highly breathable GORE-TEX® footwear is engineered to keep feet dry and comfortable in varying temperatures and weather conditions. McRae Footwear's Temperate Weather boots are designed with GORE-TEX® footwear fabric, providing optimal protection and comfort by keeping the interior of the boots dry and well ventilated during active outdoor pursuits and rugged, everyday wear. GORE-TEX® footwear fabric maintains a high level of protection over time by allowing moisture to escape to from the boot, further enhancing operational effectiveness. In keeping with our pledge to produce the highest quality footwear possible, we perform regular testing on the temperate weather products for your assurance that they provide durable waterproof protection

GORE-TEX®, GORE, and designs are trademarks of W.L. Gore & Associates, Inc.

Agion® branded antimicrobial technology makes products cleaner and longer lasting with silver, copper and zinc, which have been proven in use throughout history. Agion® antimicrobial technology provides built-in protection by working 24/7 resisting the growth of odor causing microbes. McRae uses Agion® treated linings in our new tactical boot collection featured in this catalog.

Agion® and designs are trademarks of Sciescent

CORDURA® Nylon fabric provides durable performance for a variety of end uses, including backpacks, luggage, work boots, and motorcycle apparel. Products made with CORDURA® fabrics feature enhanced tear and abrasion resistance, and long-lasting durability. CORDURA® fabric is constructed with qualifying INVISTA yarns which are woven in the classic 2x2 basket weave and plain weave construction in accordance with INVISTA's approved fabric standards for the CORDURA® brand.

Benefits

- Original ballistic weave developed for military body armor
- Densely woven, high-strength nylon fabric
- Exceptional abrasion, tear and puncture resistance
- Designed for maximum durability and long-lasting performance

CORDURA is a trademark of INVISTA
