cyclonaire.com

Stay one step ahead with our innovative systems.

We won't provide a status quo solution to your material handling needs. Or take the "it's good enough" approach. We don't believe that yesterday's answers address today's unique challenges in battery production. Rather, we constantly bring forward new and better ways of handling and mixing materials, especially hazardous products like lead oxide. Our precise controls system and instrumentation better manage your inventory, assuring safer, cleaner and more accurate conveyance. Deliver a higher quality finished product and save time, labor and material with Cyclonaire.

Material handling mill conveyor

Cyclonaire has been a leading provider of pneumatic conveying systems for more than 50 years. We'll design, manufacture and install a system around your unique materials and application needs. Let's get to work.

We move more than materials. We move margins.

You measure success in units completed. With Cyclonaire solutions, you can measure your success with greater productivity, accuracy and safety. Our customized, field-proven systems and components don't just get the job done; they get it done while boosting efficiency and performance. Here are just a few of the many advantages you'll experience with Cyclonaire:

SOLUTION

Highly Specialized Pneumatic Systems

BENEFITS

- Operates cleaner and safer
- Minimizes downtime
- Saves on equipment replacement costs
- Conveys all materials: zinc, manganese, potassium and lead oxides

Dense Phase Conveyors

- Maximizes dust-collection efficiency
- Minimizes spills and reduces contamination
- Decreases exposure to atmospheric variables
- Reduces the risk in handling hazardous material
- Reduces workplace contamination
- Boosts efficiency
- Conserves energy

No Close-Tolerance Parts

- Preserves integrity of the product
- Minimizes damage to materials
- Increases safety

Precise Controls/Instrumentation

- Monitors process to reduce the risk of handling hazardous materials
- Assures batch accuracy
- Screens oxide to ensure consistent size, reducing paste cleanup

Vacuum Unloading

- Provides for smaller pits with lower head height
- Creates greater flexibility for facility unloading
- Boosts efficiency
- Conserves energy

24/7 Tech Support

- Delivers immediate response to problems
