

INNOVATION IN AUTOMATION

Pet Food

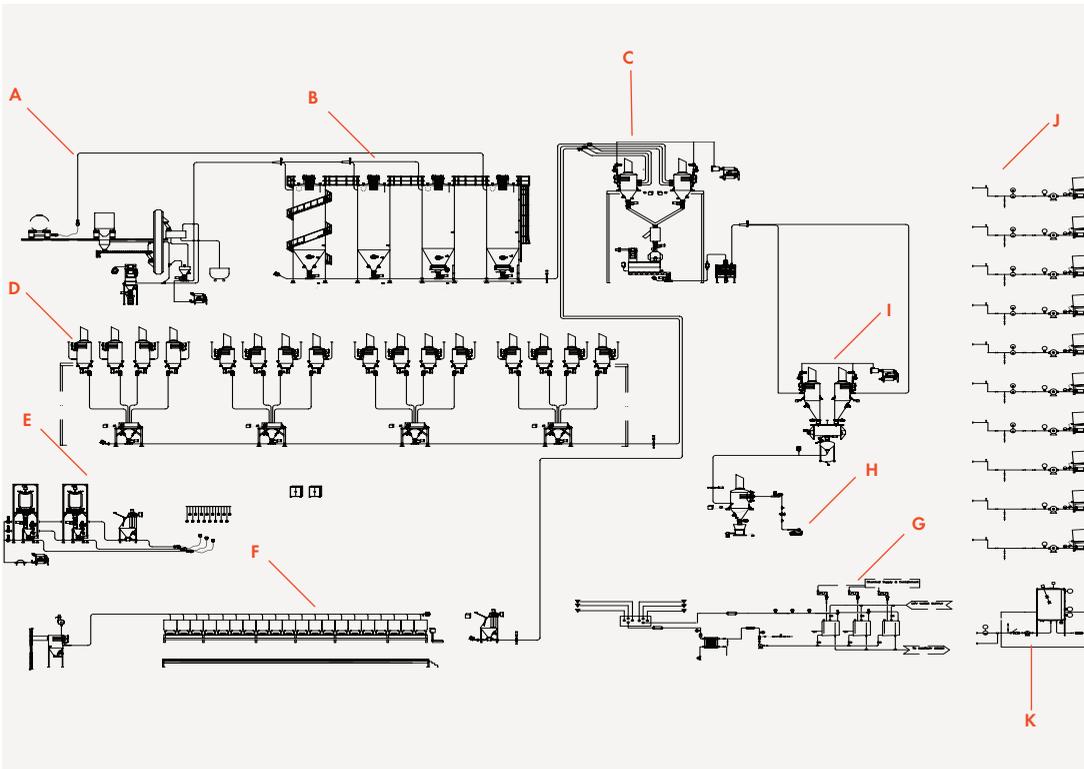

INDUSTRY PROFILE

SHICK[™]
SOLUTIONS

Scaling to Salivating

SOLUTION OVERVIEW

If you're beggin' for a better process, we have the solution. We provide a complete system design for pet food manufacturers.

Shick automates the delivery of raw ingredients with our precision batching systems on the front end of your process. We use continuous dense phase (CDP) technology to transfer finished product into storage or on to

packaging.

Our Shick Solutions cover every aspect of the pet food handling process.

- › Raw ingredient unloading and storage
- › Dry/wet ingredient delivery to mixing
- › Batching
- › Weighing
- › Feeding
- › Blending of finished product
- › Dense phase conveying technology in both pressure and vacuum, continuous and batch

- A: Bulk grain unloading
- B: Bulk storage
- C: Major/minor scaling & milling (drystreaming)
- D: Minor ingredient storage & dosing
- E: Minor ingredient filling
- F: Micro ingredient scaling
- G: CIP
- H: Vacuum dense phase transfer to processing
- I: Dry ingredient delivery to blender
- J: Liquid tote stations (minors)
- K: Bulk liquid storage
