Controls:

- Femoral artery bleeds
- Carotid artery bleeds
- Class V liver bleeds

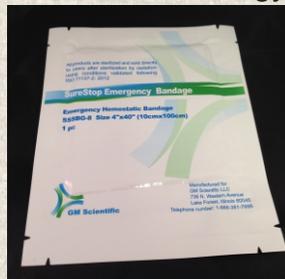

FDA 510(k)  
CE MARK Class IIB  
Utilizes Oxidized Regenerated Cellulose (ORC)

### GUN SHOT & STAB WOUND KIT

This kit contains advanced life saving technology for serious wounds. Packaged small, this kit should never be left behind.

CONTENTS:

- SureStop Trauma Bandage. When this hemostatic dressing comes into contact with blood and exudates, it quickly transforms into a viscous gel. It fills wound voids and blocks capillary ends. No mechanical removal is necessary, Surestop TD leaves no secondary wounds.
- H&H Mini Compression Bandage. Small yet powerful, this bandage absorbs and keeps compression using a plastic buckle.
- Hemostat Tamponade (2). These are embedded with the SureStop Trauma technology and are perfect for entry and exit wounds.

### RESCUE KIT

A general purpose, and more economical version of the above kit. The FareTec Rescue kit is designed to help with a wide range of issues from cuts and nosebleeds to major wounds.

CONTENTS:

- SureStop Hydrogel designed to treat wounds and burns. Maintains a moist healing environment.
- Responder Gauze. Can be use to pack wounds, compress wounds or for general fluid adsorption.
- Hemostat Tamponade (2). These are embedded with the SureStop Trauma technology and are perfect for entry and exit wounds.
