

TECHNICAL

Twin Agitator Mixers for Meat, Cheese and Other Food Preparations

American Process Systems Meat and Cheese Mixer/Cooker

single weldment tank; have ground and polished welds with a choice of finish; split packing glands for easy cleaning and maintenance; an end discharge; split type, removable stuffing boxes; and nickel plated pillow block bearings.

Applications

Our twin agitator mixers, cookers, and pump feeders are being used successfully for such diverse applications as

- meat
- cheese
- sauces with particulates
- protein & vegetable salads
- meat fillings
- and many others.

- Guaranteed, solid agitator shaft
- Ribbon or paddle design
- Single weldment tank
- USDA approved construction
- Split packing gland for external access
- Twin agitators with opposite rotation
- Reversible agitator to aid in discharge

Sanitary, USDA Approved Equipment

American Process Systems offers a variety of sanitary, USDA approved mixers and ancillary equipment for the meat, cheese, and food preparation process industries.

Construction

The mixers have two APS solid agitator shafts, guaranteed not to break for the life of the mixer. The agitators rotate in opposing directions and are reversible for easy discharge. Mixers are constructed from a stainless steel,

APS Cheese Mixers with double half-moon gate discharge and APS Batch Mixer discharging into Viscous Pump with Agitated Surge
