

HC Series Conveyors

Abrasive, fluidizable materials demand tough—yet flexible—conveyance systems. Cyclonaire HC Series semi-dense phase conveyors are up to the challenge. These conveyors feature proprietary venturi-vacuum technology and side inlets for faster loading.

Streamline Railcar and Truck Unloading

Customized Solutions—Nothing works better than a Cyclonaire conveyance and/or blending system custom designed around your specific environment.

Best Suited for Powdered Materials—You won't find conveyors that handle abrasive and/or fluidizable powders better than HC Series conveyors—that's what they were designed to do.

Less Abrasive Wear and Particle Degradation—Medium-pressure blower air is used to venturi-vacuum load; pressure-convey air minimizes material degradation.

Adaptable to a Wide Variety of Applications—Incorporate HC Series conveyors for IBC and bulk bag unloading/in-plant transfer.

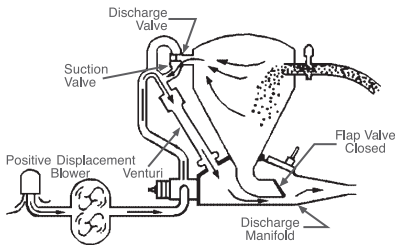

Boost Productivity and Efficiency with Leading-Edge Pneumatic Conveyors

- Medium-pressure blower air conveys material at intermediate line velocities
- No costly pits required
- Integral dust separation for reduced venturi wear
- Less operator supervision via automated controls
- High capacity, up to 100+ TPH

Cyclonaire HC Series conveyors achieve higher solids-to-air ratios, minimizing degradation and abrasive wear. Portable or stationary.
