

# DOUBLE FLAP GATE VALVES

## A-Series MPTA Model

**The MPTA model is designed for new construction and retrofit.**

All cast construction – assurance of reliable, long lasting performance.

Cast machined ground seats and flappers - possess outstanding abrasion resistance.

Access Covers with lift handles - allows for In-Place Service and Maintenance.

Stainless steel shafts – heat resistant and corrosion free sealing surfaces.

Rotary Actuators – totally enclosed allows dust free operation and no pinch points.

Regrindable Seat / Flapper - working life extended for years at minimal cost.

Outboard mounted shaft bearings – allows air to circulate and keep cool.

Design matches industry standard height and flange pattern.

Choice of drives: Pneumatic, Electric and Gravity.

Typical applications are air pollution control, ash handling, asphalt, clinker cooling, iron ore pelletizing, pneumatic conveying, pulp and paper, and incineration.

Standard Temperatures to 750°F. For temperatures higher than 750°F, consult factory with full details.

### Industries Where Used

Cement	Flyash
Iron Ore	Bulk Powders
Steel Mills	Mining & Minerals
Pulp & Paper	Recycling

### Features

- Pneumatic double acting cylinder actuators — Provides long trouble-free service
- High chrome white iron seats & flaps — 27% chrome wear resistant
- Dual lever arms — Thorough flap-to-seal contact
- Heavy duty outboard bearings — Less contamination
- Shaft seal packing area — Better seals leakage reduction
- Access panels — Permits interior inspection & repair
- Single or double configuration — Designed to replace competitor's units
- Stainless steel shafts — Longer life
